

MRS. HOOPER ESCAPED.
Because She Used Dodd's Kidney Pills and so Cured Female Weakness.

NORWICH, Oct. 3.—Mrs. J. S. Hooper, wife of Mr. J. Stanley Hooper, of North Norwich township, is a living proof of the unapproached value of Dodd's Kidney Pills, in the treatment of diseases of women.
Mrs. Hooper was a martyr to Female Weakness and Kidney Disease for twelve years. Norwich, Detroit and Buffalo physicians treated her unavailingly. She then tried Dodd's Kidney Pills. Four boxes cured her thoroughly, and made her as healthy, strong and vigorous as she ever was. Dodd's Kidney Pills are women's best friends.

GLADSTONE AS A CHEMIST.

An Incident in the Grand Old Man's Career in the Commons.

If Mr. Gladstone seldom indulged in sarcasm, it was not because he lacked the gift—for he possessed it in a high degree—but because he forbore to use it. To hurt an opponent's feelings gave him pain and when he did it unintentionally he would sometimes cross the floor of the house, and, sitting for a few moments by the side of the man whom he had just demolished, say something to assuage the wound. One of his most persistent, but never ill natured, critics was the late Sir John Pope Hennessy, who told me the following story to illustrate this generous trait in Mr. Gladstone's character.

Sir John prided himself on his knowledge of chemistry, and in one of the debates on the commercial treaty with France he made a speech exposing, as he believed, a serious chemical blunder in the treaty. Mr. Gladstone followed, "and soon turned me inside out in the most amusing manner," said Hennessy in relating the story, "proving, as if he had been a chemist by profession, that it was I who had blundered egregiously."

Having thus disposed of his critic, Mr. Gladstone went and sat by him for a moment. "I hope you don't feel hurt, Mr. Hennessy," he said. "Your speech was ingenious, and it may console you to know that the emperor of the French made precisely the same objection that you have made. The fact is, both you and he know a good deal about chemistry, but not enough to keep you from going astray."—Canon McColl in Fortnightly Review.

The two papers will make an exceptionally good combination to have addressed to your friends abroad even if you do not yourself require them.

Piles Cured Without the Knife by Dr. A. W. Chase's Ointment.

Mr. Geo. Crowne, painter, of Woodville, Ont., Victoria Co., says:—"For thirteen years I was a sufferer from bleeding piles and the intense agony which I passed through during those years and relief I obtained by Chase's Ointments prompts me to give this testimonial. My physician wished me to have an operation but I felt I could be cured without the knife. Three boxes of Dr. Chase's Ointment stopped the bleeding and effected a permanent cure."

BIRDS THAT DO NOT SING.
Although They All Utter Vocal Sounds of Some Kind.
Singing is applied to birds in the same sense that it is to human beings—the utterance of musical notes. Every person makes vocal sounds of some kind, but many persons never attempt to sing. So it is with birds. The eagle screams, the owl hoots, the wild goose honks, the crow caws, but none of these discordant sounds can be called singing. With the poet the singing of birds means merry, light hearted joyousness, and most of us are poetic enough to view it in the same way. Birds sing most in the spring and the early summer, those happiest seasons of the year, while employed in nest building and in rearing their young. Many of our most musical singers are silent all the rest of the year; at least they utter only low chirpings. It is natural, therefore, that lovers of birds should regard their singing as purely an expression of joy in the returning spring and in their happy occupations.

Outside of what are properly classed as song birds there are many species that never pretend to sing—in fact, these far outnumber the musicians. They include the water birds of every kind, both swimmers and waders; all the birds of prey, eagles, hawks, owls and vultures, and all the gallinaceous tribes, comprising pheasants, partridges, turkeys and chickens. The gobble of the turkey cock, the defiant crow of the rooster and even the musical call of the "bobwhite" are none of them true singing, yet it is quite probable that all of these sounds are uttered with precisely similar motives to those that inspire the sweet warbling of the song sparrow, the clear whistle of the robin or the thrilling music of the wood thrush.

But naturalists have set apart a very large group as song birds, and even among these there are many species that never sing at all. Birds are grouped according to their anatomical characteristics, the structure of their bones, bills, feet and wings. And thus we have the songless song birds, looking at the matter from the standpoint of the classifying naturalist.—Philadelphia Times.
