### Ploughing Rates Are Announced

The Minister of Highways, Hon. George J. Ferguson, has announced the rates for ploughing snow from farm lanes. The practice of paying for this service was tried out last winter in one area and proved successful.

Effective December 1, 1966, the removal of snow from private lanes will be done by the Department of Highways at the request of the owner at the following prices: (a) Lanes 0 to 1 chain in length, \$1.00; (b) Lanes from 1 chain to 2 chains in length, \$2.00; (c) Lanes over 2 chains in length \$3.00.

Where the equipment is owned by the Department of Highways, payment is to be made to the operator who will furnish a Department of Highways receipt. Where the equipment is owned by a contractor, payment is to be made to the contractor who will furnish a contractor's receipt. All transactions are to be on a cash basis.

A lane, for the purposes of the order, is a travelled way from house to road, and does not include barn yards, roads through fields, or any area where, in the opinion of the operator, it is unsafe to work his equipment.

Ploughing for an emergency, provided it is authorized by the Department of Highways Dispatcher, will be paid for by the department. Ploughing for sick calls, provided they are requested by the attending physician, will be paid for by the department.

### Fish Landings Up This Year

Total fish landings reported in the Maritime Provinces during October, 1966, amounted to 139.9 million pounds, valued at 5.3 million dollars. Included in these totals were 56.1 million pounds of groundfish valued at 2.7 million dollars, 72.3 million pounds of pelagic and estuarial fish valued at 1.2 million dollars and 4.5 million pounds of shellfish valued at 1.4 million dollars.

The total October landings were much above the total reported during any previous October. During the past three years (1963-65) October landings averaged 73.8 million pounds, valued at 3.8 million dollars. Groundfish landings during the month were 16.3 million pounds and 1.0 million dollars above the three year October average. Pelagic landings exceeded the average for the month during the three previous years by 49% million pounds and 419 thousand dollars, while shellfish landings were shown above average by 221 thousand pounds and 65 thousand dollars.

LARGER THAN AVERAGE The larger than average groundfish catch was reflected in larger than normal catches of cod, haddock and redfish and higher than usual trawler landings. The large pelagic landings were almost entirely accounted for by mackerel landings which were above average. In the molluscs and crustaceans category the lobster catch was slightly below average while the month's scallop landings were slightly above average.

Cumulative fish landings for the first ten months of 1966 amounted to 948.9 million pounds valued at \$3.4 million dollars. The figures for the similar period of 1965 were 828.7 million pounds valued at 54.0 million dollars and for 1964 708.2 million pounds with a landed value of 47.8 million dollars. The 1966 landings for the first ten months were above the average for the first ten months of the years 1963-65 by 228 million pounds and 5.5 million dollars.
