STOCKHOLM - (CP) - Gross freight revenues of the Swedish Merchant Marine increased about 43 per cent last year, when the total reached \$270,000,000. Higher freight rates accounted for most of the increase.

Reports Next 3 Years' Industrial Expansion To Top 1951 Record

Capital expansion being planned by Canadian manufacturing, utility and mining industries over the next three years will exceed the record rate of investment attained in 1951, reports Mr. Mitchell Sharp, associate deputy minister of Ontario trade and commerce. Addressing annual conference of the provincial governments' trade and industry council at Lindsay, Ont., Mr. Sharp, seen above, predicted that a total capital outlay of some \$5,000,000,000 is involved in the projects now underway or being planned by these three groups of industries.

Provinces To Get Hearing On Truck Control Appeal

(Financial Post)

The British Privy Council has ruled it will hear an appeal from three Canadian provinces on whether the Federal Government or the Provincial Governments have the right to control long-haul truck and bus traffic in this country. When delivered, the Privy Council's judgment will end an Ottawa-provincial legal hassle which has kept tempers hot for 20 years.

The Privy Council ruling is in connection with the now-famous MacKenzie Coach Lines case, in which the Supreme Court of Canada handed down a judgment almost a year ago. (The Financial Post, Oct. 27, 1951). Because this judgment created a legal precedent which would have deprived Provincial Governments of some of their present authority over commercial motor traffic, Ontario, Alberta and Prince Edward Island applied to the Privy Council to appeal the Supreme Court judgment. (The Financial Post, May 31, 1952).

To Be Heard In London

The full-dress appeal will be heard in London, most likely in the fall of next year. Ranged on one side will be the Attorneys General for the three provinces already in the lists, plus New Brunswick which has made known its intention to join them. Also supporting the provinces will be the Canadian Automotive Transportation Association, national truckers' group, represented by two of its member firms.

The other side will be the Attorney General of Canada, appearing for the Federal Government, as well as counsel for Canadian Pacific and Canadian National Railways, who will also represent Mackenzie Coach Lines, one of the original litigants.

Important Development

One important development in the case is that at the recent London hearing there were signs the Federal Government may seek to gain from the appeal even wider powers over trucks and buses than it would receive as a result of the Supreme Court judgment.

Wanted

WANTED - SAW BENCH WITH-out saw. W. R. Boyer, Bunbury.

GREATER REVENUE

STOCKHOLM - (CP) - Gross freight revenues of the Swedish Merchant Marine increased about 43 per cent last year, when the total reached \$270,000,000. Higher freight rates accounted for most of the increase.

U. S. STEEL

CLEVELAND, Sept. 28 - (AP) - Does the United States need a bigger production capacity for hot-rolled steel bars, among the scarcest items on the market? Not necessarily, Steel magazine says today.

The metal-working weekly says bar manufacturers simply are not using all their capacity. In 1949 an American Iron & Steel Institute survey showed the United States had a hot-rolled bar capacity of 22,700,000 net tons. The capacity remains about the same even though only 10,800,000 tons were produced last year, Steel says.

The steel industry, however, is channeling an increasing percentage of its output into the bar mills. In the first half of 1952 hot-rolled bars comprised 14.5 per cent of all mill shipments of finished steel. For all of 1951 the rate was 13.7 per cent.

N. Y. Stocks In Best Gain In Two Months Last Week

NEW YORK, Sept. 28 - (AP) - The stock market shook itself free from the restraining hand of reaction last week and made the best gain in the last two months.

The upturn was modest in character and it was put back at the end of the week. But it was accompanied by heaviest volume since early June.

Such a showing of strength with the market up for the second straight week gave immediate hope that the reaction had ended.

Bulls are hopeful that one more forward push will send the market ahead into what they fondly regard as a pre-election rally.

The expansion of volume last week gave them a good technical basis for their hopes. Trading amounted to around 6,250,000 shares, the best since early June.

Men in the market place aren't too free with their predictions of what they expect will happen in the stock market when either Eisenhower or Stevenson is elected president.

Some suggest that the market is apt to make a sharp readjustment right after the election no matter who is named as various elements in the business buy or sell in response to their preconceived notions of what the market will do.

Last week the railroads were the strongest segment. Radio-television issues constituted another segment of the market that took a look into the future and started up along with the railroads.

The five most active issues on the last week were: International Telephone up 3/4 at 18 1/2 with 116,300 shares traded. National Distillers off 1/4 at 20 1/2. St. Regis Paper up 1/4 at 20 1/2. R-K-O Pictures off 1/4 at 4 1/2. and Radio Corp. up 1/4 at 27 1/2.

Among more active Canadian stocks on the big board, nickel and

Canadian Consumer News

Prince Edward Island Branch Report

Prince Edward Island is just becoming conscious of the work the Canadian Association of Consumers is doing and the great possibilities and advantages of such an organization. Last November Mrs. Walton spoke to a handful of interested women in Charlottetown and from that meeting a strong branch extending from one end of the island to the other has sprung. The campaign for membership did not get under way until February and in spite of storms and other setbacks the enthusiasm grew; when our accounts were closed on July 31st, we found we had close to 150 paid-up members and, what is more gratifying, the confidence of both merchants and consumers and a general feeling throughout that here is an organization that can really tackle our economic problems intelligently and if not able to straighten out the many tangles, can at least tell us why they are tangled.

One of the first projects of the P. E. I. Branch was the inauguration of a weekly column in each of our daily papers under the captions "CAC Reports" and "Canadian Consumer News". We were able to bring the aims and objects of the Association before the public and to report on the various activities of the different Provincial branches and the great work our members are doing to give information and advice to shoppers locally. We are very grateful to our local press for this opportunity and hope for the same co-operation when we get going this fall.

The Women's Institute, which is by far the largest and most influential group of women on the island, responded most generously to a letter sent out to all branches through the courtesy of the Provincial Headquarters and in July I was asked to speak at a number of their district conventions. I travelled the length and breadth of our fair province and enjoyed every minute of it. The meetings were well planned and interesting and I met charming, clever women who are doing a great work for their different communities as well as the never-ending chores which go with life on the farm. I was given undivided attention everywhere and all seemed eager to know what this CAC meant and what it was doing. I am confident that when their meetings start in the fall the bulletins will be read with interest and memberships and support will be given.

A number of complaints were forwarded from this branch and all received prompt attention from their office. A campaign was started in a small way to arouse the public on the importance of

getting the best value for our money in buying the loaf of bread which shows up on every shopping list. I believe we got the idea across that whole wheat was so much more nutritious than white, and until something was done about Canadian Approved flour far as it goes, by our National Executives in their fight for more vitamins in our Canadian flour and better regulations regarding our bread.

We are all interested in the effort to have better labelling and truer sizes on our children's and women's clothing. At our annual meeting in July we voted to support the two resolutions concerning textiles and clothing standards from the Saskatchewan Branch and are tackling the problem locally by interviewing the managers of the large retail stores personally, as there is no Retail Merchants Association existing on the island now.

To build community support and understanding is neither simple nor easy and in times of economic stress and in the face of the many appeals to the citizens' purse our services must not be tested and found to be unknown or misunderstood. A continuing program of public education and the fostering of citizen-interest will yield rich dividends in the future.

Canadian Pacific closed the week all down by fractions. Nickel was off 1/2, Canadian Pacific 1/2. Distillers was unchanged but 2 1/2 points under its 1952 high.

On the curb, Royalite ended the week off 1/4.

India To Quit Tea Publicity Board

NEW DELHI, Sept. 28 - (Reuters) - India has decided to quit the multi-million dollar International Tea Publicity Board and set up an advertising agency of her own, it was reliably learned here.

The step is an economy measure because the India tea industry now experiencing a slump, has found the board's levy to heavy a drain. India's contribution to the annual \$2,100,000 budget has been 30 per cent.

If India quits only Ceylon and Indonesia will be left. Pakistan left recently for economy reasons and Indonesia's levy was reduced.

The organization, the International Tea Market Expansion Board, was set up in 1936 to boost tea sales on world markets, notably in Canada and the United States.
