# MOVIE NIGHT

## "SATURDAY NIGHT ILLNESS"

### SATURDAY NIGHT ILLNESS

by Chris Dollard

Disco freaks and sweatog fans, line up--have we got a movie for you. Saturday Night Fever has it all: steamy discos complete with flashing floors, dry ice fog, and typical disco tunes provide the setting for dreamboat John Travolta to cut loose and strut his stuff.

The story line, however, is

very thin and boring. Travolta plays a paint store worker with a swept up hairdo that appears set in concrete. His vicious homelife is endured for as long as it takes him to blow dry his hair and eat dinner. When dark falls he becomes a super-stud, super-dancer. Included in his evening agenda is street fighting drinking, cruising, and womanizing; all in a 1964 Chevy four door. The girls in his life are limited to whatever he can find at the "2001"

disco. Until, of course, he meets his match, who is played by Karen Gorney.

She is his intellectual superior, and he finds himself uncomfortable and infatuated at the same time. Their relationship follows a rocky road since they have virtually nothing in common apart from their dancing ability.

The dancing sequences are supposed to be the main attraction of the movie.

Travolta has some good moves,

but the heavily choreographed dancing is mediocre at best. The music, supplied by the Bee Gees, is well suited to the disco atmosphere.

Saturday Night Fever has enough to attract members of the disco jet set, but is incapable of sustaining suspense, plot, or whatever else a movie is supposed to sustain. You're better off to save your \$3.75 for the real discos, then you can get the same thing in Real Life.

# Sunday Night Movie

## FEB 26
