NEW YORK

NEW YORK (AP) — Stocks drifted lower Wednesday as the effects of the steel strike spread further throughout the economy.

Steels, motors and rails, all tied in with the steel impasse, were subjected to the most selling pressure.

Oils, chemicals, aircrafts and electronics generally declined. One strong spot was in tobaccos, which climbed.

More layoffs were tied in with High Frequency, Ultra High Frequency and microwave but these frequencies are definitely line-of-sight transmission.

Radio transmission licences in Canada haverisen to 54,000 from 12,000 in the last decade.

One of the most important questions is the cost factor.

A commercial company spokesman said it is not just a matter of flicking a switch and speaking into a microphone. He said operating a radio transmitter involves the know-how of getting messages through even in climatic upheavals.
