Maritime Central-Nordair Receive First Dart-Herald

The first of four Handley Page Dart-Heralds for Maritime Central Airways-Nordair has arrived in Montreal. MCA secretary-treasurer Arthur Clark said yesterday that the plane arrived on Monday morning. Another is expected to arrive in about a month but the delivery date for the other two is not definite. The Dart-Herald will make a demonstration flight in Ottawa on Feb. 28 with government, air force and department of transport officials aboard and will go into service immediately thereafter on a run in southern Ontario. Mr. Clark said. The new plane is the first of its kind in Canada. A Nordair crew flew the plane to Montreal from England. Present plans call for the first two and possibly, three of the new aircraft to go into service with Nordair and one or two with MCA, it was said. Mr. Clark noted that a Dart-Herald was used by Prince Philip on his recent South American tour. Prince Philip pilots the plane frequently himself.

Nfld. Legislature Member Critical Of Mine Layoffs

OTTAWA (CP)—James McGrath (PC—St. John's East) accused the operators of Wabana Iron Ore Mines at Bell Island, Nfld., of being more interested in paying dividends to shareholders than in the welfare of its employees. The Newfoundland MP said in the Commons Monday that large layoffs have taken place at Wabana because the Dominion Steel and Coal Corporation is not making big enough profits. Layoffs had been handled in a "most inhuman way."

A seven-week shutdown started at Wabana Jan. 27 and the possibility of a 500-man layoff and a further shutdown later in the year have been announced by Dosco. Slipping overseas markets are blamed for the cutback. Mr. McGrath, speaking in the throne speech debate, said Dosco does not appear to be interested in the welfare of its employees. Its first loyalty was to pay handsome dividends to its shareholders. SAYS WORKERS EXPLOITED The company, he said, has had an "unenviable reputation." In the main it was a history of exploitation of the people it employs. "The company has been guilty of gross neglect of its employees down through the years," he said. Mr. McGrath referred to the taking over in 1959 of Dosco by the A. V. Roe Company of Britain. He said the record of A.V. Roe in Canada "leaves a lot to be desired."

The Wabana mine had been in operation for 60 years. Under such circumstances one would expect to find an established town near the mine and adequate hospital facilities. "Not so on Bell Island," Mr. McGrath said. "Everywhere you find examples of gross neglect on the part of the provincial government and the company."

JUST WHO WAS 'BLATANTLY ABSURD'?

But It Wasn't Daily Newspapers That Made Slip 'Revealed' On TV

A statement which seemed to cast doubt upon the reliability of Canadian news papers, and the Canadian Press, the principal news agency serving those papers, has been investigated by the Canadian Press. "That sentence is blatantly absurd. Anyone who knows—that there are only 10,000 or 11,000 Eskimos, must realize that a figure of \$23,000,000 is obviously a slip. The actual figure is between \$2,000,000 and \$3,000,000." Mr. Phillips then remarked that none of the editors who used the story checked the figures "and that error has been perpetuated in every newspaper in Canada." NOT IN DAILIES The reference to "every newspaper" might appear to indicate that the story was carried by The Canadian Press,

Wiltshire Dairying Reports Biggest Year In Co's History

More butter was manufactured in 1961, and more money paid to patrons than in any one year since the company started in business, it was revealed at the recent annual meeting of Wiltshire Dairying Co. Ltd. A total of 657,815 pounds of butter were made, and \$371,456.22 was paid to patrons for cream. The financial statement also showed a net profit for the year of \$6,643.80 over income tax was paid. Feed sales for the year were up some \$10,000 over the previous year to \$77,147.97. H. J. MacDonald, dairy superintendent for P.E.I., addressed the meeting on production figures of butter and cheese on P.E.I. and in Canada as a whole. He said that some 5,800,000 pounds of butter were manufactured in Prince Edward Island in 1961, and 350.4 million pounds in all of Canada. Also dwelling briefly on the butter surplus in Canada, he said that although Canada has a large surplus, the Maritimes did not, and that P.E.I. could easily sell 2,500,000 more pounds of butter if it could be produced. MacKinley Bros. of North River received the silver bowl donated by the Royal Bank of Canada for the largest amount of butter fat in 1961, having sent 7,297.51 pounds to the dairy. Upton Crest Farm received first prize of \$25 for patrons having the largest increase in butterfat over 1960, having an increase of 1,994.45 pounds.
