

Horoscopes by Zorba

ARIES (March 21-April 19)

Where did January go? This is the question you are asking yourself. It can be answered when you look back on assignments and tests you have done well on. You look forward to the weeks ahead. You will get an unexpected phone call from an old friend. Enjoy the conversation.

TAURUS (April 20-May 20)

Deadlines are on your mind this week. You ask for extensions on different assignments, you will be suprised at the answers you get. You will help out someone in need and feel really good about your kindness.

GEMINI (May 21-June 22)

Your week will be full of good fortune. You will find a penny on your way to class, this is when your good luck will begin. If you don't already have that special someone for Valentine's Day, this week might be the week you find one.

CANCER (June 23-July 22)

Set some goals this week. Remember there is only three months left of university. Start questioning your plans for next year and how you will go about with these plans. Set some goals for the summer and stick to achieving you goals.

LEO (July 23-Aug 22)

It will be a very mysterious week for you. You meet a good looking stranger whom you are attracted to and you feel is somewhat attracted to you. Take it slow. Later in the week you will be wondering about Valentine's Day and as you are thinking about this you are also thinking about the stranger.

VIRGO (Aug 23-Sept 23)

Spring break is on the way and you can't wait. This is basically what is on your mind this week. You can't wait to party with friends back home. You also are satisfied with the way things turned out for you last week. You are looking forward to the good times ahead.

LIBRA (Sept 24-Oct 22)

All I have to say is what a week. The beginning of the week will start out slowly and you will do everything normal but when the weekend comes you're going to go wild. You will have one of the best weekends that you have had in along time. Even though it will be a fun weekend, there is something or someone missing.

SCORPIO (Oct 23-Nov 21)

Wow is the word on your mind when you get back your assignments and papers. This week holds a bag of mixed events for you. You spend a lot of time with all the special people in your life. On the weekend you will have a blast when you celebrate a special event.

SAGITTARIUS (Nov 22-Dec 21)

You will be told something this week that you may find suprising but you did suspect something was going on. You will have mixed feelings about this suprise. You tell a problem to a good friend who helps you sort it out.

CAPRICORN (Dec 22-Jan 19)

This week you will experience something strange. It isn't bad, but it is different. Your friends are involved in this new experience which they enjoy just as much as you. You also begin planning for the near future. Have fun planning it.

AQUARIUS (Jan 20-Feb 19)

Happy birthday to all of you. This week holds a great deal of confusion for you. You are confused about so many things -- your relationships, marks, and even family. But don't worry about it to much because someone will tell you something that will clear your mind.

PISCES (Feb 19-March 20)

This is a very busy and fun week for you. It begins when you get a lot of assignments all at once which scares you, but you manage to get all of them done. Then when the weekend comes you are ready to go out and have the time of your life.

Campus Comment
