

# Issues On The System by Tony Carrol

## UNIVERSITY LIFE

Another university year is half over and many things in this place are all-ready beginning to urk me. In this article I plan to express my points of view on the way the university is being run.

But first let's look at the rest of the problem; the people that work in this university.

Not the professors but namely the administration. To help the students better understand these people, I will list the qualifications to get a job at U.P.E.I., in my point of view.

### QUALIFICATIONS

#### 1. Talk behind people's backs:

This ability is the number one qualification for a job at UPEI. You must be able to talk about a person behind his/her back and then when the person you abused comes along, be real nice to he/she.

#### 2. Having no education:

If you want good money working at this university, you must have no higher than a grade 11 education. This theory holds true, as the head of the Security Department cannot even write his own name, but maintains a high job at UPEI. I find this humorous as it not only holds true here but also for most of the people working in the Kelly Building.

#### 3. The Ability To Do Nothing And Make On You Are Doing Something:

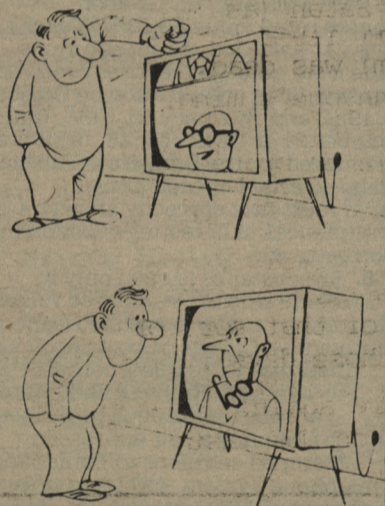

This theory is as true as they come. If the administration did away with every job that people nothing in then the university staff would be cut in half. As I know there are many people who make on they do something but I still have yet to figure out what.

The President himself shows how much he knows about running a university with the proposals he brought up a month ago. These proposals were so outrageous, they were funny. As for the Bald Head of the Maintenance

staff I have yet to figure out what he does. I worked under this man for two summers and I have realized he has done nothing yet that anyone of the employees of the garage cannot do.

The university could save a lot of money here. He makes on he does a lot by planting approximately \$40,000 worth of trees and takes credit for this. But actually, after talking to Island Nursery this summer, over half of the trees are dead before they are planted and the rest are mostly run over by cars, so why bother wasting the student's tuition on trees we do not even care for. This holds true for the security department as they put useless parking tickets on cars, to make on they are doing something, but nobody ever pays these tickets. Same holds true for the head residents. They have to cause a disturbance just to make on they are doing something. So they pick on someone who the rest of the staff dislike and this makes him/her look like a hero. Also I would like to

know where in the name of they got the head of student services. This guy is supposed to be there to help the students but, instead, he goes against them. This is funny having a person like this in such a job because only two people like this man, (he and his wife). So how can this man help the students? You tell me. Sure there are bursaries and such but we can get these forms without these people. I would like to say that the employment center and the councillors are extremely helpful to students and these people are definitely needed. This is just the first issue on the system at UPEI, and there is more revealing articles to come. So, keep reading in issues to come. I will be explaining even more about why UPEI is going on or is going to the dump.
