Governor-General Opens New Toronto City Hall

By JOE DUPUIS
TORONTO (CP) — Governor-General Vanier opened Toronto's new city hall Monday with a ceremony from a host of speakers assembled on a makeshift platform. They included Prime Minister Pearson.

"This magnificent work has won world-wide acclaim, not only from the architectural and engineering communities, but from every person who appreciates the bold and imaginative," said Mr. Vanier. "It takes its place as one of the triumphs of the Canadian scene."

Nathan Phillips, mayor for eight years until his defeat in 1962, figured prominently in the platform ceremonies, as the man chiefly responsible for the project, first broached 10 years ago and completed amid bitter controversy.

Mayor Philip Givens presented him with a Gold Medal, the city's highest award of merit.

DREAM COMES TRUE
"This is the fulfillment of a dream for which I have long looked forward," he told the applauding crowd.

The 2-acre square on which the throng gathered is named after him.

Almost obscured by the flags, bunting, speaking platform rows of straight-backed chairs and benches for the 2,500 invited guests was the three-storey, domed city council chamber building—looking like a flying saucer resting between the half-moon office towers on each side.

The 90-minute ceremony opened with a flypast by five RCAF jets, over the 27-storey east tower, and the adjacent 20-storey west block.

Mr. Pearson said the achievement of erecting the building was almost as exciting as the building itself. But he "shed a nostalgic tear" for the old, black-stone city hall, across the street from the new one.

Two other medals were presented, both by Mayor Givens. Mrs. Viljo Revell, widow of the Finnish architect who designed the edifice, was presented with a gold neck chain.

The all-male Toronto Finnish male chorus sang Finlandia as a tribute to the architect. "Let this day mark a new day in the epoch of our city," Mayor Givens said in a brief address. "Let people everywhere bear witness to Toronto's pride."

Seated below the platform were guests such as Mayor Jean Drapeau of Montreal, who described the building in an interview later, as a "monument, a masterpiece."

The ceremony launched a week of celebrations, which will include symphony concerts, opera, ballet, folk dancing, military pageants, and a Go-Go festival, paying homage to the modern teen-age beat.

The department said in a statement the decision means continuation of the five-year program introduced in 1960 to provide assistance in the movement of commercial ewes and ewe lambs to sheep-deficient areas for breeding purposes.

The program applies to the transport of sheep within Western Canada, from Western to Eastern Canada and from Quebec to the Atlantic provinces and Ontario. The federal government contributes up to 50 per cent of the transportation costs, with its share machine that of a participating province.

The extended program will run to March 31, 1968.

N.B. Winery Plans To Use Blueberries

MONCTON (CP) — Parkdale Wines Ltd. will establish a winery in the greater Moncton industrial park at Scoudouc, about 12 miles east of here, it was announced today.

The announcement was made jointly by Finance and Industry Minister L. G. DesBrisay and E. Gordon Gilbride, executive vice-president and general manager of Parkdale Wines Ltd., a subsidiary of the Canadian brewing firm of John Labatt Ltd.

The New Brunswick Development Corporation assisted in the establishment of the winery, expected to use 1,000 tons of blueberries a year, adding stimulus to the blueberry industry in the province. The plant is expected to employ about 50 persons when in full production.

Mr. DesBrisay said wines produced at the plant "will be predominantly marketed along the eastern seaboard of the United States from Boston to Florida." He said it will "serve to stimulate production of glass bottles to be manufactured in a glass container plant planned for the province."

Students' Vote Loophole Seen

VANCOUVER (CP) — University of B.C. students believe they have found a loophole which would allow thousands more to vote in the Nov. 8 election.

Peter Braun, vice-president of the UBC student body, said all students in residence must place a deposit with the university during the summer to reserve accommodation.

This may legally constitute residence, he said.

Students plan to check their findings with election officers.

Port Hawkesbury Gets Temporary Water Line

PORT HAWKESBURY, N.S. (CP) — A 1½ mile temporary water line was to go into operation Monday night giving 2,200 residents of this town their first water from household taps in 12 days.

A temporary line was stretched Monday to a town hydrant from the Nova Scotia Pulp Ltd. mill here to take the strain off tank trucks supplying homes.

The town has been deprived of a regular water supply since the 30-year-old artesian well ran dry almost two weeks ago. Enough water to exist on has been trucked to homes by army tankers from Halifax and from the pulp mill.

Mayor A. J. Langley said testing would begin Monday night in an artesian well drilled by the provincial mines department.

The well is down about 300 feet and will be tested for about 72 hours.

A second test well is expected to begin pushing up water today, also for a trial period.

Mayor Langley said the only businesses forced to close down

because of the water shortage were a laundromat and a dry-cleaning plant.

He said the artesian well that ran dry had been sunk to the 500-foot level. Mines department officials said it was rare for an artesian well to go dry, but it had happened before.

Tankers from the town fire department had also been aiding in the delivery of water.

No serious fires have developed since the shortage began. The adjacent harbor of salt water provided a source for fire fighting because almost all the fire trucks were equipped to pump from it.

The pulp company gets its water from lakes near the mill and these were expected to see both town and mill through the emergency. This area, like most of Nova Scotia, experienced one of the driest summer seasons on record this year.

Mayor Langley said if the test wells do not prove satisfactory the town would apply to the Atlantic Development Board for a grant to pipe water in from nearby lakes, rather than depend on tankers.

2 Injured By Crane

TORONTO (CP) — A 270-ton crane crashed to the street in St. Clair Avenue in midtown Toronto Monday injuring two construction workers, narrowly trapping a streetcar on the road and a family of four in a house.

The crane's 200-foot boom brought down hydro and streetcar lines as it fell, and smashed through the bedroom roof of the home of Mr. and Mrs. Anthony Cowal.

Mr. Cowal, 28, had walked out of his second-floor bedroom a few seconds before the crane struck.

Crane operator Richard Memorsky, 50, and helper Dino Farvelli, 28, jumped from the control cab about 20 feet up, as the crane tore loose from its base. They suffered minor leg injuries.

A streetcar was derailed and passengers in motion as it slid down the street when wheels sliced live wires as the operator braked about 50 feet from the crane.

The crane, erected by Continental Climbing Crane Ltd., was being used to build a 20-storey office and apartment building.

Sheep Policy Is Continued

OTTAWA (CP) — Federal assistance in the cost of transporting sheep for breeding purposes is being continued for another three years, the agriculture department announced on the weekend.

The department said in a statement the decision means continuation of the five-year program introduced in 1960 to provide assistance in the movement of commercial ewes and ewe lambs to sheep-deficient areas for breeding purposes.

The program applies to the transport of sheep within Western Canada, from Western to Eastern Canada and from Quebec to the Atlantic provinces and Ontario. The federal government contributes up to 50 per cent of the transportation costs, with its share machine that of a participating province.

The extended program will run to March 31, 1968.

Thant May Stop Off At Moscow As Peace Effort Is Continued

NEW DELHI (AP) — United Nations Secretary-General U Thant's mission to end the fighting between India and Pakistan appeared stymied Monday night and there were signs he would seek help from world powers.

Reports of victories in the field hardened India's stand on its terms for a ceasefire.

Pakistan made similar claims of victory on the western front around Lahore and Sialkot and there were signs he would seek help from world powers.

The Soviet statement appeared to be aimed at China, which supports Pakistan and once again has raised fears of a renewal of the 1962 border conflict between India and China.

In Washington, U.S. State Secretary Dean Rusk advised China to "stay out" of the India-Pakistan conflict.

"I think that there are those who feel that China is fishing in these troubled waters," Rusk told reporters.

"I think the Soviet attitude has been helpful so far," he added.

Indian officials privately acknowledged that if anything could force an end to the conflict it would be pressure by the Soviet Union and other powers, especially the United States and Britain.

Arab Enjoys 157 Spouses

TEHRAN, Iran (AP) — Ali Zuhriq, 67, has had 157 wives in 51 years.

And Monday he paid a tribute to spouses that will anger their moms: "A wife can double her husband's life—provided there is no mother-in-law."

The evening newspaper Ehtelaat says that spitefully Ali has had a mere 20 official wives—but 137 contract wives.

Under Moslem tradition a man can have four official wives at one time and an unlimited number under contract.

All listed his conquests: Fifty wives came from Khorassan (near the Russian border), 30 from Azarbaijan (on the border), 25 from Rasht (Caspian Sea), 25 from Damghan, 20 from Baluchistan and Tehran and three Arabs.

His verdict: "Khorassan wives are jealous and intolerant—but spouses from Rasht are kind and devoted."

Rift Marks Arab Meeting

CASABLANCA, Morocco (Reuters) — The third Arab summit conference opened here Monday night with an open rift between Tunisia and the rest of the Arab world.

Arab foreign ministers, meeting in an emergency session just before the conference began, rejected a memorandum from Tunisian President Habib Bourguiba explaining his decision to boycott the meeting.

In his statement and in a nationwide speech from Tunis Monday, Bourguiba accused Egypt of having engineered plots throughout the Arab world to enforce Egyptian policies.

Finds Treatment To Aid Black Eye

SEATTLE (AP) — A Seattle doctor says he's found something better than a beefsteak to treat a black eye.

Dr. Harold Brown told the state medical association convention the substitute is dimethylsulfoxide, a solvent frequently used in the production of synthetic fibres.

Brown said the substance, pioneered medically by Dr. Stanley Jacob and Dr. Edward E. Rosenbaum of the University of Oregon, will change a swollen black eye to an unswollen pale yellow eye in 90 minutes.

He said all that's necessary is to apply a solution to the skin around the bruised area.

Students' Vote Loophole Seen

VANCOUVER (CP) — University of B.C. students believe they have found a loophole which would allow thousands more to vote in the Nov. 8 election.

Peter Braun, vice-president of the UBC student body, said all students in residence must place a deposit with the university during the summer to reserve accommodation.

This may legally constitute residence, he said.

Students plan to check their findings with election officers.

Port Hawkesbury Gets Temporary Water Line

PORT HAWKESBURY, N.S. (CP) — A 1½ mile temporary water line was to go into operation Monday night giving 2,200 residents of this town their first water from household taps in 12 days.

A temporary line was stretched Monday to a town hydrant from the Nova Scotia Pulp Ltd. mill here to take the strain off tank trucks supplying homes.

The town has been deprived of a regular water supply since the 30-year-old artesian well ran dry almost two weeks ago. Enough water to exist on has been trucked to homes by army tankers from Halifax and from the pulp mill.

Mayor A. J. Langley said testing would begin Monday night in an artesian well drilled by the provincial mines department.

The well is down about 300 feet and will be tested for about 72 hours.

A second test well is expected to begin pushing up water today, also for a trial period.

Mayor Langley said the only businesses forced to close down

because of the water shortage were a laundromat and a dry-cleaning plant.

He said the artesian well that ran dry had been sunk to the 500-foot level. Mines department officials said it was rare for an artesian well to go dry, but it had happened before.

Tankers from the town fire department had also been aiding in the delivery of water.

No serious fires have developed since the shortage began. The adjacent harbor of salt water provided a source for fire fighting because almost all the fire trucks were equipped to pump from it.

The pulp company gets its water from lakes near the mill and these were expected to see both town and mill through the emergency. This area, like most of Nova Scotia, experienced one of the driest summer seasons on record this year.

Mayor Langley said if the test wells do not prove satisfactory the town would apply to the Atlantic Development Board for a grant to pipe water in from nearby lakes, rather than depend on tankers.
