

The point is these guys go looking for things. If I wanted to go look for bad things to say about some men, I could write a book.

Please stop promoting hatred of Feminists and start using the paper in a more serious, mature manner. The money to print this paper comes out of our Student Union fees and wasting space to promote hatred of some people or groups is a waste of our money.

Dear Editor

I was sickened by the alleged violence done by those beefheads at Myrons. The victim was an Asthmatic. Choking an Asthmatic can be fatal, you beefheads. They could have opened their goddamned mouths and ask him to leave but no they had to put on a show. Chucking a person near the stairs is down right stupid, especially after the person is recovering from choking symptoms. Can't they see that he could fall down the stairs and hit his head in a fatal manner? I say that if these guys want to mess around with students, then students should not attend a place of gross misconduct, a place where beefhead attitudes are worse than most of the music they play. By the way I'd like to hammer one of those beefheads and hear me beefhead you would go down.

A concerned student

Dear Editor

In regards to the UPEI Intermurel Hockey League. The names of a couple of teams should be some what distressing. In particular the Blanchard Hall Chiefs and the Redmen. I am sure these names were chosen in good fun and absolutely no harm was meant, but to the native community in the Island and around the world these names may be taken for something more than just fun.

When using these names it is quite possible that natives maybe portrayed as savages. As members of a higher institute of learning (UPEI), we should take all steps necessary to exclude prejudice.

The UPEI Intermurel Hockey League should follow the precedent set by Charlottetown Rural who changed their team names to the Raiders instead of the Redmen. Maybe the Redmen could change their name to the Raiders also, or maybe the Sweathogs and the Blanchard Hall Chiefs to the Blanchard Hall Bullies.

No room for prejudice at UPEI Sincerely, The Eradicators (An Intermurel Hockey Team)

Dear Editor,

Although I am pleased by the student debate on feminist issues, I am also concerned about the apparent lack of understanding in this field. In honour of those students who wish to expand their knowledge about women's concerns, I am willing to participate in a public debate, information session or free fall discussion about feminism, morality and or affirmative action. Anyone interested is invited to call me to arrange a mutually convenient time and place.

(1. A radical feminist who: does not believe that "Women's child-bearing function and subsequent dependence on men is the root of female oppression" - indeed, I do not believe that women's child bearing function necessarily results on women's dependence on men at all!

2. And does not believe that Affirmative Action is reverse discrimination - instead, I see Affirmative Action as an attempt to rectify a long-standing, systemic discrimination presently in place.)
