

Simple Home Remedies.

Half a teaspoonful of common table salt dissolved in a little cold water and drunk will instantly relieve "heart burn" or dyspepsia. If taken every morning before breakfast, increasing the quantity gradually to a teaspoonful of salt and a tumbler of water, it will in a few days cure an ordinary case of dyspepsia, if at the same time due attention is paid to the diet. There is no better remedy than the above for constipation. As a gargle for sore throat it is equal to chlorate of potash, and is entirely safe. It may be swallowed as often as desired, and if a little is swallowed each time it will have a beneficial effect on the throat by cleansing it and allaying irritation. In doses of one to four teaspoonfuls in half a pint to a pint of tepid water it acts promptly as an emetic, and, in cases of poisoning, is always on hand. It is an excellent remedy for bites and stings of insects. It is a valuable astringent in hemorrhages particularly for bleeding after the extraction of teeth. It has both cleansing and healing properties, and is therefore a most excellent application for superficial ulcerations. Mustard is another valuable remedy. No family should be without it. Two or three teaspoonfuls of ground mustard stirred into a half pint of water acts as an emetic very promptly, and is milder and easier to take than salt and water. Equal parts of ground mustard and flour, or meal made into a paste with warm water, and spread on a thin piece of muslin, with another piece of muslin laid over it, forms the indispensable "mustard plaster." It is almost a specific for colic when applied for a few minutes over the pit of the stomach. For all internal pain and congestions there is no remedy of such general utility. It acts as a counter-irritant by drawing the blood to the surface; hence in severe cases of croup a small mustard plaster should be applied to the back of the child's neck. The same treatment will relieve almost any case of headache. A mustard plaster should be moved about over the spot to be acted upon, for if left in one place it is liable to blister. A mustard plaster acts as well when a considerable distance from the affected part. An excellent substitute for mustard plaster is what is known as "mustard leaves." They come a dozen in a box, and are about four or five inches long. They are perfectly dry and will keep for a long time. For use it is only necessary to dip one in a dish of water for a minute, then apply it. Common baking soda is the best of all remedies in cases of scalds and burns. It may be used at the surface of the burned place either dry or wet. It is the best application for eruptions caused by poison ivy and other poisonous plants, as also for bites and stings of insects. Owing to colds, over-fatigue, anxiety and various other causes, the urine is often scanty, highly colored, and more or less loaded with phosphates, which settle to the bottom of the vessel on cooling. As much soda as can be dipped up with a ten-cent piece, dissolved in half a glass of water, and drank every three hours, will soon remedy the trouble.

Consult With Your Wife.

There are many men who seem to consider their wives as capable of understanding nothing but what relates to dress or cooking, and they would smile at the folly of talking with them on any matter which relates to business. We are aware that there are women of whom it would be folly to make confidants in such things; women who are reckless and thoughtless enough to urge their husbands into all sorts of extravagance, that their pride and vanity may be gratified, regardless wholly of results, and would pettishly refuse to listen to any explanation of business affairs; yet we think even such would be far fewer if, from the first, husbands were accustomed to confide to them their plans and to seek their advice. If a wife be at all treated as not fit to know anything of her husband's affairs, if her questions receive only cold and half-scornful replies, it is not to be wondered at if she soon ceases to feel any interests or have any thoughts about them; and if, by-and-by, it should be found in a practical way that she does not seem to "know much of the value of money," or "how much it costs to get it," or even "where it comes from," the reticent husband need not wonder. The intuitions of a woman are better and readier than those of a man; her quick decisions without reasons are frequently far superior to a man's most careful deductions. And how often would a husband find almost all the bitterness taken out of his reverses did he bring his wife's powerful aid to help him through them.

There are just two things that is an impossibility to do on P. E. Island, and that is to stop people from drinking brandy, and to carry a piece of fine Machinery to Brown's that he cannot mend or make new, such as Sewing Machines, Guns, etc. Shop on the corner of Prince and Grafton Streets, Ch'town. dec6-tf.

MORRIS & IRELAND'S

NEW IMPROVED PATENT EIGHT-FLANGE FIRE-PROOF SAFE.

THE only Eight-Flange Safe in the world, and containing more improvements than ANY SAFE made, such as: 1st. THE PATENT INSIDE BOLT WORK, which is placing the bolt work with the whole of the filling (six inches) between it and the outside, that is, as far from the fire and thief as it can be. 2nd. THE PATENT HINGED CAP—the back plate of the door being on hinges, enabling the owner, by turning a thumbscrew, to have easy access to the lock and bolt-work. He can thus easily change the lock, clean, oil, and keep the bolt-work in good order. 3rd. IRON INSIDE LINING, stronger than wood, and which retains the moisture in the filling for an indefinite time. Wood is thicker and weaker, and after a few years absorbs the moisture and "requires filling over again." 4th. FOUR-WHEEL COMBINATION LOCKS, the simplest, strongest, most efficient and easiest to change of any in use. 5th. SOLID ANGLE IRON FRONTS, BACKS AND CORNERS, which prevents warping or injury to safe from falling, or falling walls or timbers. 6th. EIGHT FLANGES—the most important improvement ever made in fire-proof safes, providing eight laps, thus preventing the passage of heat, it having to pass over twelve inches, no injury arises from this source, as in other safes containing one, two or three flanges. THESE SAFES have stood the test of years, and the greatest fires on this continent, and have the CHAMPION RECORD in the Boston, Chicago and Haverhill Fires. We are selling these safes as low as any good safe, and are disposing of large numbers throughout the Dominion. BANK WORK AND VAULT DOORS are specialties of our firm.
