

FALL WILDFLOWERS QUIZ

The composite family is one of the larger plant families, consisting of more than 1,500 species. Composite flowers are easily recognized by the numerous 'petals' spreading out from a common centre, as in the daisy or dandelion. On Prince Edward Island most of our common fall wildflowers belong to this family. Try the following quiz and see how many you can name. (21-25 excellent, 16-20 good, 11-15 fair, fewer than 10 - you need help)
