Mensa Makes Arrangements To Test French-Canadians

MONTREAL (CP) — Mensa, the international society for people with high I.Q.s, has just completed arrangements to test French-Canadians in their own language.

Most of the group's 9,000 members are English or American, but local groups now are forming in France, Germany, Sweden and The Netherlands. Psychologists in Montreal and Quebec City have devised appropriate tests for French-Canadians.

Mensa, named for the Latin word for table, was founded in England in 1945 to provide a pre-selected group of intelligent people for psychological research. Over the years, members have set up groups for everything from insurance to literary magazines and mountain-climbing.

The heart of the society is the Mensa Register, a list of members with their special knowledge and interests cross-

ferred to a complete table. The members range from computer wizards and farm laborers to excitable schoolgirls and quiet country ministers, and are scattered through 50 countries.

Admission to the society is by test only. The applicant is sent a one-hour test to write at home. If he scores clearly above the average in this test, he is invited to take a three-hour battery of tests, under supervision.

There are about 100 Canadian members of Mensa, based mostly in Toronto and Montreal, with small groups in Vancouver, Ottawa, Quebec, and Peterborough, Ont.

PLAN YAK SHOTS

Last fall 100 veterinarians began criss-crossing the Himalayan mountains, attempting to vaccinate the Terai plain's 5,000,000 buffaloes and yaks against rinderpest.

Steel Strike Threat Sparks Two Worries

CLEVELAND (AP) — "President Johnson could stop a steel strike before it started—but he probably wouldn't," Steel magazine said Sunday.

The national metal-working weekly noted that the president could invoke the Taft-Hartley Act to halt the threatened nationwide steel strike May 1.

The magazine said metal-working executives with employees belonging to the Steelworkers Union have two worries as they await a settlement in the steel labor industry talks.

Steel said those executives fear a settlement that's too expensive for them to match, meaning they would have to push for compromises from the union when their contracts are reopened.

FEAR HEAVY DEMAND

"They fear USW emphasis on pensions and supplemental unemployment benefits. The overall outlook is for a repeat of the auto industry story, most executives tell Steel."

Even if there is a strike, Steel said, strike hedge inventories probably won't be a burden because consumption is brisk. Both consumer goods and industrial equipment sales gained in the first quarter, the magazine said.

Steel said the current inventory build-up is equivalent to 3.1 months' supply, compared with 4.1 months in 1959 when there was a steel strike.

The publication estimated that mill output this week will be 2,790,000 net ton.

BOND MARKET

TORONTO (CP) — Short-term Canada issues continued to move lower in light trading on the Canadian bond market last week.

Losses of five cents pitted the short-term market. The 3 1/2-per-cent Oct. 1, 1967, issue closed at 98.45; the 3 1/2-per-cent Dec. 15, 1966, issue at 100.45.

Long-term Canada prices strengthened early in the week, but the market failed to hold to the higher levels and closed unchanged. The 5-per-cent issue maturing 1971 was quoted at week's end at 100 1/2 bid and

\$100 1/2 asked; the 5 1/2-per-cent 1990 issue at 102 1/2 bid and 102 1/2 asked.

Fractional losses led the provincial market lower. Three 5 1/2-per-cent issues maturing 1985 featured market action: the first, Ontario Hydro, was at \$99 1/2 bid and \$99 1/2 asked at week's end; the second, Alberta Government Telephone, was at \$99.25 bid and \$99.50 asked; and the third, Province of Nova Scotia, was at \$98 1/2 bid and \$99 1/2 asked.

Heavy demand for day-to-day money moved the rate higher. The \$165,000,000 available was at 3 1/2 per cent, up 3/4.

After a month of declining yields, Treasury Bills moved higher. Both 91- and 182-day bills gained .03 per cent, the 91-day bills to 3.67 per cent, the 182-day bills to 3.77 per cent.

MIAMI (AP)—Four refugees walked barefoot Saturday after a six-day ordeal in a boat. During the trip from Cuba they said they ate a raw shark to survive. They had vowed that if they reached Miami they would forgo shoes for a week. The U.S. Coast Guard brought the four to Miami, where they checked into the Cuban refugee centre Friday.

Empire Life Aims To Boost Capital Figure

KINGSTON, Ont. (CP)—H. H. Blakeman, vice-president and managing director of Empire Life Insurance Company Ltd. said Saturday a special meeting of shareholders is to be called to approve an application for an increase in authorized capital. A date has not yet been set.

He said revision of the company's capital is a technical matter, resulting from legislation in Alberta which makes it mandatory for life insurance companies other than those federally licensed to have a minimum paid-up capital of \$500,000. Empire Life's paid-up capital is \$320,240, he said.

The necessary adjustment can be made either by increasing the par value of each share to \$20 from \$10 or by issuing another par-value share for each one outstanding. Mr. Blakeman said.

Seafoods Company To Use Ship For Liverpool Plant

LIVERPOOL, N.S. (CP)—Mersey Seafoods Ltd. decided recently to build a new fish processing plant in this south-western Nova Scotia town.

Problem: No land. Solution: Put the plant in the water.

The result of the company's decision is beginning to take shape in the Steel and Engine Products Ltd. ship - building yard here where the keel for a \$600,000 floating fish-processing plant was recently laid. The plant will be moored near a government wharf and will be in operation by this summer.

About 75 persons are expected to be employed in the plant, which will be served with fish by three company trawlers.

Mersey Seafoods was formed about a year ago by a group of young businessmen here. President is Dr. W. M. Murphy, 32-year-old Liverpool dentist.

Ernest E. Pierce is company vice-president and general manager.

The idea of a floating plant was conceived by George Curphy of Steel and Engine Products.

LAND SITE RULED OUT

Mersey officials said the only possible site on land bordering the harbor was ruled out because of deep mud. "We didn't know how much it would cost to get pilings in there but we knew it would be far too much," a spokesman said. "It was just a matter of economics."

The three trawlers, each to be operated by a Mersey subsidiary, are expected to cost \$200,000 apiece. One trawler, the Verna and Jean, was completed in November and made a successful maiden fishing voyage.

The new plant is to be built atop a steel barge, 160 feet long and 40 feet wide. Its three floors will house facilities for processing, freezing and storing fish.

Locomotive Co. Profits Decline

MONTREAL (CP) — In the first quarter of 1965, Montreal Locomotive Works Ltd. had reduced net income of \$118,000 or 15 cents a share, compared with \$271,000 or 38 cents per share for the same period last year, said William G. Miller, MLW chairman, at the company's annual meeting Friday.

Reduced income was caused by the absence of locomotive shipments to foreign countries, Mr. Miller told shareholders.

Imperial Oil Earnings Given

TORONTO (CP)—Imperial Oil Co. Ltd. had net earnings of about \$20,600,000 in the first quarter of this year, compared with \$20,400,000 in the similar 1964 period, President W. O. Twaits told the annual meeting Friday.
