Plan Meetings To Discuss Tree Farms In The Province

Hon. Eugene Cullen, Minister of Agriculture, announced yesterday that the Canadian Forestry Association in co-operation with the Prince Edward Island Department of Forestry will hold a meeting in Charlottetown in June to discuss the promotion of tree farms on the Island.

The project will be the first of its kind attempted on the Island although all the mainland provinces are at present connected with the Association.

Mr. Cullen has agreed to set-up provisional committee to organize this project in the province. Included on the committee are the Hon. Mr. Cullen, Honorary Chairman; Frank Gaudet; Provincial Forester, chairman; W. N. Black, Superintendent of the Illustration Stations, Gordon Kerr, Provincial Commissioner of the Boy Scout Association; B.B. Jones, Bunbury, and Claude Smith, East Royalty.

It will be the aim of the committee to educate the people of the province on the value of present woodlots. In addition, if properly managed, this project will go towards reducing the annual two million dollars that the province is now spending on lumber, the Minister stated.

Robert C. Parent, superintendent of the Experimental Farm, said this morning that there has been a "keen interest in forestry" in the province in recent years. He added that it was the hope of the committee to interest members of the Federation

Stella Maris H. & S. Hears Judge Trainor

All committees, entertainment, education, membership, etc., had excellent reports for the recent meeting of the Stella Maris Home and School Association.

Guest speaker of the evening was Judge St. Clair Trainor of Charlottetown. Thus Stella Maris Home and School Association had a report of the conference from one who had actually attended and taken part in one of the workshops.

Judge Trainor in his remarks said that some 800 delegates attended the conference from all across Canada representing the clergy, the universities, industry, minister and deputy ministers of education also attended. Opening address was given by Dr. W. Penfield, world famous Canadian neurologist. The strength of a nation depends on the education of its people — not altogether in science.

BASICALLY SOUND

Dr. Penfield and other prominent speakers seemed to think that our educational system was basically sound but we were not spending nearly enough of the national dollar on education.

The prestige of the teacher had to be restored. Too many of us have lost our appreciation of real values. The teacher is not being paid commensurate with her task. Next to the parents, the teacher was the primary builder of character. It was the general opinion that salaries of teachers must be raised. Teachers must be properly

Cattle Deaths Not Gov't Worry

OTTAWA (CP) — The federal government has no responsibility for paying compensation for deaths of cattle in the Thurso, Que., area that were vaccinated with anti-rabies vaccine intended for dogs, Agriculture Minister Harkness said Wednesday.

Replying to a Commons question by Hazen Argue, CCF House leader, he also said he is considering increased rates of compensation for animal deaths under existing federal legislation.

Such compensation normally covers farm animals ordered slaughtered because of disease.

Mr. Harkness said Friday that 45 cattle in the Thurso area had died and another 40 were sick after the vaccinations. A private veterinarian had used a vaccine labelled for use on dogs only — a stronger type than the anti-rabies vaccine for cattle.
