CANADA AND WEST INDIES.

Tenders for Steamship Lines.

TENDERS will be received at the Finance Department, Ottawa, up to and including the 1st day of May next, from persons or companies, for the performance of the following steamship services, viz:—
A line of mail steamers sailing from Halifax to Havana, thence to Kingston, thence to Santiago de Cuba, thence to Canada; and (2nd) a line of mail steamers between Canada and Porto Rico and adjacent islands. Tenders to be made by each line fortnightly. Steamers to be of a size sufficient to carry 2,000 tons of cargo and to be able to steam twelve knots an hour, averaging not less than eleven knots an hour. The contract in either case to be for a period of five years. Tenders will be received for the above services either separately or together. Tenders to be marked on the outside "Tenders for Steamship Service to West Indies." The Government of Canada do not bind themselves to accept any tender.
By command,
J. M. COURTNEY, Deputy Minister of Finance.
Finance Department,

Ch'town, Nov. 9, 1886.

LETTERS TO THE EDITOR.

Flax Culture.

SIR,—Last March I wrote a letter on flax culture, which you kindly inserted in THE EXAMINER. Since it was published, a number of farmers have written me for further information. With your permission I will again intrude upon your columns to answer some of the queries.

The land for flax should be rich, clean and well cultivated, one bushel of seed to the acre, broad cast or drill sowing will answer. Some advise rolling the land before sowing. The seed should not be deep in the ground, two runs of the harrow and one of the roller after sowing is sufficient. Early sowing is recommended.

When ready for pulling, the stalk next the ground will become a pale yellow, and the leaves will fall off eight to ten inches from the ground, and the top seed balls will become a light brownish hue. Judgment is required. Taken too young will make a tender fibre, and loss will occur in skutching; allowed to get too ripe will make a dry coarse fibre. The flax is caught a short way below the balls, and by a dextrous jerk of the arm is removed from the soil.

When ready for pulling, the stalk next the ground will become a pale yellow, and the leaves will fall off eight to ten inches from the ground, and the top seed balls will become a light brownish hue. Judgment is required. Taken too young will make a tender fibre, and loss will occur in skutching; allowed to get too ripe will make a dry coarse fibre. The flax is caught a short way below the balls, and by a dextrous jerk of the arm is removed from the soil.

Charlottetown or Summerside by the steamer Miramichi, or by rail to Point du Chevre, will be trifling. Remittance may be made by P. O. order or in Dominion notes, which may be had at any of the banks.

Apologizing for the length of this letter, I am,
Yours truly,
RICHARD HUNT.

Summerside, May 2, 1887.

A Milk Record.

SIR,—Permit me through your paper to publish the following record, as I have been requested by several farmers and others to do so. The question has often been asked, what quantity of milk will a fair milk cow produce in a year? I have taken the trouble to keep a record during the past year—commencing on the 17th March, 1886, up to the 17th March, 1887, milking in the year 4,199 quarts, being about four months in calf during this time. This is an average of a little over 11 1/2 quarts per day. I do not claim that this is a high record compared with records published by stock raisers abroad; as their stock is much superior to our common milk cows here their average is higher. A cow producing the above quantity of milk will give a return of \$209.95; this allows five cents per quart for the milk. One good cow, well looked after, will give a fair return, besides paying for her feed. Many people make a mistake by keeping too much stock and not feeding them well. You will find some of our best farmers have their horses rolling fat and their cows poor. Some people complain that they cannot raise heifer calves in certain seasons of the year, on account of the scarcity of milk. This is a mistake. If farmers want good milkers, the only way to get them is to raise heifer calves from their best milk cows, whatever season it may be, and they will be well paid for their trouble. I am not a farmer, but I take an interest in good stock. I find that most stock raisers advocate keeping milk cows clean, regularly fed and watered. I have proved this to be true, as unwholesome stables will affect the milk.

Thanking you, sir, for the space you have allowed me,
I remain, yours,
HENRY RACKEM.

The Colonial Delegates Banquetted

On the 30th inst. a banquet was given by the colonial office to the delegates to the colonial conference. Among these present were the Prince of Wales, Duke of Abercorn, Marquis of Lorne, Lord Stanley of Preston, president of the board of trade. In reply to the toast to his health the Prince of Wales expressed great pleasure at having become acquainted with the colonial delegates. No one he said desired more than that the conference should succeed in binding the colonies in a still closer union with the empire. The Earl of Rosebery in proposing the health of the delegates said that though he was a strong party man on some affairs, he entertained no party feeling where the welfare of the empire was concerned. He offered fully and freely his homage and congratulations to the Salisbury government for having initiated this conference, which meeting in such a serious manner could not fail of success. Sir Ambrose Shea made an appropriate reply to Earl Rosebery's speech and toasted the chair.

Enjoy Life.

What a truly beautiful world we live in! Nature gives us grandeur of mountains, glens and oceans, and thousands of means of enjoyment. We can desire no better when in perfect health; but how often do the majority of people feel like giving it up disheartened, discouraged and worn out with disease, when there is no occasion for this feeling, as every sufferer can easily obtain satisfactory proof, that Green's August Flower will make them free from disease, as when born. Dyspepsia and liver complaint are the direct causes of seventy-five per cent. of such maladies as biliousness, sick headache, constipation, nervous prostration, indigestion, dizziness of the head, palpitation of the heart, and other distressing symptoms. Three doses of August Flower will prove its wonderful effect. Sample bottle, 10 cts. Try it.

ALLOW me through your columns to thank the musical people of Charlottetown for their patronage during the past year. The satisfaction my work has given is evidence to me that it pays to be careful and thorough, to attend regularly to my pianos, and to sincerely apply myself to my business in all its details. I have testimonials from a leading Boston piano manufacturer, and can refer to any number of my services to nearly one hundred regular customers in Charlottetown. Leave orders on slate at Rocklin House, or address Box 133, Post Office.—Wm. A. Hawley, Piano Tuner. 31 dy—may 3

THE Czar's Government, desiring to raise the value of the Russian paper currency, proposes to have the Russian custom house accept part of the payments made for duties in credit notes instead of gold, at a price which the Government shall fix, the Government to purchase all of its outstanding credit notes to be bought in the foreign bourses, to prohibit wholesale exportation of these notes, and to allow travellers to take only small sums in the notes out of Russia.

From Rev. E. S. Efford, Pastor Baptist Church, East Auburn, Me.: "Adamson's Botanic Balsam is truly a specific. My lungs and throat were in an inflamed and almost congested condition from which I have been cured by the use of Adamson's Botanic Balsam." Price 10 cents, 35 and 75 cents.

Mrs. Swartworth, three sons and a sister, Altoona, Pa., were mysteriously poisoned one morning last week. The husband had prepared breakfast for the family, at which coffee and tea were used. The family drank the tea and the husband the coffee. He went to work as usual, and shortly after the family were all taken violently ill. A physician was called and found they were suffering from urinary poisoning superinduced by Spanish fly.

Mr. Simon Fortier has received \$2,500 subsidy from the Local Government of Quebec to establish two butter factories, one at Roberval and another at St. Pierre, in Lake St. John district.
