

New Camera Has Remarkable Speed

LOS ALAMOS, N.M. (AP)—A camera which "stops" an atom bomb explosion has been speeded up to take pictures at the rate of 15,000,000 a second. It used to take only 3,500,000.

This remarkable new instrument was described today by the University of California's Los Alamos scientific laboratory, in which it was developed. It is believed to be by far the world's fastest camera.

Basically the camera is a system of lenses and mirrors which cause a beam of light to sweep in searchlight fashion along a strip of film inside a dark chamber. The new high speed is due mainly to changes in the revolving mirror. In the original camera this was only a two-sided mirror, giving only two beam flashes to the film for each revolution. It spun at 10,000 revolutions a second.

With extra-strong steel, the three-sided mirror can be turned at 23,500 revolutions a second and for each turn it gives three flashes to the film instead of two.

Early Discovery Of Signs of Delinquency Is Claimed

MONTREAL, (CP)—The science of criminology has reached a point where it can detect signs of juvenile delinquency in eight-year-olds, a noted criminologist said Thursday night.

Dr. Denis Charles Carroll, of London, president of the International Society of Criminology, said these youngsters aren't labelled delinquents but do possess traits that could lead to delinquency.

He was addressing the opening of the Richelle Foundation for the study of juvenile delinquency at the University of Montreal.

Dr. Carroll said delinquency is as great "a scourge" as cancer, but until recently little research or study had been devoted to the problem.

BOYS ON TOUR

LONDON, (CP)—A group of 12 Canadian boys aged 16-18 will attend an international camp of the Boys' Brigade at Eton College during August. The Canadians will come from Montreal, Toronto, Vancouver and Hamilton.

took second place Sunday with a total leap of 14 feet, 4 1/2 inches. Third place went to Les, owned by John E. Lee of Ceres, Calif., for a leap of 14 feet 4 3/4 inches.

A South African entry, Leaping Lena, was the day's big disappointment. In practice jumps, Lena leaped as far as 32 feet. But Sunday she was temperamental and hopped a total of just 12 inches.

WARNING

SQUAW POINT RIFLE RANGE

Firing will be carried out at the Squaw Point Rifle Range from 15 Jan 54 until further notice.

The range property comprises the following area:

"The centre line of fire being a line extending from the Southern tip of Squaw Point to approximately the Western tip of Governor Island, and extending Southerly from the said tip of Squaw Point over the waters of Hillsborough Bay a distance of one and three eighths miles in depth, and extending from said centre line of fire, and parallel thereto a distance of 520 yards each side of the centre line."

The danger area is clearly defined by danger signs.

No unauthorized person may enter this area, and trespassing on the land area is strictly prohibited.

The Department of National Defence will assume no responsibility for any claims arising out of death or injury to the person or damage to property which may occur through failure to observe this warning.

Breaks World's Frog Jumping Record

ANGELES CAMP, Calif. (AP)—A three-year-old bullfrog owned by a cattle rancher who raises frogs in his spare time broke the official world's frog jumping record Sunday.

Under the gaze of an estimated 8,000 spectators, the frog Lucky Lager leaped a total of 16 feet, 10 inches in three jumps to capture the \$1,000 first prize for its owner, rancher Roy Wiemer.

High Tension Tom, owned by Ben Graham of Owen Sound, Ont., jumped the farthest of three Canadian entries with a leap of eight feet, six inches. Jato, owned by Sgt. Ed Lennox of Toronto, jumped five feet and Prairie Prince, owned by William Molr of Weston, Ont., managed four feet, 10 inches.

Lucky Lager's jump broke the record of 16 feet, two inches, set in 1944 by the frog Maggie, owned by Merlin Fisher of Stockton, Calif. A frog named Stupid, owned by Gary Jacobsen of Petaluma, Calif.,
