

Canadian Planning Reunion With U.S. Pilots From China

OTTAWA (CP)—Squad Leader Adny MacKenzie, DFC, of Montreal is planning a reunion with the four United States jet pilots who were imprisoned with him in Communist China.

He has corresponded regularly with the four Americans since they were released by the Chinese in May but the problem of leave so far has interfered with reunion plans.

Like MacKenzie, 35-year-old fighter ace who was held captive by the Communists for two years, the U.S. fliers signed false confessions that they had violated the Chinese border while flying over North Korea and had been ordered to do so.

MacKenzie, held in solitary confinement for 16 months, won the admiration of Canadian officials for his long hold-out against mental torture by the Communists. He was returned to full duty by the RCAF and now is working at air

defence command headquarters at St. Hubert, Que.

FULL DUTY

The United States, which has court-martialed several former prisoners of the Chinese, returned MacKenzie's four companions to full duty with the U.S. Air Force.

The four, recently based at Montgomery, Ala., are Capt. Harold E. Fischer of Swea City, Iowa; Lieut. Lyle W. Cameron of Lincoln, Neb.; Lieut. Roland W. Parks of Omaha; and Lt. Col. Edwin L. Heller of Wynnewood, Pa.

Fischer also confessed falsely to germ-warfare charges.

MacKenzie refused to bow to Communist pressure and confess to trumped-up germ-warfare accusations.

He was shot down Dec. 5, 1952, and released at the Hong Kong border Dec. 5, 1954. Soon after his return to Canada, he visited

the families of his four colleagues in the U.S.

MacKenzie is the only known Canadian the Communists tried to brainwash. Thirty-two Canadian soldiers were returned from captivity after the Korean war but none was subjected to the treatment undergone by MacKenzie.

Strange But True

By F. H. MacArthur

In Japan, many persons keep pet catfish because for some unknown reason this usually sluggish fish swims excitedly about only when an earthquake is imminent.

As early as 150 B.C. Greek soldiers carried field rations in tablet forms. These pills were made from sesame seeds, opium poppy, honey and saffron. Each Greek soldier got two of these potent pills every day, one for breakfast and the other for supper.

While it is true that the whistle of the Queen Mary can be heard for 10 miles, the noise does not disturb the passengers because the sound is pitched very low and rises in pitch only after it leaves the vessel.

As an experiment, Dr. Pittsburgh Marshall sat in an electric chair with 100,000 volts running through his body. All that happened was that the doctor's hair stood on end.

A fresh wind is a wind blowing from a fresh wind the weather bureau calls strong, gale, whole gale or hurricane.

While he was crossing the Atlantic Ocean Samuel Morse locked himself up in his stateroom and built a model telegraph gadget which proved that his idea of messages on electrically charged wire was feasible.

The last two weeks prior to a college student's graduation should be devoted exclusively to teaching him that he doesn't know everything.

The way things are shaping up now it would seem that the saturation point in manufacturing automobiles may not be reached until there is no parking space anywhere for additional cars.

He who puts off until tomorrow what he can do today eventually will get out of doing at least one day's work.

"If a person will eat slowly he will eat considerably less," asserts a prominent physician. That is particularly true if he eats at a boarding house.

PHOTO EXHIBITION POPULAR

Above is shown the exhibition of photographs by members of the Camera Club, now at the Travel Bureau until Saturday, August 6. There are about 80 pictures in all, of which first prize went to Mr. Ronald Taylor and second prize to Mr. B. H. Turner. The Camera Club has been functioning for four years, but this is only the second

Revisits United Kingdom On Nuffield Scholarship

(Excerpts from letters received from flying officer Archie J. Johnston, of Burlington P. E. I., now travelling in the United Kingdom on a Nuffield agricultural scholarship; continued from a previous issue.)

LOUGHBOROUGH, England — In England and perhaps in some other parts of the world the words grass silage are synonymous with the name Rex Paterson, a pioneer in the field of grass silage and the inventor of the Paterson Buckrake. Mr. Paterson is himself a modest man but quiet spoken though he is, when he gets an idea he never rests until he has tried it out and if it seems practicable he sweats it out until perfect. He had delayed his daily inspection of his farms until our arrival in London in order that we might get over as much of his 7000 acres as possible that evening and ask any question which we liked.

Having spent some of the earlier years of his life in Canada he has a first hand knowledge of our problems. Only last winter he was back again on a speaking tour of some of the Western provinces, but his knowledge of farming is not limited to Canada and Britain only as he has visited Australia and New Zealand as well, where his buckrake is being used with excellent results. He did express some concern because the sale of his buckrakes has slowed down in Nova Scotia and says there has been some difficulty in getting an agent to sell them there.

In addition to the seven thousand acres in Hampshire he has three more farms in Wales which total approximately nine hundred acres. He is just getting these farms going well now, a process which he seems to enjoy, as several of the farms on the Hampshire Downs which he now farms, were once derelict and grown up in thorns and trees.

At the present he has about 1600 milch cattle and 1000 young stock made up of Jersey, Freisian and Ayrshires, all or nearly all grade cattle. His aim is high output per acre but not necessarily per cow. He has one 60 cow herd which produced 54,000 gallons of milk last year, but his average 60 cow herd is giving around 36,000 gallons. He feeds little or no concentrates and with his program he

something to do with the slowing down of Paterson Buckrake sales in Canada, as they will only carry about 1300 lbs. maximum weight at any one time. Add to this the time and gasoline consumed going backward and forward between pit and field and it is a sizable figure. Under the Paterson system of having the pit or silo close to the fields growing the crops, they are very efficient and perhaps hard to beat.

There is little waste time or effort on the Paterson farms. The Hampshire farms are broken down into seven groups and these groups

of making silage are rather upsetting to what was once considered the proper methods, but with the results he is obtaining there is little doubt as to the success of his practices. We saw three types of silo in use on our visit; the pit, with which most of us are familiar; the wedge, which is a surface silo with sloping ends and two almost perpendicular sides and the mushroom, which varies in diameter to suit the amount of material available. Of the three the mushroom room is the newest and although some of his men don't care for the building of them, he thinks offers the greatest possibilities yet.

(To be continued)

These applications of chemical fertilizer under normal conditions give a thick, lush growth. In fact going along the road it is not difficult to pick out his farms as there seems to be few others in the area which are indicative of such prolific growth and care. Unless conditions dictate otherwise, he follows a five year rotation; three grass, one kale and one barley. Nearly all of the barley is sold, very little being kept for feed purposes.

The cattle are never allowed to wander over the fields on which there is to be a grass crop the next season, as is the case in a great many farms we see. Instead they are fed in the fields which are to be plowed for the crop in the spring, thus are no harm to the land or to the oncoming silage crops. Having arranged his silos throughout the farms in such a way that they will be most convenient and as the cattle are not confined to shelters for long periods during the winter, he can make efficient use of his buckrake, no silo being at any great distance from the fields from which it is to be filled.

The fact that cattle must be housed in Nova Scotia in winter, thus necessitating silos at close range to the barns, may have

Blame Dragonfly For Accident

KITCHENER (CP)—A dragonfly caused a traffic accident near here Monday.

The insect sent the car of Robert F. Derry of Halifax out of control when it flew through the no-draft window into his face.

Police said the car crashed into a hydro pole, causing \$200 damage to the car, and \$75 to the pole. No one was hurt.

into 150 acres, for administration and management purposes. This works out to three men to every two hundred acres, including office staff and mechanics. He estimates that unless there is a long haul involved, two tractor-mounted buck rakes should keep one tractor, towing a traction powered mower busy. At present he prefers this type of mower, but may try out one or two new idea mowers in the near future, because of their quick and easy attachment to a tractor. Once or twice in the two days we spent with Mr. Paterson, touring the farms, we saw three buckrakes in a field, where the haul was of an above average length.

Some of the Paterson methods, of making silage are rather upsetting to what was once considered the proper methods, but with the results he is obtaining there is little doubt as to the success of his practices. We saw three types of silo in use on our visit; the pit, with which most of us are familiar; the wedge, which is a surface silo with sloping ends and two almost perpendicular sides and the mushroom, which varies in diameter to suit the amount of material available. Of the three the mushroom room is the newest and although some of his men don't care for the building of them, he thinks offers the greatest possibilities yet.

Easter Guardian

Auction sale on the premises of Mrs. Jennie MacKenzie on Wednesday August 3 at 2 o'clock Standard Time. G.H. Nelson, auctioneer.

WILL BE buying timothy and clover seed as usual, cleaned or uncleaned. Highest market prices. Fraser and Anear, Feed Service, Montague.

PLEASANT TRIP — Mr. and Mrs. Bruce MacPhee, their son Malcolm, and Mr. Charles Mellich, returned to Montague yesterday following a pleasant trip through the eastern part of Nova Scotia. They visited Antigonish, passed over the new causeway, and visited Sydney and other points of interest in Cape Breton.

LEAVING FOR HOME — Mrs. Frank Bagley and daughter Kate, and son Frank, are leaving today for their home in San Francisco, California, after spending their vacation at Union Road, guests of Mrs. Bagley's parents, Mr. and Mrs. A. J. MacPherson. Shortly after their return to California Mrs. Bagley and family will join Mr. Bagley in Oklahoma where they will spend the next two years. Mrs. Bagley is the former Miss Adah Nicholson of Union Road.

Personals

Miss Muriel Johnstone of New York is visiting her mother Mrs. W. A. Johnstone, Montague.

Mr. J. M. MacPherson, Watertown, Mass., is at present at the home of his sister, Mrs. A. N. MacDonald, Heatherdale.

Miss Laurel MacDonald, Somerville, Mass., is the guest of her aunt and uncle, Mr. and Mrs. Herb MacKenzie, Valleyfield West.

The many friends of Mrs. Maurice Daley, St. Mary's Road, are sorry to hear she is ill in the City Hospital.

Miss Ellen K. Munn, Little Sands, left yesterday morning on a two weeks' trip to visit her two aunts, Mrs. Frank Flynn, Natick, and Mrs. Perry C. Wilson, Cambridge, Mass.

Mr. and Mrs. Jerome Hughes, St. Mary's Road, had as their guests Thursday evening Mr. and Mrs. Adam Jamieson, Mr. Daniel Jamieson and Mr. Leo Gorman of U.S.A., who are vacationing on the Island.

Mr. and Mrs. John Matheson and family, Sarnia, Ont., are spending a short vacation visiting relatives and friends in Belle River, Commercial Cross and other Kings County points. Mr. Matheson is an alderman on the Sarnia City Council.

Mrs. John C. Robbins and two little sons, Lloyd and David, left for their home in Toronto on Sunday, July 24th after spending two weeks' holiday with Mrs. Robbins' mother in Needham, Mass. They made the trip both ways by plane. They visited with friends in Quincy, Concord and Cambridge. Mrs. Robbins was before her marriage Mildred Martin of Kinross, P. E. I.

Robert Winston Martin of Kinross and Vernon is spending part of his summer holidays with his mother, Mrs. Hugh Martin in Needham, Mass. Robert motored from Prince Edward Island with Mr. and Mrs. Angus L. Bruce of Cambridge on July 13th and intends to return about the middle of August. He will spend a week with his uncle and aunt, Mr. and Mrs. Robert MacPhee in Concord, Mass.

MAYFAIR THEATRE

MURRAY RIVER — MONDAY - TUESDAY - WEDNESDAY

"Davey Crockett"

KING OF THE WILD FRONTIER

Starring — FESS PARKER as DAVEY CROCKETT

Also — "ARIZONA SHEEP DOG" in Technicolor

SHOW TIME — 8:30 p.m. MATINEE — Tuesday 2 p.m.

SCOTCH TARTAN CUPS

Davidson, Cameron, Leuchan, Gordon, MacDonald, MacLeod, MacKenzie, MacPherson, MacGregor, MacDuff, Robertson, Black Watch, Royal Stewart, \$1.75 or \$2.00 mailed. Boehner's Jewellers, Montague, P. E. I.

LEAVE FOR YUKON — Mrs. B. J. Hatcher and Brent left on Friday for Whitehorse where they will join Cpl. Hatcher who has been transferred from St. John's, Nfld., to Whitehorse. Mrs. Hatcher has been spending some time with her parents in Lower Montague.

VISITING PROVINCE — Mr. and Mrs. Adam Jamieson of Medford, Mass., accompanied by Mr. Jamieson's brother, Mr. Daniel Jamieson of Maine, and Mr. Leo Gorman of Boston, Mass., are spending two weeks visiting friends and relatives on the Island. They are guests at the home of Mr. Jamieson's sister, Mrs. Victor McGuigan, and their son Lawrence Jamieson of St. Mary's Road.

SOURIS WEST W.I.

The July meeting of the Souris West W.I. was held on the 27th at the home of Mrs. A. J. MacDonald. Eleven members answered Roll Call by giving a nickel. One member paid her fee and donated 50 cents towards the lottery.

The Sec'y read the minutes which were approved and signed. It was decided to have another lottery on a box of groceries to be drawn for at the August meeting.

It was decided to scrub the school before it opens and the secretary was asked to purchase the articles which are needed for the school.

Mrs. Bert Mullally was appointed to see about the free dental clinic in Souris.

The next meeting is to be held at the home of Mrs. John Kichham and Roll Call is to be answered the same way.

There being no more business the meeting adjourned.

A delicious lunch was served by the hostess assisted by Mrs. Frank Deagle. A vote of thanks was extended to the hostess for the use of her home.

98 Above In Toronto Monday

TORONTO (CP)—It wasn't hot enough for fry eggs on the sidewalks of Toronto Monday—but the few hardy souls that strayed into downtown Toronto on the civic holiday weren't too sure of it.

The thermometer at the public weather office read 96 degrees at 3 p. m., the highest in the city this year. With the temperature still rising, the previous record for Aug. 1 of 94 set in 1933 was broken.

The picture had a bright side: no deaths due to the heat were reported by the coroner's office.

The average price of a farm-raised mink pelt today is about \$25.

NOTICE

Buying rough and sap-peeled wood daily at our Georgetown Yard. Truck supplied within 24 hours to anyone desiring wood hauled. Contact us at 17-14 Georgetown or 1-11 Covehead.

SOURIS HOSPITAL

Due to the alarming increase in the number of unpaid patient accounts it has become necessary to enforce a strict policy of advance payments. Effective immediately, all maternity cases, not covered by some type of Hospital Insurance, must make a deposit of \$35.00 before admission. There can be no exceptions to this rule. Your doctors are being advised accordingly, and the Matron has been instructed to strictly enforce the regulation.

Restaurateur In Libel Suit

NEW YORK (AP)—Restaurateur Tools Shor Monday filed in Supreme Court a \$1,000,000 libel suit against Sherman Billingsley, proprietor of the Stork Club.

Shor's complaint charged that remarks made about him by Billingsley on a television program held him up to public disgrace and injured his business.

The complaint said the statements "were intended to and did charge" that he was "insolvent and financially embarrassed, unable or unwilling to pay his just debts and obligations, unworthy of credit... and reckless or dishonest in his business dealings."

Shor said these statements were untrue and the defendants knew or should have known they were untrue.

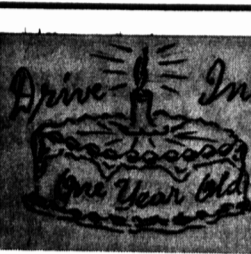

Also named defendants were

the American Broadcasting-Paramount Theatres Inc., Stork Restaurant Inc., and Mayfair Productions Inc. The broadcasting company telecast the show and mayfair produced it.
