Cleartone HEARING AID

Here is the ultimate in hearing aid design and engineering. The Cleartone "700" is the closest approach yet to hearing aid perfection. It is the smallest hearing aid ever produced to capture the power of a 22 1/2 volt battery. You'll be amazed to see how very small it is—smaller than ever before thought possible. You will appreciate the clearness and extra power designed to aid the most difficult cases. Now you can hear sounds more clearly . . . without distortion . . . without strain. Now you can wear your hearing aid hour after hour easily, comfortably . . . without fatigue. Match the Cleartone "700" with any hearing aid available today. Put them all to the same tests. You'll agree that the Cleartone "700" outperforms them all.

We carry most all sizes of Batteries and repair most aids. Please send make of Aid and number of Battery when ordering.
