

### SUPPLY TECHNICIANS

Recent Graduates of Supply Technicians Course 163 at RCAF Station Aylmer, Ontario, are depicted in similar to the method in which they carry out their duties at their next unit:

LEFT ACI RJ (Bob) Johnson, 18, Caledonia, Ontario (transferred to Station Clinton); ACI Geroye Watts, 18, whose parents Mr. and Mrs. J. F. Watts reside at Grand Tracadie, Prince Edward Island (transferred to CJATC Rivers); LAC Donald Campbell, 23, Merriton, Ontario (transferred to Station London); and ACI TM (Tom) Williams, 19, New Toronto, Ontario (transferred to 1 Supply Depot Downsview).

## Toronto Academy Of Medicine Makes L. B. Pearson A Fellow

TORONTO (CP) — The Toronto Academy of Medicine, celebrating its 50th anniversary recently, has elected Lester B. Pearson, minister of external affairs, by conferring an honorary fellowship upon him.

The citation accompanying the award said that Mr. Pearson has "stimulated a great respect for and an understanding of the role of Canada in world affairs."

"He has continually contributed constructive suggestions and sound solutions for the possible settlement of many of the problems which have been and are associated with this maelstrom of international disturbances."

Mr. Pearson's little-known medical background was recalled by Dr. William A. Dafoe in introducing him. Both went overseas during the First World War with the University of Toronto base hospital and Mr. Pearson qualified as a male nurse in England. He and Dr. Dafoe served together in Salonika in 1915. Mr. Pearson transferring to the Commissariat department and later to the Royal Flying Corps while Dr. Dafoe continued in medicine.

Only 20 living men are permitted to hold honorary fellowships in the academy. Governor-General Massey and Sidney Smith, president of the University of Toronto, also hold them.

The academy held a four-day exhibition of medical achievements to mark the anniversary. The exhibit ranged from photostatic copies of the footprints of the Dionne quintuplets to an eye bank for the refrigeration and transportation of corneal transplants.

**MANY VARIETIES**  
About 300 species of oak trees have been listed, of which 50 are found in North America.

### AGRICULTURAL NEWS

P. E. I. Department of Agriculture

**VETERINARY SERVICE**  
This is the season of the year when a far greater number of conditions and diseases of livestock occur. Consequently this is the season when the practicing Veterinarians are on the go for many hours each day. The service which you receive can be greatly assisted if you call early in the day. Don't wait until night fall to phone if an animal has been sick all day. Let's co-operate, be thoughtful of the other person and share in the mutual benefits derived therefrom.

**DR. KELLY**  
Two and a half weeks ago Dr. H.H. Kelly, practicing Veterinarian for Charlottetown and District, had a very unfortunate accident during poor visibility in a deep cutting. Both the Doctor and his assistant Barry Rankin of Southport had both legs broken in the four vehicle collision. Dr. Kelly's wide circle of friends and acquaintances will be glad to learn that they are both progressing favourably in the Prince Edward Island Hospital.

**STILBESTROL**  
Livestock owners using stilbestrol feeds should be extremely careful that bred animals do not have access to this type of feed. This warning comes from your Veterinarian Division. In a high percentage of cases, bred animals fed daily on stilbestrol feed will abort their calves. This has happened and will cause serious losses in breeding stock.

**SHAREHOLDERS MEETING**  
A special meeting of the shareholders of the Farmers Abattoir Co. Ltd., will be held Friday afternoon at 2 p.m. on April 26, 1957 in the Canadian Legion Hall, 57 Grafton St., Charlottetown. It is very important that you attend this meeting because it will be the last one before operation begins.

**MILITARY AUTHOR DIES**  
ENNISKERRY, Ireland (Reuters) — Maj.-Gen. Gerald Lloyd Gurney, 56, who commanded the British 7th Armored Division—the Desert Rats—in its European battles from Normandy to the Rhine, died here Wednesday. Verney wrote the history of the division in *The Desert Rats*, published in 1954.

breed during the first year of operation. This is an attempt to determine if there is sufficient interest in the area to form an Artificial Breeding Club.

**TAKE STOCK**  
At meetings through the press and radio we hear about how we must be more efficient in Agriculture. We must be more cost and loss wise. We must establish or maintain our operation on a business basis. This is all very true in this day of continuing increases in the cost of production and the relatively slight increases in market values.

If we are going to meet present day competition and present day problems we must examine closely every operation on the farm. In any livestock programme many losses occur each year in this province thousands of dollars are thrown away through these channels. Let us list and explore a few of these leaks.

Breeding problems in all classes of livestock and more especially in cattle represents an annual loss of many thousands of dollars. This whole problem is complex one and can only be approached by first having an accurate diagnosis made. In addition to this, the use of common sense husbandry practices will materially help.

High on the list are the losses incurred through mastitis. Infection in a cow's udder. Here is the place where the dairyman can play the main role. The adoption of sound milking practices, proper construction of stalls, the use of a good sanitary programme, etc. will offset many losses presently due to mastitis. Why not enquire and use the Mastitis Control Programme.

Innoculation of cattle against blackleg, malignant oedema, calfhood vaccination against Brucellosis; swine against erysipelas and respiratory conditions. Farm dogs mink, foxes, against distemper and infectious canine hepatitis; cats against feline enteritis.

Parasite control in all classes of livestock—coccidiosis and lung worm in cattle, round worms in hogs, poultry, dogs, etc. How about pulling your sheep for nodular diseases. Keep all animals free of lice, mange and ringworm.

Poultry respond well to good sanitation, ventilation and disease control such as prevention of parasites, Avian tuberculosis, big liver disease, respiratory diseases, etc.

These are only a few of the things which we can do to cut down our losses. What are you prepared to do about any or all of these problems? If your Veterinarian Division can be of help, write to the Director of Veterinary Services, Box 3000, Charlottetown.

**TROUBLE?**  
When a disease is present in a poultry flock it is not always easy to answer the question "Where did this disease come from?" It is important to know how the disease is introduced to a flock so as to prevent future outbreaks. Some diseases may be present in the soil but cause no harm unless temperature and moisture conditions favourable to growth of the

organism come into play. Two disease agents that can persist in the soil for long periods of time even in our severe winter temperatures are Tuberculosis and Coccidiosis.

It was moved by Claretta MacWilliams and seconded by Danny O'Halloran that the meeting be adjourned. Lunch was then served by the hostess, assisted by Verna MacWilliams, Ian MacWilliams, Secretary-Treasurer.

The Kensington Holstein Guernsey Calf Club met in Margate School in March with the president in the chair. The meeting opened by repeating the club pledge and the motto. There were ten members and eight adults present.

It was moved by Roland Proffit and seconded by Bert Palmer that we have a debate for the next meeting. The debate is to be resolved that dairy cattle are more profitable than beef cattle. The members on the pro side are Bert Palmer, Kenneth Thompson and

Adèle and Claretta. The next meeting is to be held at the home of Adele and Thane Frizzle on May 3rd.

## Find Sunday Afternoons Bad For Home Accidents

TORONTO (CP) — Watch out around the house on Sundays between four and seven p.m.—particularly if you have a little boy between one and five years old.

According to two federal health department physicians, the 47 p.m. stretch on Sundays witnesses more accidents in the home than any other similar period during the week.

And males in the 1-5 age group are the most prone.

Dr. E. H. Lossing and Dr. Roger B. Goyette disclosed in the April issue of the Canadian Journal of Public Health the results of an accident survey conducted among 1,000 families in the Ottawa-Hull, Que. district.

**CUTTING MOST FREQUENT**  
Their study showed: "Cutting and piercing" mishaps accounted for 246 of the 1,000 cases. Falls of one kind or another made up 469. Blows of various descriptions reached 105. The balance consisted of burns, poisoning, foreign agents entering body openings and accidents caused by

animals or insects. There were 109 reports not classified because of their great diversity.

One hundred and sixty-nine accidents occurred on Sundays—the most of any day—155 on Saturdays and 151 on Mondays which the doctors said illustrated the high weekend hazard. Tuesday, for example, saw only 113.

Again, 242 of the 1,000 happened between 4-7 p.m. and 223 between 10 a.m.-1 p.m. Oddly, there were 33 mishaps between midnight and 7 a.m.—20 of them falls.

**AGED IN MINORITY**  
The 1,000 persons involved included 376 between the ages of one and five—237 of the boys. Contrary to popular opinion, the aged were in the minority; only 29 persons of the 1,000 were over 70.

Physical disability played a small part in the accidents but, the doctors found, 20 per cent of the victims had had a previous accident.

As to the causes, they said, "in the pre-school group it appears that the most dominant factor was lack of supervision and carelessness on the part of responsible persons."

"There are indications that three-quarters of the accidents observed were preventable had a reasonable degree of care and forethought been applied," they concluded.

**Service In West For Mrs. Albert Weeks**  
Several from the Island took part in the funeral of Mrs. Albert Weeks recently held at the Chapel of the Chimes, Edmonton Alta. The minister was Rev. Dr. Edwin White, who grew up in Charlottetown, and received his early education here. At the organ was Prof. Frank Johnson, former Organist at Zion Church in this City. Among the pall bearers were Gordon Lafferty and Elmer Rice, well known in this area.

Mrs. Weeks was the former Olga Anderson, whose father and step-mother, Mr. and Mrs. George Anderson are Charlottetown citizens. Following her marriage to Albert Weeks of Winsloe, she lived in this City and Winsloe before moving to Edmonton. She is survived by her husband and eleven children, Barbara and Albert in Edmonton, Carol (Mrs. Elmer Clow), North Wiltshire, P.E.I.; Wayne, in the R.C.A.F., Germany; Dawn, Temple, Merle, Yrinda, Sandria, Graham, and Dean, in Edmonton.

**YORK**  
Mr. and Mrs. Edison Watts, Charlottetown, were visitors to York on Sunday, they were the guests of Mr. and Mrs. Harold Watts York.

Mr. and Mrs. Ernest MacDugald and daughter Hazel, were recent visitors to Charlottetown. Miss Margaret Watts, York, spent Saturday in Charlottetown.

Mr. and Mrs. Jack Hardy, Charlottetown, are guests, at the home of Mr. and Mrs. Will Crockett, York.

Mr. and Mrs. Clifford Chandler, Milton, were visitors to York on Sunday. Mrs. Chandler's mother, Mrs. Herbert Vesey, accompanied her back where she will spend some time.
