"ENGINEERS DO IT WITH PRECISION"

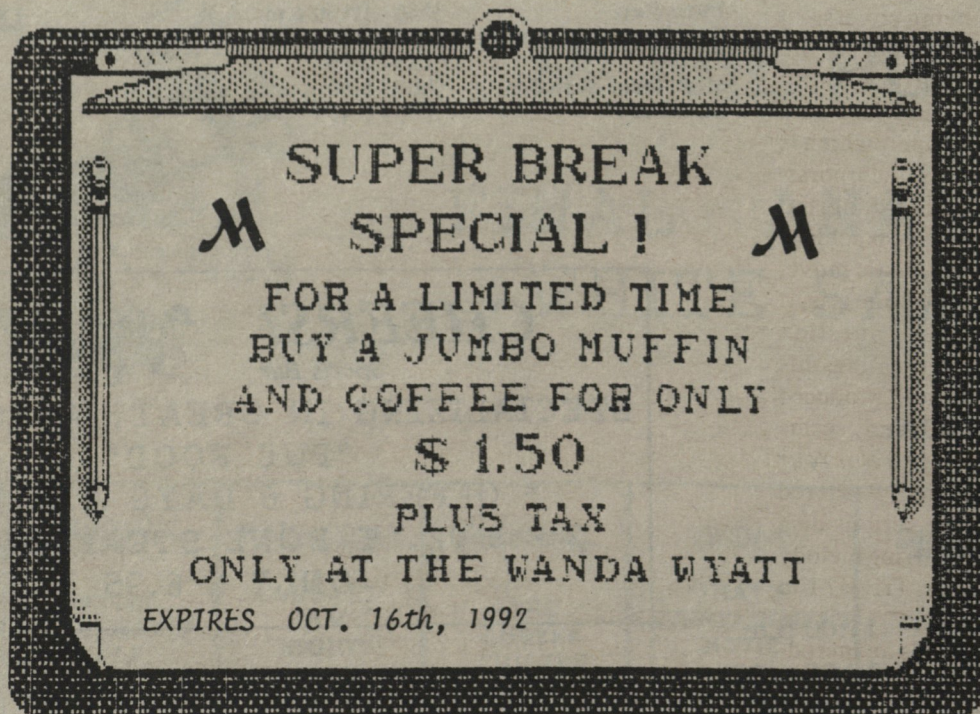

ENGINEERING SOCIETY NEWS

"Engineering Society News" We're back! The engineers wasted no time getting things on the go! Guest Speaker On the 14th a guest speaker came to talk to the Engineering Society. John R. MacLean, a former UPEI Engineering student, spoke of his work with Span Aero on the space station "Freedom" and the Canadian involvement in the project. Softball On Friday the 18th the engineers congregated outside the Duffy building for our annual fall BBQ. After a short time of indulging in processed meat by-products, the Engineering Society hit the field for a SERIOUS game of softball... NOT! The game was highlighted with spectacular defensive plays in a style not unlike the Bad News Bears or the Blue Jays. The Engineers beat the rest of the engineers in a pitchers duel that came down to the wire.

Final score: 47-34. Once again the BBQ was lit up for some culinary delights and the victory party began at the Panther Lounge. The celebration went into extra innings and finally ended in the wee hours of Saturday morning. Golf On Saturday the 26th the Engineering Society travelled to Clyde River for a fun-filled round of golf. At the end of the day the following prizes were given:

Low Score (18 holes) -- Mike Hall -- 81 High Score (18 holes) -- Ronnie Myers -- 144 Long Drive -- Tony Gallant Close to Pin (6th hole) -- Mark MacDonald Close to Pin (8th hole) -- Don MacEwan Late Score (9 holes) -- Jason Coady

Engineering quote of the week--Don't put off till tomorrow what you can do by staying up all night.
