NEW YORK

NEW YORK (AP)—The stock market went through another scrambled performance Wednesday ending the first quarter of 1965.

Thanks to large gains in January, the market showed an advance for the quarter but it posted a loss for March. In February, the list was about even.

What interest there was in Wednesday's market lay in secondary issues or special situations. The market wheelhorses dragged their heels.

The Dow Jones industrial average closed unchanged at 889.05. Volume was 4,420,000 shares compared with 4,230,000 Tuesday. The Associated Press average of 60 stocks rose .3 to 332.9.

The volume leader was First Charter Financial which rose 1¾ to 22¾ on 110,200 shares.

Olin Mathieson, fourth most active stock, was off ⅛ at 47⅝. It ran into brisk selling on news the company pleaded guilty to charges it defrauded the U.S. foreign aid program in the sale of drugs. At its worst, Olin was down to 46 but the stock regained most of its lost ground as company statements explained the technicalities involved.

Comsat continued to show strength. It spurted 4¾ to 61½ as fifth most active stock. Comsa has set next Tuesday as the arget date for the launching of its Early Bird communications satellite.

Pan American Sulphur advanced 1⅞ on news it will raise the price of sulphur. Texas Gulf Sulphur, which rose 1¼ Tuesday, lost ¼ as traders took a little profit.

Among Canadian issues, Dome Mines gained 1⅜. International Nickel fell ⅝ and Canadian Pacific ⅜. Off ¼ were Hudson Bay Mining, McIntyre Porcupine and Aluminium Ltd.

Prices on the American Stock Exchange moved irregularly higher. Banff Oil, heavily traded, lost 9-16. Scurry Rainbow Oil gained ¾ and Canadian Javelin ⅜.

Improved Growth Techniques Help Level Wood Products Cost

VANCOUVER (CP) — Improved techniques to increase growth and harvesting will keep prices of wood products from rising as rapidly as those of other building materials, says John Bene, president of Weldwood of Canada Ltd.

As a result, the forest products industry will continue to prosper in the face of growing competition from many new and different building materials.

Mr. Bene, in a speech to the Building Supply Dealers' Association of British Columbia in neighboring north Vancouver, said the forest industry in British Columbia illustrates the results of improved techniques.

"The provincial government estimates there is sufficient timber in B.C. for a sustained annual harvest of 18,000,000,000 board feet. The present yearly cut is just half that amount.

"Forestry experts who project the effects of continuing improvements in forest management predict the province's future annual timber harvest potential will actually be between 27,000,000,000 and 54,000,000,000 board feet."

FACILITATE RESEARCH

Mr. Bene said co-operation between "forest industry firms and the individual efforts of the larger companies have created research facilities that are rapidly approximating those of the chemical, metal fabricating and other highly advanced industries."

The industry already has found ways of eliminating the contraction, swelling, warping and even flammability of wood. It can also manufacture a board or structural component of almost any dimension regardless of the size of the log from which it originates.

He said the industry now produces a great variety of beautiful woods that only the rich could afford not many years ago.

"Today through changes in density, strength and fibre characteristics the industry is creating an ever-increasing range of structural and decorative products."

BOARDS HELP SALES

Mr. Bene said the home improvement business, with annual sales volume of nearly $600,000,000, "would not be nearly as big or important to building supply dealers if there were no engineered wood products like hardboard, particle-board and plywood."

He said proof that the forest products industry and the building supply dealer are willing to change shows in the fact that a large percentage of what they sell was unknown 10 years ago.

But in this highly competitive and fast-changing world, new and improved products are not enough. There must be greater concentration on advanced marketing techniques, he said.

"Our industry invests hundreds of thousands of dollars a year to create consumer awareness of our products. But all this advertising is useless if the end-user has no place to go to buy our products."

He said it would not be surprising to find forest products companies developing special merchandising programs designed to establish long-term, mutually beneficial and profitable associations between producers and suppliers.

Ship Schedule Is Revised Because Of Port Strike

ST. JOHN'S, Nfld. (CP)—Furness, Withy and Company Limited, issued a statement here that due to the longshoremen's strike in this port, "important changes" have been made in their North Atlantic operations.

The major change is that the company's two new ships, the Newfoundland and the Nova Scotia, will not call at St. John's but will operate an express service from Liverpool, England, to Halifax and Boston.

The waterfront dispute, now in its second year, has resulted in two longshoremen's strikes in the past year which have tied up the port for a total of 205 days. The current strike, which started last Oct. 26 has run 154 days and there is still no sign of settlement.

The statement, issued by Maurice Devine, the company's manager here, said a second service is being established using smaller, chartered vessels suitable for calling at Conception Bay ports and other ports around Newfoundland, including Corner Brook.

STEP IS TEMPORARY

"This service will provide sailings every three weeks from Liverpool," the statement said, "and would, when stable conditions are established on the waterfront here, give direct discharge at St. John's."

Business Briefs

OTTAWA (CP)—In the week ending March 21, a total of 71,944 railway cars of revenue freight were loaded on rail lines in Canada, an increase of 4.8 per cent over the same week of 1964. The report from the bureau of statistics said this brought the number of cars loaded in the Jan. 1 - March 21 period to 768,291, down by 2.7 per cent from the same period of 1964, but up 11.1 per cent from 1963.

OTTAWA (CP) — There were an estimated 5,300,000 hogs on Canadian farms at March 1, up three per cent from the same date last year. The figures, compiled by the bureau of statistics, do not include Newfoundland. The bureau said the three per cent increase over last year results from a 10-per-cent gain in the west, where hogs increased to 2,190,000 from 1,997,000, which more than offset a three per cent decline in the east, to 3,110,000 from 3,127,000.
