—THE MUSICAL EVENT of the season: Sacred Cantata and other selections in the Presbyterian Church, Summerside, Thursday evening, May 11th.

—PRESBYTERIAN CHURCH Thursday evening, May 11th at 8 o'clock, rendition of Maunders Sacred Cantata and other selections by the choir assisted by Charlotte town talent a rare musical treat. Silver collection at the door.

—SHIPPING EXTENDED—Mr. W. G. Schurman has been advised that the Clarke Steamships Ltd., of Quebec have decided to extend the service to Summerside and Charlottetown making intermediate calls along the Gaspe coast. The first trip will start from Montreal on May 16th with the steamship Gaspesia, and arriving here about the 20 or 21. This steamer is about 215 feet in length and carries 1000 tons of freight and will accommodate about fifty first class passengers. For further particulars regarding freight and passenger rates applications should be made to Mr. Schurman. Children generally will be greatly pleased to learn of the establishment of this steamer service here.

—SUMMERSIDE DRAMATISTS at Kensington—A troupe of dramatic performers presented the comedy drama "Peter Pipers Troubles" to an audience in the Strand theatre at Kensington on Wednesday evening, commensurate with the capacity of the theatre. The commendable efforts of this aggregation of efficient performers were duly appreciated by the large number of theatre patrons of which Kensington can justly boast. The bill for the evening's performance showed the following cast:—Peter Piper, A lawyer clerk and a victim of circumstances; Gerald Mulligan, Selwyn Alby A poor artist with great expectations; Wilfred Kelly, Jennale Bundy, a regular Juan with deep designs. Alf Koughan; Daniel Gruppins, looking out for No. 1; J. L. McCullough; Adolphe Gudgeon, Quite English you know, J. J. McNally; Doris Webster, A music teacher; Gertrude Cameron; Winifred Barlington, a dashing widow in search of a husband; Gertrude Cameron Betsy Belinar; an American girl; K. Cameron; Specialties; Pianist, Phemia Gallant; Violin; H. Noonan; and G. Houghton. The event realized all expectations which is saying much for the critical audience that followed the dramatic performance throughout the unfolding of the plot. Generous applause was furnished where the plot showed skilful and effective creation as well as adequate rendition.

—KILLED HIS SWEETHEART—

Irvine Benker, 21 year old farmer of Northwood, shot and killed his sweetheart, Miss Rebecca Nelson, country school teacher as she stood in the door of her schoolhouse four miles west of Manley because he said she had jilted him after their wedding date had been set. Pupils scrambled pell-mell through the windows. Benker declared he had been drinking "moonshine whiskey".

—HALF HOLIDAY FOR DOCTORS

The doctors of Hamilton have announced that starting this week they will take a half holiday on Wednesday and will not be in their offices to receive patients.

DUTCH FOOD FOR RUSSIA

The Swedish Red Cross contingent operating in Samara, Russia has been requested to distribute the large Dutch food consignment recently shipped to Russia and calculated to feed 40,000 persons for six months. The Swedish delegation has agreed to co-operate with Holland in the work.

Desirable Property for Sale in Summerside

The residence of the late Thomas E. Ramsay on Popular Avenue, Summerside, is for sale. Apply on the premises to Mrs. Ramsay.

If you have never visited our store, give us one trial and be convinced. "Remember The Dates May 8—13th" **SHARBELL'S** The Store of Quality and Service Portage, P. E. I.

Edison is Outdone By Questionnaire Of Princeton Don

Professor Dana Carlton Monroe, head of the Department of Politics and History at Princeton, has invented a freshman brainmeter which bears some resemblance to the famous Edison questionnaire.

Dr. Monroe's test, presented to freshmen as their mid-year examination, caused more than one-half of them to fail. Even members of the faculty were quoted as saying that the Monroe questionnaire was "over their heads." The questions were in the fields of astronomy, law, physics, history, pre-history, economic geography, political economy, theology, archaeology and other sciences that some of the freshmen never heard of.

Dr. Monroe said that it was an experiment and that it would have to be in use for some year before he could appraise its value. The new mental yardstick was as follows: Define the following terms: Solstice, writ of habeas corpus, perthe lion, neap tides, exogamy, agent rotation of crops, common law, common carrier, guild merchant, law merchants, climatic cycle, usury, demesne land, Black England, artificial boundary, bailment, villain, crossin.

Next One A Medley Name and locate the following: A British possession in Central America, a seaport of India, an American state having an emerged coast an oil field in Asia, the principal seaport of the Argentine Republic, a city in Persia, the principal nitrate deposit in the world, an American state which is at present one of the chief sources of copper, a lake in Siberia.

Who were the following men: Sir Thomas Moore, Blackstone? A polar explorer observes the sun 73 degrees 38 north of his zenith at local noon on December 22. His chronometer registers 2 a. m. What is his latitude? What is his longitude? In what continent is he? If he were to remain at that point until June 21, where would he observe the sun at local noon?

And the Lord said unto Moses, Let the priests also which come near to the Lord sanctify themselves lest the Lord break forth upon them; but thou shalt come up (to Mount Sinai), thou and Aaron. Ex. 19:24. What does this verse illustrate in regard to early Hebrew ideas of man?

A president of a corporation, \$100,000 worth of stock in that corporation. The corporation, honestly but inefficiently conducted, becomes bankrupt, with a total liability of \$500,000 in bonds held by B. Can B. recover the value of his bonds? Can A. be made liable for the reimbursement of B? Give reasons for your answer.

A LEGAL POSER A. in his jewellery store, in the presence of two of his clerks, said to B: "I will repair your watch free of charge." He afterwards refused to do so. Will the courts grant B any remedy? If so, will this remedy be damages or specific performance? Justify your answer by reference to legal principles.

Explain why desert peoples are usually nomadic.

Explain the geographic causes which contributed to make Great Britain the greatest colonial power in Europe.

Explain the difference between civil and political liberty, giving examples of each.

Explain how the rise of the political state resulted in the development of private property in land.

If you were asked to select a site for a great city in a hitherto undiscovered and uninhabited continent in the temperate zone, what factors would influence you in making your selection? How would each of these factors promote the growth and prosperity of the future city?

The next question consisted of tables indicating the average monthly temperatures in degrees Fahrenheit and the average monthly rainfall in inches of four cities, and presented the following points: Explain the reasons for the amount and seasonal distribution of the rainfall of each of these cities.

What was the Industrial Revolution? Describe five of its most important results.

"I had chartered a lugger for a

crise in the Aratara Sea," he said, "and I was asked to drop a bag of rice on the island—whose name I shall not divulge—for this old hermit."

"I learned on the way from those who had already seen him that he was shipwrecked 30 years ago and with 15 other men reached the island in open boats. They lived on the island for three years before they were sighted by a passing ship that observed their signals and put in to them.

"Of the 16, only 5 were then alive and only 4 were taken away—for the fifth, the old man living there now, refused to leave. He told the rescuers that during the three years he had spent with the other men on the island he had seen such horrible things that he wished never to live among his kind again.

"When I saw him he looked an old and hairy hermit. He was dressed simply in a singlet and a pair of trousers which had been given to him by travellers who had previously called at the island. He was very glad to get the bag of rice I took him, but he received it surlily and in silence. All his looks seemed to say: "What the duce do you want here?"

"During the thirty years he has been on the island," added Mr. Maugham, "the old man has lived on chickens—which, it seems, he introduced to the island from the ship in which he was wrecked—their eggs, fish, and the fruit of coco-nut trees.

"During the war he was left alone for five years, for no ships passed his way, and he was reduced to living entirely on what the island could produce."

TO MAKE NIGHT FLYING SAFE A series of new and ingenious illuminated ground signals, which will make night flying as safe as it is during the day, are to be installed along the Continental airway before the spring by the British Air Ministry.

The provision of these facilities is the outcome of many years of experimental work in aerial illumination.

The new apparatus, the first one of which is to be installed midway between the Croydon Air Station and Lympne, where the air express set out over the English Channel, has been designed to indicate to pilots on night services the strength of the ground wind. Thus chances of disaster in a forced landing, through a miscalculation of this important factor, are eliminated.

In designing these illuminated direction lights, an eye has been kept on the matter of economy of maintenance. This has been obtained for the whole apparatus is self-contained and will require no attention for periods of twelve months.

The principle involved is that which obtained in the landing "T" system which was used so successfully in day-flying during the war. A "T" of huge dimensions is placed horizontally on a platform, which, working in suitable ball-bearings is free to turn with each change in direction of the wind. The outlines of the "T" are clearly and distinctly indicated by means of specially adapted reflectors and lenses.

By an ingenious adaptation of the anemometer principle, different colored lamps will be illuminated to show the pilot the wind velocity should he find it necessary to land. A green light will mean that the surface wind is so slight that for flying purposes it may be ignored; winds of medium strength which must enter into the calculations of the pilot on landing will be interpreted by a white light, and the exhibition of a red light will mean that the wind velocity is so great that the utmost care must be exercised to avoid disaster in bringing an aeroplane to earth. The direction of the "T" will also show the direction of the wind.

SUICIDE IN AMHERST

AMHERST, N.S., May 6.—John Wildam Gould, aged 56 years, who lived on the Highlands here, hanged himself yesterday afternoon in the upstairs hallway of his house by placing a shovel handle across the trap-door which leads to the attic, tying a heavy rope to the handle around his neck and kicking away a chair from under his feet, and allowing the body to hang. He was discovered by a 10-year-old boy, who tried to get into the house, but finding the door locked, climbed up on the shed and looked in the window, seeing the father's body hanging. The child notified the neighbors nearby and the door was forced open.

A POSER FOR M. COUE

In the course of a lecture which M. Coue the advocate of the theory of auto suggestion, was giving in London recently a blinded officer seated in the front row of the audience rose and exclaimed: "I am blind, make me able to see. I have tried to make myself believe that I can see but I can't. Now you try." M. Coue endeavored to explain that there were limitations to auto suggestion, but the blind officer was not to be appeased. He insisted that his eyes were still there and that therefore M. Coue ought to be able to work the miracle and he sat down obviously sceptical of this new faith.

PRESENTATION TO CAPTAIN

Before the C P S Empress of Scotland cleared from Quebec for Liverpool, Capt. Gilles was presented with a gold headed umbrella by the Quebec harbor commission as the Empress of Scotland was the first passenger vessel to reach port this season.

C.C.M. Bicycle Prices Reduced

"HURRAH, fellows: You don't need to hold off buying your new bicycle another day. "C.C.M. Bicycle prices have been fixed for this season and they are right down to bed rock.

The 1922 C.C.M. Standard Adult Models are: **\$15 Below "Peak" Prices \$10 Less than Last Summer**

"This certainly gives us Canadian riders a generous reduction and a square deal. I'm told that bicycles of equal quality cost more in the United States than C.C.M. Bicycles do in Canada.

"Remember, C.C.M. prices didn't advance anywhere nearly so much as most products, so they hadn't as far to come down.

"And C.C.M. Bicycles are even better now than before the war.

"You know, the best steels and materials were reserved for war purposes, and the best mechanics put on war orders. Now, the best steels and materials are again obtainable, including English Seamless Tubing for C.C.M. Frames. The best mechanics are on the job again with their skill improved as a result of the accuracy demanded in their delicate time fuse work.

A Nifty New Pedal

"And, say fellows, they've put a new pedal—called the Gibson Pedal—on the 1922 Men's Models, and it's a bird!

C.C.M. Bicycles

RED BIRD — MASSEY — PERFECT CLEVELAND — COLUMBIA

"The Bicycles with the C.C.M. Triplex Hanger"

Canada Cycle & Motor Company, Limited
Montreal Toronto WESTON, ONT. Winnipeg Vancouver

Special Features (continued)

"The Gibson pedal has an Aluminum frame that looks like silver and won't rust. Wonderfully light, yet very strong. Some class to it!

"The easy-running Triplex Hanger and the sure-acting New Hercules Brake are on the new models, too. No extra charge, either.

"But I almost forgot to tell you the new low prices this year. They are only: **\$50 and \$60** For Standard Adult Models According to Equipment

"This means that a C.C.M. costs only about \$5 or \$6 a year, as a C.C.M. Bicycle easily gives 10 years of service. Many have given 15 years and longer."
