

Give the Baby a Chance
 The only food that will build up a weak constitution gradually but surely is
Martin's Cardinal Food
 a simple, scientific and highly nutritive preparation for infants, delicate children and invalids.
 KERRY WATSON & CO., PROPRIETORS,
 MONTREAL, CANADA.

Klondike.

Start from Vancouver Because

1. VANCOUVER is the best outfitting point on the coast, goods being considerably cheaper than in the United States.
2. VANCOUVER is the nearest port of departure to the Yukon district.
3. VANCOUVER is the terminus of the C. P. Railway, whose steamers will start from VANCOUVER this spring.
4. All north-bound steamers call at VANCOUVER.
5. Direct steamers to Yukon ports have now commenced to run from VANCOUVER.
6. VANCOUVER is the only Canadian port where passengers transfer direct from train to steamer.
7. KLONDIKE is in Canada, outfit in VANCOUVER, and save 30 per cent. Cost of July.

W. GODFREY,
 Trade, Vancouver, B.C.

California Prunes

We have a very fine assortment of California Stewing Prunes on hand. They are much nicer than the Turkish Prunes being larger and better flavored.

Cape Cod Cranberries

We have several bbls. of choice Cranberries in stock. On account of the scarcity of apples this year, we are selling quite a lot of Cranberries for pies, sauces, etc.

EPSS'S COCOA

ENGLISH BREAKFAST COCOA
 Possesses the following Distinctive Merits:
 DELICACY OF FLAVOR.

A Magician's Hands.

Herrmann was a born magician. He not only mystified and entertained by the astonishing dexterity with which he executed his remarkable feats, but charmed his audiences by his graceful manner and the singular magnetism of his personality. Not only was he a magician, but a comedian of a high order. His success lay largely in the perfection of his skill as a manipulator. His hands were trained to a marvelous state of responsiveness, and he was primarily a juggler, deceiving the eye by diverting attention from the movements that might reveal the mystery while he performed almost impossible feats with the hands and fingers. It was in the mastery of this simple work that his strength as a performer lay, although he elaborated them with paraphernalia and stage effects. He was continually elaborating old tricks with new adaptations.

Herrmann's ability to handle cards was wonderful. Not only was he master of the ordinary tricks of causing cards to disappear and reappear, to find packs concealed beneath vests, under hats, but he could distribute an entire deck of 52 cards all over a theater. This he did with such marvelous accuracy in Boston in 1886 or 1887 that a spiritualistic society made the feat a subject of discussion, and Herrmann was made an honorary member without his knowledge or consent. What he did was to throw from between thumb and forefinger a card and cause it to land on the rail of the top gallery. The second card would fall within a few feet of it, and the third within a few feet of that, and so on throughout the house until the entire pack had been distributed. It was claimed by the Spiritualists that this could not possibly have been accomplished without supernatural aid. By long practice Herrmann was able to tear a deck of 52 cards longitudinally in half, as straight as though cut with a knife. He would take these rectangular halves and divide them again into strips, using only his thumbs and forefingers to do the work.—Springfield Republican.

The Old and the New Terror.

It is known generally that the monitor Terror, which has just gone into commission, has been building for a score of years. The same is true of the other monitors—Puritan, Monadnock and Amphitrite. The Miantonomoh, which went into commission about two years ago, was also started at the same time that the others were laid down. That was in 1874 and in 1875.

This group of monitors represents a different grade of vessel from that for which they were intended originally. The delay in finishing them has resulted in making them modern. They are now unsurpassed in their fighting qualities. They have modern guns, modern armor, modern engines and twin screws. These ships have been built and rebuilt. To convert them into fighting machines of an advanced type it has been necessary to rebuild them under the guise of "repairs." It is believed generally that the Terror has never been in commission until recently. The executive officer of the Terror surprised his mates in the wardroom the other day by saying:

"Do you know, I once sailed into Havana harbor on this very ship—that is to say, the Terror was in commission when I was a young officer, and I was attached to her. This is supposed to be the same vessel. It is a new ship instead. Still there must be some one piece of the old ship in this one. She has been completely rebuilt under the 'repairs' system. Some day I'm going to try to hunt around and see if I can find that piece of the original vessel. It must be here somewhere, but I venture to say it will be many moons before we find it."—New York Sun.

Paid In His Own Coin.

The obsequious European person who seeks fees from travelers by pretending to take them for members of the nobility occasionally meets an American tourist who falls into his trap.
 An American gentleman of somewhat imposing personal appearance had a door opened for him at the Paris Opera House by an ouvreure, or usher, who bowed low and said:
 "The door is open, prince."
 The American glanced with an expression of great affability at the employee, and without extending the expected fee simply said:
 "Thank you very much, viscount!"—Youth's Companion.

English Dairy Products.
 English dairy authorities state that the English cows produce 1,400,000,000 gallons of milk annually, of which 400,000,000 are used for making butter and cheese, 100,000,000 as milk for the table, at an average of 16 gallons per inhabitant, and 400,000,000 in fattening calves.

The seed of the wild oat seems to be endowed with a sort of life of its own. Wild oats, when held in the hand, will move about in a manner that strongly suggests the motions of the larva of certain insects.

There is no ambition nobler than that of the hardworking farmer. He toils early and late to secure for himself and his family that most lasting of fortunes, an allotment of land, clear of indebtedness. No other fortune is so secure and permanent. There are in England families of small farmers, living in assured comfort and contentment, upon the lands acquired by their forefathers 500 years ago.
 The achievement of the farmer's ambition depends a great deal upon the good health of himself and his family. If they suffer from bilious attacks and indigestion and do not promptly resort to the right remedy, almost any known sickness may be the result. Dr. Pierce's Golden Medical Discovery is a speedy cure for biliousness, indigestion and the evils that follow them. It makes the liver active, the digestion perfect, the appetite keen and the blood pure, and builds healthy flesh and muscle. An honest druggist won't urge upon you a substitute.

I send you my most sincere thanks for the benefit I have received from your medicine," writes Edward D. O'Neill, Esq., No. 24 West St., Cleveland, Ohio. "I hope you will publish the same as it may benefit some other sufferer who is troubled in a like manner. Was laid up with lumbago or sciatic rheumatism. I could only walk with help of two sticks for several weeks. I tried several remedies and did not get any relief. So I tried Dr. Pierce's Golden Medical Discovery. After using two bottles of it I was all right."

Dr. Pierce's Common Sense Medical Adviser teaches you all about the best treatment of diseases. It contains 1,000 pages and 300 illustrations. It used to cost \$1.50; now it's FREE. For paper-covered and one-cent stamps, to cover postage and mailing; cloth-covered, 50 stamps. Address, Dr. R. V. Pierce, Buffalo, N. Y.

FOOD IN THE ARCTIC.

Birds Have No Difficulty Finding It In the Snow.
 The number of birds that go to the arctic regions to breed is "vast beyond conception." They go not by thousands, but by millions, to rear their young on the tundra. The cause which attracts them is because nowhere in the world does nature provide at the same time and in the same place "such a lavish prodigality of food." That the barren swamps of the tundra should yield a food supply so great as to tempt birds to make journeys of thousands of miles to rear their young in a land of plenty, only to be found beyond the arctic circle, seems incredible. The vegetation consists of cranberry, cloudberry and crowberry bushes. Forced by the perpetual sunshine of the arctic summer these bear enormous crops of fruit. But the crop is not ripe until the middle and end of the arctic summer, and if the fruit eating birds had to wait until it was ripe they would starve, for they arrive on the very day of the melting of the snow. But each year the snow descends on its immense crop of ripe fruit before the birds have time to gather it. It is then preserved beneath the snow, perfectly fresh and pure, and the melting of the snow discloses the bushes with the unconsumed last year's crop hanging on them or lying, ready to be eaten, on the ground. The frozen meal stretches across the breadth of Asia. It never decays and is accessible the moment the snow melts. Ages have taught the birds that they have only to fly to the arctic circle to find such a store of "crystallized foods" as will last them till the bushes are once more forced into bearing by the perpetual sunlight. The same heat which frees the fruit brings into being the most prolific insect life in the world. The mosquito swarms on the tundra. No European can live there without a veil after the snow melts. The gun barrels are black with them, and the cloud often obscures the sight. Thus the insect eating birds have only to open their mouths to fill them with mosquitoes, and the presence of swarms of tender warblers, of cliff chaffs, pipits and wagtails in this arctic region is accounted for.—New York Evangelist.

WANT TO KEEP YOUR NEURALGIA?

Of course you don't; so you should take Scott's Emulsion. It is a fact this remedy cures it; and it cures nervousness, nerve debility and insomnia.

A PRIVATE DETECTIVE

After a Government Official
 We are in the Dairy Supply business to-day, notwithstanding the unfair competition of an official whose travelling expenses are paid out of the public funds. We pay our own and will compete with any of the Quebec houses thus represented, for quality of workmanship in cheese vats, cream vats, either single or duplex, portable or stationary, tempering or receiving vats, and all other Dairy Supplies in stock or to order at short notice.
 We have on hand Alpha Separators which return more money to the patrons than any other.
 Separator oil that will insure safer running at extreme speed than any other on the market.
 Butter Boxes for storing and shipping butter in.
 Dairy plants that will run without an expert engineer on hand.
 Boilers that will save fuel over any other that has been imported so far. Engines that do not require to be driven at extreme speed to obtain enough power. All work warranted for one year.
 Call at our up town store in the Temple, Grafton Street town.
