"Covers Prince Edward Island Like The Dew"

France, Red China Dispute Project Air Geostation May Get ADB N.S. Expects 6 Inches Snow Waterfront Project Considered Possible Credit Survey Among Farmers Is Scheduled Causeway Rail Line Meets Official Scrutiny 2 Firm Recommendations Promised By Chairman Reserve Chute Saves Trooper INSIDE TODAY

PARIS (AP)—France and Red China engaged in a dispute over the two-Chinas question Tuesday, a day after they agreed to establish diplomatic relations.

France proclaimed its intention to maintain relations with the Nationalist China regime of President Chiang Kai-shek despite a statement by Red China's foreign ministry in effect demanding that Paris break with the Nationalists.

The Peking government denounced the two-Chinas concept and asserted that Monday's agreement to establish diplomatic relations with France was reached on the understanding that France would expel the representatives of the "old ruling group."

A French official spokesman countered that this may have been Peking's understanding, but not that of France. The spokesman said France is standing on the point of its communiqué, it simply said that France and Red China had agreed to establish diplomatic relations and would discontinue relations with the Nationalists within three months.

BOTH RECOGNIZED
The French spokesman said France was making no distinction between the two Chinas in the regime which effectively governs mainland China — the Communist government — and recognizes the government which effectively controls Formosa — China's Nationalists.

The spokesman said Red China's interpretation of the exchange of diplomatic representations was Peking's own business and had no bearing on the agreement was reached between the two Chinas with and without strings.

Peking's broadcast blamed the Communists for the two Chinas concept, claimed French recognition had further isolated the island, and invited the United States to support its military policies.

"I do not expect that kind of transformation on the mainland for the foreseeable future," Rusk replied.

TEST BORINGS MADE

Waterfront Project Considered Possible

Although it could not be confirmed last night, from current activity it appears that the federal government may be planning a reconstruction project on the Charlottetown waterfront.

It was learned that a boring technician from the testing laboratories of the federal department of public works has arrived in the city. He will make a number of test borings along certain sections of the shoreline.

Initial activity this week along the shore of the project between the Testers' Club and Prince Street Wharf.

It is understood that the project will conduct a number of test borings, apparently for the purpose of making a soil survey, also to ascertain the nature of the bedrock and to what depth it will be necessary to go before it is reached.

Local department officials stated last night that there was no indication from Ottawa as to what is planned once the survey has been completed and analyzed.

But it is known that federal officials have been over here for some time that some type of project will have to be carried out along certain sections of Charlottetown harbor to halt erosion.

N.S. Expects 6 Inches Snow

HALIFAX (CP)—The weather office here said Tuesday night up to six inches of snow was expected to fall on Nova Scotia by this morning.

Furries were expected to continue today with 25 miles an hour winds and gusts to 40 whipping the snow into drifts.

In Cape Breton and some northern areas fairly heavy snowfall was expected today.

The temperature in Charlottetown shortly after midnight was 30 degrees and climbing slowly. It was expected to reach 25.

Light snow began to fall around 2:30 last night and the Charlottetown radio range reported that from three to six inches could be expected.

Winds at midnight were north-east 15 and were expected to increase to 25.

Rusk Upbraids Red China in Policy Speech At Okyo

TOKYO (AP)—U.S. State Secretary Dean Rusk, in a policy speech, upbraided Red China Tuesday night as a regime with "nothing but contempt for the most elementary condition of peace."

"Peking has violated the Geneva agreements of 1954 on Indo-China and the Geneva agreements of 1962 on (a neutral) Laos. It incites and actively supports aggression on South-east Asia."

"Peking attacked India and occupies a position from which it continues to threaten the sub-continent of South Asia. Peking is attempting to extend its tactics of terror and subversion into Latin America and Africa."

"In other words, Peking is demonstrating every day that it has nothing but contempt for the most elementary condition of peace, namely, leave your neighbors alone."

Rusk declared that free nations "must not reward the military of Peking" and added that "when mainland China is a government which is prepared to renounce force, we will make peace and to honor international responsibilities."

Rusk said it was possible French recognition of Peking may increase the volume of trade between Red China and its neighbors.

He added that it would be unfortunate if Western nations entered a race to extend easy credit to Communist countries when other nations are in need.

Referring to his dinner address, a reporter asked whether the U.S. would recognize a Chinese regime that might change its military policies.

"I do not expect that kind of transformation on the mainland for the foreseeable future," Rusk replied.

External Affairs Minister Peppers With Questions

OTTAWA (CP)—Carleton University students exposed External Affairs Minister Marjory Leighton to a cross-fire of questions on topics ranging from recognition of Red China to Canada's foreign aid effort.

The impromptu "press conference" developed at the conclusion of a formal address by Mr. Martin in connection with a student's fundraising drive for scholarships to bring overseas students to Carleton.

Credit Survey Among Farmers Is Scheduled

REGINA (CP)—A credit survey will be made among Canadian farmers in the next few months. W. A. Ozard of Ottawa, vice chairman of the Farm Credit Corporation, said Tuesday.

Mr. Ozard told a conference of FCC employees in Saskatchewan that the survey, to cover 4,500 farmers across Canada, "gains a first-hand knowledge of the farmer's credit needs and services sought by him."

It is planned by the federal agricultural department.

W. A. Duncaan, Regina manager of the Saskatchewan branch of FCC, told the conference that more than \$10,000,000 of borrowed capital now is being used in Canadian agricultural.

These who argue against the rail line also point out that there has already been a reduction in the amount of railway service provided on the island itself.

The argument against the rail line as part of the crossing is based on two major factors—the cost and the actual need. While no figures have ever been quoted, it is believed that to build the crossing to include a rail way line will add several million dollars to the total cost of the project because of the additional work required.

Reserve Chute Saves Trooper

CAMP BORDEN (CP)—A reserve parachute opened less than 200 feet from the ground to save the life of Royal Canadian Regiment paratrooper Pte. Ronald J. Reay, 38, slowing his plummeting descent from 1,200 feet during exercises here Tuesday.

Pte. Reay, of Regina, 39, was seen to open his parachute while in a string of paratroops bailing out from a RCAF C-119 flying low over the area.

The official, who did not want to be identified, said his "chute" landed in the matter of seconds.

As he fell, the soldier tried to shake the line free without success and when he was about 250 feet, ground personnel could see him pull his reserve 'chute.

It did not open fully until it was about 100 feet from the ground and he slammed into the earth. His first chute was injured. He said later he was "shook up."

2 Firm Recommendations Promised By Chairman

OTTAWA (CP)—The Atlantic Development Board Tuesday promised to make two firm recommendations by the end of the month.

Mr. MacKeigan said the board has accepted as part of its policy that special assistance will provide basic facilities in industry.

Mr. MacKeigan said the board believes that one of its prime functions is to act as a sort of Atlantic lobby to get provincial and federal government departments to co-operate in providing for the Maritime transport and power problems.

Successful Drive Key To United Fund's Aim

Regret was expressed by Frank W. Curtis, president of the Prince Edward Island United Fund, at the annual meeting last night at the Canadian Legion, that the budget for 1963 of \$233,000 had so far fallen short of its objective about 200,000.

He expressed optimism that in his valuable lessons had been learned which "will be of significant value to those who will be directing affairs of the organization in the future."

The president stated that results show a total of \$181,572.20.

Quebec's Case Dismissed in Federal Appeal

OTTAWA (CP)—The Supreme Court of Canada ruled Tuesday that it cannot pass judgment on the Quebec Reference on Freedom and Public Order Act of 1954 because the controversy has never been judicially decided.

The court dismissed an appeal by Jehovah's Witnesses evangelist, Laurier Saumur of Quebec, who had been ordered to pay a fine for violating the 1954 law.

The court also dismissed the Quebec government's intervention in the case and declined to rule on the constitutional validity of the Quebec statute.
