NEW YORK

NEW YORK (AP)—The stock market seesaw continued with another mild movement Tuesday. Both the popular averages and the market statistics pointed slightly lower.

Turnover continued routine, 3,340,000 shares compared with 3,160,000 Monday.

GAINS OUTNUMBERED

Of 1,318 issues traded, losers outnumbered gainers by 591 to 538.

The Associated Press' average of 60 stocks took a moderate loss of 6 at 389.7.

101-YEAR-OLD GETS INSURANCE

MOUNT FOREST, Ont. (CP) — When Wellington Co-operative Medical Services boasted in advertisements it would insure anyone regardless of age or condition, along came John J. McLellan of Mount Forest.

Mr. McLellan wasn't too concerned with the condition clause, since he had never been sick. However, he was interested in the lack of limitations on age.

Mr. McLellan is 101.

Despite his advanced age he had no difficulty in obtaining a policy that covers him for doctors' calls to the home or hospital. Representative Lorne Darroch, who drew up the contract, in a written explanation to the co-operative, pointed out that Mr. McLellan had a hernia operation last fall (after his 101st birthday) and was home from hospital in three days.

"He lives alone, does his own housekeeping and gardening and reads without the aid of glasses," wrote the astonished Mr. Darroch.

Low Lake Level Boosts Market For N.S. Coal

TORONTO (CP)—The Hydro-Electric Power Commission of Ontario said here it will have to spend $40,000,000 on soft coal this year to provide steam-generated power because of falling water levels on the Great Lakes.

A spokesman for the commission said in an interview the water levels in the lakes are the lowest in 104 years and the problem is compounded by increasing demands for electric power.

About $4,000,000 worth of the coal will come from Nova Scotia and the rest will be purchased from the United States.

He said although cost-a-ton for fuel from the two coal-producing areas were about the same, Cape Breton coal fields could only produce about 450,000 tons of the specific grade required.

The U.S. orders are expected to reach about 4,000,000 tons.

The order from Nova Scotia is in addition to what the province's coal producers expected to sell this year.

Mongolia Gets Recognition From Canada

By DAVE McINTOSH

OTTAWA (CP)—The Canadian government has decided to recognize Mongolia, a communist buffer state of 3,000,000 people between Russia and Communist China, it was learned here. The two countries will not exchange missions.

Informants said the government is fully aware that recognition of Mongolia will be interpreted as a prlude to Canadian recognition of China.

They added that this interpretation may or may not prove correct. If the government decided against recognition of China, it could argue that the previous administration's recognition of Albania, an ideological partner of the Chinese Communists, did not herald a similar diplomatic move in regard to Peking.
