

Control of the untranslated documents which were sent to the United States for the information of all concerned.

In one instance, American industries had spent hundreds of thousands of dollars on a bit of research into electronics, only to discover at the end that the Russians had already perfected the design and described it in detail in a report which no American scientist had read.

By contrast, the report adds, the Soviet Union makes use of every bit of scientific information which is reported around the world. Every document, report or journal that comes into their hands, from whatever source, is immediately translated and recorded. As a result, in many cases Soviet scientists know more about what is going on in American scientific circles than do many American scientists themselves.

This whole thing, of course, can be attributed to the fact that American scientists do not know isn't worth knowing and that no country in the world could possibly go ahead of the United States in any field. In recent weeks that notion has received a great shock, but whether it has come in time to do much good is a question. But imagine anyone's allowing important scientific reports to be stowed away in a library before they have even been looked at to see whether or not they contained anything of value! A plain jakes would know better than that.

There is still a possibility, of course, that Mr. Eisenhower will be present. He certainly will be if there is any way of getting him there, short of conveying him on a stretcher. Washington officials will see to that, if only to justify their contention that he will soon be as well as ever. But, assuming that his place is taken by Vice President Nixon, there is no reason to fear that the purposes of the meeting will be thwarted because of the change in American representation. It is indeed possible that it will have a greater chance of being successful. With all respect to President Eisenhower, there is no denying that for some time past he has been pretty much under the dominance of Secretary Dulles which is, without doubt, the most unpopular official connected with NATO. Mr. Nixon, although in theory he will be acting for the President, may and probably will bring a fresh viewpoint of his own which might very well put new vigour into the whole structure.

From all accounts, Mr. Nixon has matured very considerably in the last two or three years; and certainly no other Vice President in American history has had such a good opportunity to acquaint himself with the responsibilities of the executive branch. In fact, he is the only Vice President who has been called upon to act for the chief executive in any important matter.

It will be recalled that when President Truman went to Potsdam in 1945, shortly after assuming the office following the lamented death of President Roosevelt, there was some apprehension that he might fail to measure up to his responsibilities at a very critical time in allied relationships. It is now, however, generally believed that from the standpoint of Western interests vis-a-vis Soviet strategy, Potsdam was perhaps more satisfactory than those conferences at which the ailing Mr. Roosevelt had been present. It is possible that history might repeat itself at this month's meeting in Paris.

In any case, since the British and West European Governments are plainly determined to make this meeting more in the nature of a sharing of views and less a matter of listening to American pronouncements, the absence of Mr. Eisenhower, though regrettable, is scarcely a matter of grave import, so far as the long range interests of NATO are concerned.

When Britain and the United States sent arms to Tunisia their declared purpose was to keep the Tunisians from accepting them from the Russians. Well, since then arms have arrived from Egypt, which had received them from the Russians. The French are probably right in their contention that giving rights to a country like Tunisia in the hope of forestalling Russian influence is just a waste of money.

United States authorities are cautioning would-be investors about buying stocks from high pressure telephone salesmen. The idea, according to the chairman of the Securities and Exchange Commission, is to "alert the investing public to the danger of buying unknown securities". Somehow it is a little difficult to feel sorry for anyone who is foolish enough to buy stocks from unknown salesmen who work by telephone, whether they be of the high pressure or the low pressure type.

The President's Absence

The news that the top level meeting of NATO will be held as planned, despite President Eisenhower's inability to attend, is of some significance. It is, of course, indicative of the particular importance of the meeting. But there is more to it than that. It is evidence of the growing feeling in West European circles that in the past too much emphasis was placed on United States leadership. As one European diplomat put it the other day, "NATO is a co-operative organization; the main purpose of this meeting is to stress that fact."

There is still a possibility, of course, that Mr. Eisenhower will be present. He certainly will be if there is any way of getting him there, short of conveying him on a stretcher. Washington officials will see to that, if only to justify their contention that he will soon be as well as ever. But, assuming that his place is taken by Vice President Nixon, there is no reason to fear that the purposes of the meeting will be thwarted because of the change in American representation. It is indeed possible that it will have a greater chance of being successful. With all respect to President Eisenhower, there is no denying that for some time past he has been pretty much under the dominance of Secretary Dulles which is, without doubt, the most unpopular official connected with NATO. Mr. Nixon, although in theory he will be acting for the President, may and probably will bring a fresh viewpoint of his own which might very well put new vigour into the whole structure.

From all accounts, Mr. Nixon has matured very considerably in the last two or three years; and certainly no other Vice President in American history has had such a good opportunity to acquaint himself with the responsibilities of the executive branch. In fact, he is the only Vice President who has been called upon to act for the chief executive in any important matter.

It is possible that history might repeat itself at this month's meeting in Paris.

In any case, since the British and West European Governments are plainly determined to make this meeting more in the nature of a sharing of views and less a matter of listening to American pronouncements, the absence of Mr. Eisenhower, though regrettable, is scarcely a matter of grave import, so far as the long range interests of NATO are concerned.

Hidden Reports

An almost unbelievable report bearing on Russia's apparent superiority in missiles development comes from Washington. It reveals that there are thousands of Soviet scientific reports hidden away in the Library of Congress, simply because no one thought it worthwhile to have them translated. This means, the report points out, that the United States Government and American scientists are ignorant of a great deal of research which has been going on in the Soviet Union for years. It claims, too, that much of American research is wasted effort, since the knowledge it seeks has already been obtained by the Russians and published.

EDITORIAL NOTES

The head of the United Kingdom Atomic Energy Authority has "deplored" reports that Britain is far ahead of the United States in the development of hydrogen power. He did not say that the reports were unfounded but only that "such observations are inappropriate in co-operation programs of this kind and are likely to be misleading".

The Most Rev. Geoffrey Fisher, Archbishop of Canterbury, has called Russia's launching satellites "a marvellous thing". Writing in his Diocesan Journal, Mr. Fisher added that "Russian scientists deserve the respect and admiration due to all who extend the ability of men to understand and control the physical world in which they live".

The Fisheries Federation has asked for stricter inspection in the lobster packing business. If, as some members claim, there has been a falling off of quality in recent years, the recommendation should be given prompt consideration by Federal fisheries authorities. The lobster fishery is too important to the economy of this Province to be allowed to suffer from careless packing practices.

Some of the members of the Canadian Trade mission in Britain are said to be a little perturbed over the service in some of the provincial hotels where no heat is provided except through room-furnace heaters. The visitors ought not to feel too sorry for the people who have to put up with that sort of thing all the time. They are used to it. Many of them would not want it any other way.

When Britain and the United States sent arms to Tunisia their declared purpose was to keep the Tunisians from accepting them from the Russians. Well, since then arms have arrived from Egypt, which had received them from the Russians. The French are probably right in their contention that giving rights to a country like Tunisia in the hope of forestalling Russian influence is just a waste of money.

ON PARLIAMENTARY HILL

Justice For The Maritimes

By Heath Macquarrie, M.P.

Ottawa Monday and Tuesday of this week last, the ten provincial Premiers, their cabinet colleagues and advisers met with Dominion Government leaders in an important conference to discuss financial and economic relations between the provinces and the central government. It was pleasant to renew acquaintances with the members of the provincial delegations, not only from Ontario and Quebec, but also from the other provinces. The members we had become acquainted over the years.

Monday's sessions were open to the public, and I was able to spend the morning listening to the session to hear Premier Macpherson present the Island brief. With very few exceptions, all those who spoke at the conference concurred that the situation is serious and that the atmosphere of the open session was altogether harmonious. P.M.'s ATTITUDE

Without doubt, the Prime Minister of Canada made a significant contribution to the development of such a happy atmosphere. In the Ontario Journal put it, he was tried in a new role, that of chairman of a Dominion Provincial gathering and he made a great success. His charm and urbanity, his deftness of thought and facility of speech made him an ideal presiding official for such an important gathering. His gesture towards French-speaking Canadians was made early in the proceedings when he delivered a portion of his remarks in French. Premier Duplessis commented on this in a particularly appreciative vein and noted that in all the years of Mr. Mackenzie King's premiership he had never made such a gesture.

One of the longest suspension bridges in the world is being built across the Bosphorus at Istanbul. Linking Europe to Asia, the 4,300-foot span rises as a new symbol of Turkey's unique place in the world. The island of Ayas Mimar is unique in the world. It is the only Moslem, it is the only country holding membership in the North Atlantic Treaty Organization and the Baghdad and Balkan pacts.

This keynote nation is slightly larger than Texas and just as dry in places, the population numbers 4,000,000. The population of the pastural Kurds are the largest.

ALLERGIES ARE CONSTANT PLAGUE

By Herman N. Rudzick, M.D. ABOUT 200,000,000 Americans have an allergy of one sort or another.

For many people the winter months are the worst time for suffering from allergies. For some, winter weather still brings relief from the itching, sneezing, wheezing, gasping for breath, and other miserable ailments. But for others, winter weather still brings relief from the itching, sneezing, wheezing, gasping for breath, and other miserable ailments.

Believe it or not, the first frost does not make you feel any better. In fact, it may make you feel worse. Believe it or not, the first frost does not make you feel any better. In fact, it may make you feel worse.

Believe it or not, the first frost does not make you feel any better. In fact, it may make you feel worse. Believe it or not, the first frost does not make you feel any better. In fact, it may make you feel worse.

NOTES BY THE WAY

We are all in favor of those schools which teach young ladies how to be charming, although we think the girls should be warned that there is a limit to the amount of charm a man can stand. — Hamilton Spectator

A uniform system of reporting traffic accidents across Canada would be a boon to the greatest preserver of life and limb. Accurate statistics could be drawn from the reports and suggest effective cures. They might provide some surprises, too. — Vancouver Sun

The Kremlin may not be so clever in calling its outcasts such as Molotov, Malenkov and Shepilov to liberate the area from Moscow imperialists. — Sherbrooke Daily Record

A Chicago policeman who chased and caught a moving freight train to deliver a traffic ticket to the conductor, deserves a citation. A United Press report says the train had too long delayed auto traffic by loitering at a level crossing. High time some action was taken against railway road-hogs. — Ottawa Journal

Some very good advice to municipal councils and to school boards is to be given in a statement of all levels. If they spend what they should prudently save, then that is to be deplored. If they save what they should prudently spend, that is to be commended. A wise balance between the two is what this country needs. — Kingston Whig-Standard

Did You Know? The Mobile Chest X-ray Unit, owned and operated by the Prince Edward Tuberculosis League, has taken 180,972 x-rays with the result that 292 new active cases of lung tuberculosis have been discovered through this medium between 1945 and 1956.

Don't delay; buy Christmas Seals and help prevent tuberculosis.

THE AGE OLD STORY

Be thou an example of the believers. Be thou in one heart and in one mind, in charity, in spirit, in faith, in purity.

OUR YESTERDAYS From the year of our Lord's birth to TWENTY-FIVE YEARS AGO (Dec. 3, 1932)

Discussing the potato situation yesterday, the Market News said that it has been in the market buying potatoes for some time explains that the advance in prices now being enjoyed throughout the Maritimes is due largely to the fact that the Toronto market through water transit. The difference of 27 cents enables Maritime shippers to enter competition with Ontario in the central provinces' market.

Various phases of the subject of illegal shooting and fishing were discussed at the annual meeting of the Fish and Game Association last evening. Several cases of poaching were reported and were cited. The Members of the R.C.M.P. in attendance said that although cases of poaching have been successfully completed, there were still a number of poachers because of the unwillingness of witnesses to give evidence.

TEN YEARS AGO Dec. 1, 1922 The practicability of establishing a Youth's Guidance Council was discussed at a meeting of the Board of the Youth's Guidance Council which was held yesterday afternoon by the Adult Education Council in the City Hall. The Youth's Guidance Council was established by the Province by order of the Legislature in 1912. It was the first of its kind in the Province by order of the Legislature in 1912. It was the first of its kind in the Province by order of the Legislature in 1912.

Since the passing of the order on October 25, 1912, by the Provincial Government authorizing the paying of a \$2-per-ton subsidy on the export of fish from the Province by schooner or by trucks via the Northumberland Strait, the Province has received \$800,000 in subsidies for the export of fish from the Province by schooner or by trucks via the Northumberland Strait.

MAXIMS The measure of choosing well is whether a man likes his job less than he does.

THE POET'S CORNER

Beware, O Time, I have you feared. You are clipped to human speed. Your windy monologues is cadence. And parried-out as meets my need.

This I say that holds you captive. Speaks of you in monotony. That leaps from springs and whistles. Precise as any man has known. Diffuse, you were, now fast, now slow. Fine swift as swallow wing. Yet twice as calm and still as awags.

And long like a day in Spring. And in this watch stop—what do you do? A wind of wings goes rushing by. Which are beyond my grey mist. Where prisoner am I?

George Murray The New York Times

FAIRBANKS-MORSE Rubber Tired—Ball Bearing TRUCK Because trucks have to take rough treatment, FM spares no effort to make them as rugged as possible. The steel-strapped truck with heavy duty ball bearing wheels illustrated is made of M.S. 1. Varnished and hardened with metal parts painted black. Available from any of 16 Fairbanks-Morse branches in Canada. — In Halifax: Tel.: 24431 1248 Barrington St.
