30 Monday	7 18	3 43	6 34

### Mysteries of Providence.

"I see," said the lady who wishes to wear bloomers, "that another woman has been burned to death by her skirts catching on fire. You never hear of a woman's bloomers catching on fire and burning her to death."  
"Simply good to show," said the husband of the lady who wishes to wear bloomers, "how mysterious are the ways of Providence."  
Two furniture polishers are prepared as follows: (1) Put one gill each of turpentine, spirits of wine and vinegar into a bottle with one-third of a pint of lard oil, mix thoroughly and shake the bottle briskly in order to mix the various ingredients thoroughly before using. Dab the furniture carefully, apply the polish with a piece of soft, old flannel, and rub off at once with a very soft duster. If only a small quantity of polish is used the furniture will brighten much more easily than when the mixture is laid on thickly. (2) Place two ounces of finely shredded beeswax into a jar, adding to it one ounce of yellow soap, cut small, and enough turpentine to cover. Stand the jar on the stove till all is melted. When cold, the preparation is ready for use, and should be rubbed till a good polish is procured.

## GOOD GOODS ARE

The cheapest in the long run. It is a poor policy to be always going on a cheap scale. Don't you know if you buy a suit of clothes made to your order one dollar cheaper than we asked you for it, you will get two dollars' worth of cheap work or trimmings in it?

### GOOD TAILORS

 don't have to cut prices; there is always a demand for High Class Tailoring.

**When We Say** we have a Blue Beaver cloth, indigo dye, excellent quality, that we are making up to order in overcoats for \$16.50; we mean it; it is a jim dandy at that price, and that we defy competition. It will be cut by a cutter who understands his business; we will make a profit on it; we could not live if we sold goods at cost; we have no cheap hands to make this coat up, therefore it will be made A I. We defy competition, taking quality into consideration. You are sure of a perfect fit when you leave your order with us. Don't forget we are the up-to-date Tailors.

### HATS! HATS!! HATS!!!

 We are doing the best trade. Gents' Furnishings. We keep the lobby kind, and that is the kind that sell. If you want the latest styles in suits or gents' furnishings, call and see us. We are still selling that famous \$16.00 suit. Can't be beaten on top of this earth. Drop in.

## McKay Woolen Company,

High Class Tailors and Gents' Furnishers.

### SONS OF TEMPERANCE COLUMN.

By Grand Division Editor.

G. W. P.—John Anderson, Kensington, G. Scribe—Jesse S. Burns, Lower Freetown

OUR AIM.  
To rescue the drunkard and save the country from the rum curse.

OUR PLEDGE.  
No member shall make, buy, sell or use as a beverage any spirituous or malt liquors, wine or cider or even table beer.

OUR PRIVILEGES.  
Love, Purity and Fidelity.

This column is given for the use of the Grand Division once a month, and all the subordinate divisions will send post cards to Box 214, containing information of public meetings, elections, &c., and due notice will be given.

Charlotte Company of Loyal Crusaders had a grand time on the 9th in Wright's Hall, where a subscription was given by the various societies, soldiers, and was well attended and very much enjoyed. There is some thought of holding them monthly during the winter.

The new G. S. J. work is going on with business at once, and a new company is to be organized at North River on Monday, the 16th.

The Loyal Crusaders should be loomed. It's the thing in temperance work. Train the young right and they will doubtless keep right, and the rumrunner will seek in vain for customers.

The temperance committee of Charlotte have a wide-spread proponent in the field and a lawyer engaged, and also express themselves willing to push the matter to the bitter end. Out for a clean city!

The Grand Worthy Patriarch, in his annual report, requested to find 200 members in attendance at the subordinate divisions he visited during the year. This should not be the fact. Fathers and mothers, mix up with the boys and girls; it will keep your hearts young, and it will encourage the divisions in this temperance work.

And now for news from your Divisions! Send to Box 214, Charlotte, and let your progress be known. This column will be issued nearly or about the 15th of each month. If you do not take the paper, get that special number anyway.

### P. E. Island Railway

On and after SATURDAY, 10th October, 1896 the trains of this railway will run daily Sunday excepted as follows—

Trains Outward	STATIONS.	Trains Inward
8:15 A.M.	Charlotte	8:15 P.M.
8:30 A.M.	Royalton Junction	8:30 P.M.

.....VICTORIA ROW

### TILES OF GLASS.

They Are Made for Use on All Sorts of Roofs.

A great deal of attention is now being given to a new roofing which has lately been patented, and is of German origin. This tile roof undoubtedly will be the roof of the future. Like many of the patents of German origin, it is of simple, cheap and yet so durable, that when once placed it will never wear out. When an order is given for one or more of these roofs, the builder, instead of giving an order for a number of tiles, as is done in other cases, causing a large expense for transportation, may, if he prefers, simply send a small machine to the grounds where the house is in course of construction, accompanied by a man understanding the use of the machine, and in a few days after tiles are produced to cover the building. Sand and cement are its component parts, hence its cheapness. One part of cement is mixed with three parts of sand; to these is added enough water to give it the consistency of thick mortar. The mass is pressed into a mold, and the tile, after standing for three days, is ready for use. The machine is so simple that a boy can work it, and no boards are needed under the tiling when placed, whereby a large item of expense is done away with, the tiles being set on battens placed six or eight inches apart. The tiles have a locking ledge, by which they fit closely into each other, making a roof perfectly proof against rain, snow, or wind, and cement is needed, and they are proof against chemicals and what is of supreme importance in this country, against fire. The machine, made by Consul Managach, of Chemnitz, Germany, to the State Department, says: A man named Kohler, living in Limbach, Saxony, has recently invented a cheap roof. It consists of cement and gravel or cement and sand, and is as durable as slate, is very much cheaper, looks as well as better, and can be made and put on quicker. In a country like the United States, where wooden shingles are almost universally used, heightening very much the danger from fire, this roof will soon win its way to favor.

The practical values of the new roofs are: First, of all, against fire; second, its every requirement of a good roof is done, being proof against all kinds of weather; it is light and may be made as light or heavy as one may wish; it may be given all the colors of a natural slate, and so shades besides. A square yard of these tiles weighs 65 pounds, but can be made lighter or heavier. The distinction is made to certain ridges that run around the inside of the plate and permit of one so lying on and into the ridges of another as to preclude the possibility of wind or water working their way in. Nothing whatever is needed for these roofs, except those plates. Nails, put or plaster play no part whatever.

Plates may be made of pressed glass in exactly the same form, and fitted to roofs, thus avoiding the cost of building in windows, or for the purpose of an artist or photographer a whole roof may be made of glass, which is probably the greater amount of light getting obstruction.

Varieties.

The physicians of Chicago enjoy peculiar privileges as regards transportation. For fifty cents he can procure of the city clerk a badge with a red cross which gives him the right of way. The physician can then pin on the badge and mount his wheel or carriage, and vehicles are obliged to yield him precedence.

Baltimore, the new estate of Mr. George Vanderbilt, is a wheelman's paradise. There are 95,000 acres in the estate, and the system of roadways is so perfect that Mr. Vanderbilt, who is a wheelman, can go a hundred miles over a macadamized road without going off his estate.

According to Rev. Phoebe Hanford, man's sphere is also in the kitchen, and she strengthens her position by citing a verse in 2 Kings xxi, 13: "And I will wipe Jerusalem as a man wipeth a dish, wiping it, and turning it upside down."

The man who habitually pushes himself into conspicuous places is probably afraid that he is too insignificant to be noticed unless he puts himself where people cannot help seeing him.

The difference between an enthusiast and a crank is the difference between a great earnestness in sensible work and

### Highest of all in Leavening Power.—Latest U. S. Gov't Report

## Royal Baking Powder

ABSOLUTELY PURE

Most Wheelers Are Over-Over.

So many bicyclists have been observed recently suffering from clogged chains, that a word of advice, which has been given before in this place, may, with propriety, be repeated: Oil the chain nothing is more necessary; but be sure not to have it wet. Each link should be thoroughly lubricated and then the chain should be rubbed dry. No amount of rubbing should be remembered, and can remove the oil from the parts between the links where it is needed, and not a particle of oil is required on the exterior surface. The drier that is the better, if exposed, picks up and holds dust, oil, and adds greatly to the friction. The same advice applies to all oiling. If so much is put in the bearings that they overflow and it is not wiped off, dust will gather at the spot, and, even in the best made bearings, some of it will make trouble. And even if it does not get so far, the bunches of dust so accumulated detract from the appearance of an otherwise well groomed machine, and render the cleaning after a run twice as difficult as it need be. The fact is that more wheels are over-oiled than under-oiled. "Carrying a canary," as the "wheelmen" call riding with a dry bearing that squeaks, is not half so common as a dust buried bearing. Of course, of the two, the latter is preferable, but no rider need have either.

The Canon Had Enough.

An English canon of note used to tell a good story of himself. In his capacity of magistrate he was once visiting the county jail, and expatiating to a friend on the virtues of the treadmill. Warming with his theme, he declared that he often visited he had one at home to give him the gentle exercise he required, but was too lazy to take, except under compulsion; and to remove his friend's skepticism, he asked the warder to give him a turn. The canon declared that the movement was delightful; but after two minutes of it he had quite enough, and called on the officer to stop the mill. To his horror the officer answered:—  
"Very sorry, sir; I can't. It is timed to run 15 minutes, and won't stop before."—Birmingham Post.

### Burns in Edinburgh, 1787.

Those who think that imported soap must be the finest do not know that the material of which Royal Oak Soap is made are the best to be found anywhere.

Send 35 Royal Oak wrappers to the Ch'town Soap Works, and receive free the beautiful picture, "Burns in Edinburgh, 1787."

### It's Easy to Forget

Anything, but this is worth remembering. Buy in quantity, however small or large, "come to our yard," it will pay you for your trouble.

### DeChase's Ointment Cures

Dr. Robert Phillips, Fergus, Ontario, writes: "I have suffered from piles for a long time and tried several remedies, but with no success. Finally, a week ago, I purchased a box of Dr. DeChase's Ointment, and the first application showed the curative effect of the remedy. We have used only one-sixth of the box, but the change is very marked. The ointment has little or no odor, and is very pleasant to use. It is sold by all druggists, or on receipt of price, 60c. Address, EDWARDS, BATES & CO., TORONTO."

### Nervous

People find just the help they so much need, in Hood's Sarsaparilla. It furnishes the desired strength by purifying, vitalizing and enriching the blood, and thus builds up the nerves, tones the stomach and regulates the whole system. Read this:

"I want to praise Hood's Sarsaparilla. My health ran down, and I had the grip. After that, my heart and nervous system were badly affected, so that I could not do my own work. Our physician gave me some help, but did not
