Sodium Fluoride Clinic Planned

It has been announced that a clinic for sodium fluoride applications will be held in the office of the Public Health Nurse at Alberton beginning next Monday.

These painless treatments have been proved to reduce future tooth decay to a considerable degree. Since they have no effect on decay already begun it is required that children of school age (up to 13 years) present a certificate from their dentist stating that all necessary dental treatment has been completed.

Children as young as three years may receive the applications also, but those of pre-school age do not require a certificate.

This clinic is held under the direction of the Dept. of Health and further information or appointments are available from the Public Health Nurse, Miss Louise Gillis.

DITHANE

makes the difference

Potato growers everywhere find DITHANE makes the difference between a bumper crop with plenty of No. 1's, and a just average yield of ordinary potatoes. That's because DITHANE protects against early and late blight, helps the vines remain green and vigorous longer to produce bigger, firmer tubers... and more per acre.

DITHANE is the original carbamate potato fungicide made in Canada. Although there are several imitations... there is only one DITHANE. Insist on this well known product for the protection of your potato crop and we are sure you will agree DITHANE has no equal. Tests have proved DITHANE-protected potatoes to be at least equal in flavour, cooking and chipping qualities to those sprayed with copper fungicides.

Remember it costs no more to use the best. See your DITHANE dealer soon.

DITHANE is a trademark in Canada, Reg. U.S. Pat. Off. and in principal foreign countries.
