Expect Newsprint Demand To Set Record Next Year

MONTREAL (CP)—The Newsprint Association of Canada estimates world newsprint demand in 1959 will exceed 14,200,000 tons—the largest ever.

The estimate, published in the association's annual Newsprint Data, is based on an expectation that North American demand will be at least 7,300,000 tons, equal to the figure in 1956, the largest year on record.

Last year newsprint demand on this continent was down by six per cent from 1957 and nine per cent from 1956 and as a result the world consumption of newsprint decreased for the first time since the Second World War.

RESERVE CAPACITY
The publication says non-Communist countries now have a reserve newsprint producing capacity of 2,500,000 tons and for the first time in 10 years North American producers have sufficient capacity to meet projected increases in demand.

Canadian shipments in 1959, the publication estimates, will be 6,140,000 tons, compared with 6,000,000 tons in 1958, when nearly 5,000,000 tons went to the United States, 420,000 tons to Canada and 780,000 tons to overseas customers.

Patterns of world newsprint supply have changed greatly during the last five years, the publication reports, with the most significant factor being development of a large newsprint industry in the southern United States, New Zealand and Chile.

Auburn, Maine Plant Burned

AUBURN, Me. (AP)—A cabinet works was destroyed and an adjoining tenement badly damaged by a threatening blaze in a congested downtown area Saturday.

Members of four families were safely evacuated in 14 - above-zero weather while firemen threw a water screen between the tenement and the blazing Brewer and Paradis Wood Products plant only six feet away on Main Street.

The cabinet works, employing about 10 men, was closed for the weekend. Fire raging in wood shavings and sawdust spread swiftly throughout the three-story wooden structure. In minutes, the walls and roof collapsed.
