ACROSS THE ISLAND

Rare Old Mill Is Seen, Pioneer Stories Told

By NEIL A. MATHESON
Provincial Farm Editor

MANY OF the stories for this column are the result of a great deal of hunting and of research. But a few come easily, without any effort on my part. That's what happened when I drove into Albert Acorn's farm at Primrose recently and had him show me a four-horse treadmill that had been used by a neighbour to thresh grain. It's on the farm of Nelson Acorn, Albert's cousin, and we looked at it, although Nelson was away at the time.

The tread mill—they were known as "horse-power machines", in the old days—is built the same width as the old two-horse mill, but it is 18 feet, five inches long. One pair of horses stood side by side, at the front. There was a breeching pole, or rod, behind them and the second pair stood behind them, far enough away so they couldn't bite at the ones ahead.

The mill was built on the Acorn farm, John S. Cantelo was in charge of the wood work, and the name of the man who did the iron work was not available.

THE OLD rawhide leather belt is still in existence. It was tanned, at Hume's tannery at Brooklyn. He also had a tannery at Georgetown. Yellow birch bark was used for tanning and one time Leslie Hunter told me, though Hemlock was used later.

The date of the old mill was uncertain, but Albert Acorn suggested it was probably 80 years old. Apparently there were few of them made. He said one other that he knew of had been built on the Island. I've talked to hundreds of veteran Islanders and none of them had ever mentioned such a mill, until my visit to Primrose.

I went to Albert Acorn's home to meet with himself and Leslie Hunter, Strathcona, to get the history of the revival of modern plowing competition. I was asked sometime ago to do a story on plowing match history for the booklet that will be published for the Canadian Championship match at Brudenell and that's why I talked to Mr. Hunter and Mr. Acorn. Leslie has been the head of the association sponsoring the plowing competition at Dundas since 1941, and Mr. Acorn has been the secretary for 15 years, but that's for a later story.

SO FAR as Albert knows, only two of the machines were built, and both were in the Kings County area. The four-horse machine must have provided the most power that was available here for threshing, or other chores in those long gone days. It was a real job for one man to handle the straw behind the thresher with that power driving it, he recalled. An old Hall thresher and an old-fashioned fanners, still in good condition, are stored inside of the old tread mill which is a real link with the Island's past.

I have been unable to trace the horse-power mills back to their origin but a souvenir catalogue Mr. Acorn showed me indicates that they were in existence in 1855, though they may date back even further.

Sweep Horsepower Machines

ALBERT HAS a "Case 1872 catalogue Album of historical Steam Tractor Engines and Threshing Equipment "which shows horse power machines built for two and three-horses standing abreast.

The old catalogue also pictures the "sweep horse-power machines" of which C. W. Judson, 102, told me at Churchill sometime ago. Long arms, like the one on the old capstan thumping machine, radiated out from a central, large drum with cogs that transferred the power by a series of interlocking cogs to a central rod which looks much like a modern "power take off" and transferred the horse-generated power to the machine it was to operate.

Mr. Judson told me of a four-horse power machine operated in this fashion, but this book pictures 12-horses, six two-horse teams pulling on the end of a half-dozen radial arms. The teams went around in a circle and a man stood on the central drum affair with a long whip, to keep the horses alive to their pulling responsibility.

Lady Shears 400 Sheep, 5c Each

MRS. ROBERT MacDonald, 95, recalls the time she took the wool from the back of a sheep and processed it until it was worn proudly on the backs of members of her family. She told me about it recently at her home in Little Pond.

The former Mary Ellen Blackett of nearby Grand River took the wool from many sheep. She sheared 400 of them one spring and received all of five cents for each of them. If that sounds like earning money the hard way, let's agree that it was. But money was worth much more in those years, the $20.00 was not so bad as it seems.

She sheared up to 32 sheep in a single day and that was with the old fashioned shears, not with today's modern electric clipping equipment.

Mrs. MacDonald recalls shearing sheep at one farm where she had an encounter with a ram, and those animals were almost invariably bad tempered treacherous, dangerous rascals. **THE RAM** was tied with a rope but he became increasingly hostile as he watched her catch and shear one sheep after another. Finally the ram broke clear as Mrs. MacDonald was catching a sheep. He came at the woman with evil intent, but she dropped the sheep she had caught, turned her attention to the ram and surprised a neighbour who rushed to her rescue.

When the would be rescuer arrived, the ram was down on the ground, and the lady was lying triumphantly on top of him. Yes, she sheared the rascal too, whether he liked it or not. She also milked seven cows every morning, when she was 15 years old.

Times Were Better In Those Days

IF YOU are inclined to pity the woman of those days who sheared sheep and did many other heavy chores, forget it. Mrs. MacDonald insists that times were much better in the olden days. "Everything's so dear now", she told me, "it's past living."

It was Frank MacDonald, manager Robinson's Supplies, Charlottetown who told me about the Little Pond woman—that's where Frank came from—and she did recall the days when people were clothed from top to toe in garments made from sheep's wool. Often the wool was carded at home, though there were carding mills that did the job. And the finished cloth was often dyed or colored at a mill established for that purpose. The carding mill for that area was at Morrison's mills. It's known as Whitlocks now.

A paragraph I found in a Centennial essay emphasizes the part woolen wearing apparel played in the earlier days. Mrs. Nellie Fraser, Montague said "for school in winter we wore thick woolen dresses, wool in underwear, hand knitted long woolen stockings, and boots laced or buttoned. Over the boots we wore long knitted woolen overstockings and rubbers. We had woolen hoods, or caps. Warm coats and big scarves and mittens."

And this is in keeping with Mrs. MacDonald's statement that every farm had its little flock of sheep when she was young.

Cheese Made At Home At Time

MRS. MACDONALD recalls when cheese was manufactured at home. She would be 14 when the first cheese factory was established in this province—and rennet to curdle the milk, was made from a calf's stomach. The piece from the stomach would be filled with new milk, then it would dry, and pieces would be sliced from it to use when cheese was to be made.

The Pioneer cheese factory in Canada was opened 100 years ago, a story this week from the Canadian Dairy Foods Service Bureau indicates. It adds that the first factory in this province opened in 1892, was the first in the Maritime Provinces.

The fine old lady lives with her son, Stillman MacDonald and his wife, the former Mabel Gourley of Stewiacke, N.S., who recalls that they always made maple sugar for their family at home. A small grove also supplied seven to eight gallons of tasty maple syrup which was used mostly on desserts, and sometimes on buckwheat pancakes, a food really fit for the gods.

Chaisson Name Was Intended

I AM sorry that I used the name Cheverie instead of "Chaisson" when I referred last week to the popular family of Bear River violinists whom I saw perform at a provincial fiddling contest at the Forum some years ago. The Cheverie name came naturally because I recall being told of Mr. Cheverie who performed with unusual skill in days gone by and once was a winner, I was told, at an international competition in Boston's Colonial Hall. He lived in Elmira.

The Chaissons I was talking about from Bear River put six competitors into the old fiddling contest to which I referred. They were Peter Simon Chaisson, who died in March 1961, and his sons, Peter, Joseph, Emmett Bill and Roddie. Peter won the Island title that time and Emmett and Bill were provincial champs on other occasions. Ken Chaisson won the junior competition last Saturday.

DAILY MARKET QUOTATIONS

SUMMARY

By THE CANADIAN PRESS
Toronto — Market sharply lower; moderate trading.
New York — Market sharply lower; moderate trading.
Montreal — Market sharply lower; moderate trading.

CURRENCIES

MONTREAL (CP) U.S. dollar closed $1.08 1-32, asked $1.08 1-16.

Pound sterling closed $3.02, asked $3.02¼.

LIVESTOCK

TORONTO (CP)—Prices were steady on a moderate demand for good and choice grades of slaughter cattle at the Ontario public stockyards Thursday.

Heavy medium steers were difficult to sell. Cow and bull prices were firm.

Veal calf prices were steady. Hog prices were higher and sheep and lamb prices steady.

Slaughter cattle 1,426: Choice steers 24-24.50 with odd tops to 25; good 22.50-23.50; medium 20-22; common 17 - 19; choice heifers 22-23; good 21-22; medium 18-50; common 15-17; choice fed yearlings 23-25; good sales to 15.50, 14-16; bulls 10-7; canners and cutters 12 - 15.50; good heavy Bologna bulls 19.50-20 with odd tops to 21; common and medium 17-19.

Replacement cattle 300: Good light stockers 23-26; medium and common 20-22.

Calves 138: Choice vealers 32-34; good 28-31; medium 23-27; common 20-23; boners 15-20.

Hogs 2,153: Grade A at Toronto 29.05-29.85 closing at 29.85; heavy sows 19.75-19.95.

Sheep and lambs 50: Good spring lambs 35 per hundredweight; sheep 4-12.

MONTREAL (CP) — Prices on the Montreal livestock markets were steady to slightly higher this week. Trading was active under a good demand.

Receipts: 1,286 cattle, 1,978 calves, 403 hogs, 170 sheep and lambs.

Choice steers 24.50-24.75, good 23-24.50, medium 21.50 - 23.50, common 16.25-22.

Good cows 17-19, medium 16-17, common 15-16, canners and cutters 14.50-15.

Good heifers 20-22, medium 18.50-20, common 10-18.75.

Good bulls 18.50-20.75, common and medium 10-18.75.

Good vealers 25-29, few to 31, medium 20-25.50, common 15-21.

Grade A hogs 29-28.75, sows 17.50-18.25.

Sheep 6-10, lambs 35-45.

NEW YORK

NEW YORK (AP)—The stock market was thrown Thursday for its worst loss of the current year — its sharpest, in fact, since the panic selling on Nov. 22, the day President Kennedy was assassinated.

The decline, however, was less than half that of Nov. 22 and the volume of 4,800,000 shares was below average for 1964. It compared with Wednesday's 3,990,000, the year's smallest.

Another difference was that Thursday's decline was not linked to unsettling news but was a technical retreat based on the fact that the popular averages failed to hold above the support level which has provided a "floor" these last 10 weeks.

Traders thrust the Dow Jones industrial average down below 810.77, the closing figure of April 30, they began to unload at an increasing rate.

The Dow industrials fell 9.31 to 802.48, the steepest drop since the plunge of 21.16 on the tragic Friday last November.

Sales of new cars in May were at a record-breaking pace. Cotton and copper futures were strong. Rail carloadings were above a year ago. The price of railroad steel scrap rose in Pittsburgh.

Prices fluttered to the upside for a few minutes after the opening, then settled into a slow, irregular decline.

Steels, motors, rails, oils, airlines, retails, chemicals, nonferrous metals, oils and most major groups joined in the shakeout. Most utilities yielded ground grudgingly, performing their traditional role as "defensive" stocks.

Of 1,380 issues traded, 863 fell and 242 rose. New highs for the year totalled 19, new lows 114.

The Associated Press average of 60 stocks fell 3.3 to 300.7.

The loss was the worst since Nov. 22 when the AP average fell 7.2.

An estimated $4,800,000,000 was shorn from the quoted value of stocks listed on the New York Stock Exchange, based on the fall in the AP average. It compared with an estimated $10,500,000,000 drop on Nov. 22.

Of the 15 most active stocks all declined except Sperry Rand which closed unchanged following a report of greatly increased profits.

Among Canadian issues Dome Mines rose ¾, International Nickel dropped ¾, Canadian Pacific ⅝, Aluminum Ltd., Distillers Seagrams and Hudson Bay Mining each ¼. Canadian Javelin eased ⅛.

MONTREAL

MONTREAL (CP) — Prices on the Montreal and Canadian Stock Exchanges had their worst declines of the 1964 trading season Thursday.

The composite index sank 2.2 to 144.6, the largest drop in a single day since the recession of June 1962, when it fell 2.3 points June 22.

Declines swamped advances 137 to 43.

It seemed a technical decline, not related to any specific financial news. Prices had been falling slowly since Tuesday and profit takers began to unload Thursday afternoon.

Industrial trading was extremely active in the last half hour after a moderate day, with a total turnover of 196,400 shares. Mines and oils were moderate on 661,600 shares.

Industrials suffered the greatest losses, declining 2.4 to 147.9 as trading snowballed toward the close. Asbestos and CIL lost ¾ each to 20¼ and 19, and Southam ½ to 29.

UTILITIES, PAPERS OFF

Utilities shumped 2.3 to 134.9. Interprovincial Pipe Line lost 1½ to 85, Bell Telephone one point to 55⅝, CPR ⅞ to 43⅝ and Trans-Canada Pipe Line ¾ to 38¾.

Nova Scotia Light and Power rose ¾ to 26¾.

Papers were off 1.7 to 132.8. Banks were relatively firm, slipping only 0.2 to 126.1. Banque Canadienne Nationale climbed two points to 79. Royal Bank dropped ½ to 74½.

Senior base metals suffered heavy losses.

Among machinery issues, Massey-Ferguson declined one point to 28⅝, CAE ⅞ to 9½ and Hawker Siddeley ¼ to 7⅞.

Among primary metals, Algoma was off 1¼ to 67⅝, Aluminium ⅞ to 31⅜, Canadian Iron Foundry ¾ to 37⅞, and Dosco ½ to 18.

Total Sales: Industrials 196,400, mines and oils 661,600.

TORONTO

TORONTO (CP)—The industrial and western oil indexes suffered their worst losses on the stock market Thursday since the present index system was initiated in Nov. 1963.

Industrials were down 2.05 to 153.85 and the western oils 3.25 to 97.58. The Exchange index was off 1.97 to 143.73 and base metals .81 to 63.08. Golds were ahead .50 to 134.99. Volume for the day was 5,163,000 shares compared with 4,422,000 shares traded Wednesday.

The sharp loss was reflected in that of 797 issues traded a whopping 382 declined while only 128 advanced.

In the industrial list, recent favorite Massey-Ferguson and CPR lost 1¼ to 28½ and 45¾ respectively. Dominion Textile took its second straight $1-plus loss, dipping 1¼ to 35¾.

Western oils all down large fractions.

Falconbridge gave up ¾ at 71½ in the weaker base metals group. Noranda slipped ¾ to 45, inco ⅝ to 85½ and Cominco ½ to 34½. Leitch was one of the few bright spts as it gained 25 cents to $5.

Golds were the only bright spot. Giant Yellowknife gained ½ to 11¾ and Aumor five cents to $3.70. Hollinger dipped 1 to $27, a 1964 low.
