Atlantic Research Program Is Aim Of Teachers In N.S.

HALIFAX (CP)—The Nova Scotia Teachers Union has decided to seek co-operation of the other Atlantic provinces to promote an in-service program for teachers interested in research.

The move was contained in one of a number of executive recommendations adopted at the NSTU's 43rd annual council which ended four-day sessions here. More than 200 delegates attended.

FEES RAISED

Council authorized an executive recommendation calling for an upward revision of fees which now will be a minimum of $17 a year for members making up to $1,500 and a maximum of $57 for those making more than $6,000. Provision was made for further revision in 1965.

New Bomb Blast Hits Singapore

SINGAPORE (AP) — A new bomb blast has hit Singapore heightening fears a terrorist campaign is underway to undermine the Malaysian government.

The bomb went off in the staircase of an apartment building, causing some damage to the building and shattering a number of windows. Police said no one was injured by the explosion, the fourth in a month.

A series of bombings in Singapore last year were blamed on Indonesian agents.

New Fossils Of Man Called Most Important

WASHINGTON (AP) — Dr. Louis S. B. Leakey, a British anthropologist, has announced discovery in East Africa of a new species of primitive man he believes to be the direct ancestor of modern man.

Fossil parts of five individuals were found in Tanganyika by Dr. Leakey and his wife, Mary, he said.

The discoveries "may rank some day as the most important in our knowledge of human evolution," he told a press conference at the headquarters of the National Georgraphic Society which supports his work.

The new species, he said, is almost 2,000,000 years old and adds about 1,500,000 years to the ancestry of man.

He called the new species "homo habilis," meaning a man able to do things.

He spoke of finding the skull parts, portions of the upper and lower jaws of a woman 20 or 21 years old. He also found portions of a child, an old woman and other individuals, he said.

Homo habilis he described as small—about 3½ to 4½ feet tall at the maximum—with the possible ability of speech because of its jaw structure.
