Centennial Title For Blood Clinics

"Be a Centennial Blood Donor" is the slogan adopted for 1964 by the provincial Red Cross blood donor committee whose chairman is F.M.S. Jones of Charlottetown.

In a letter sent recently by Mr. Jones to the blood donor chairmen at all the centres throughout the province in which these Red Cross clinics are held, he stressed the importance of achieving the goal of at least 100 per cent in every clinic conducted during Prince Edward Island's "Centennial Year".

Mr. Jones further pointed out that the urgent need for a continuous and reliable supply of human blood is such that all must assist in maintaining an unrelenting campaign for the replenishment of all that is used.

"No one of us is immune to the constant likelihood that blood will be required to restore our health, or save our life," said Mr. Jones, who went on to point out that the responsibility for maximum effort in conducting clinic campaigns must be accepted by each community with the full knowledge of the serious

consequences which occur when a clinic is not successful. He remarked that this type of campaign is not like a financial one because if many people do not give their share there is no wealthy patron to fall back on.

"The Canadian Red Cross blood transfusion service is acknowledged to be the finest in the world," Mr. Jones continued, "and the response from donors in Prince Edward Island is among the best in Canada."

He concluded by issuing a challenge to all residents in the province who are of good health and between the ages of 18-45 years to make an all-out effort to be donors in 1964 so that this year achieve the desired 100 per cent response at every clinic.

April 1, 2 and 3 will be "Blood Donor Days" in Charlottetown when clinics will be held at Zion Church in West End, objective of at least 1,065 donors.

Heavy Winds Halt Sealing

High winds prevented any continuation of the seal hunt in the St. Peter's area yesterday. A few planes flew scouting sorties and it is reported that they could not find the herd. The winds are also said to have broken the ice up quite a bit. This is true would make it difficult for the planes to land on the ice to retrieve any pups.

Heavy Winds Two U.S. Flyers Freed By Russia

WIESBADEN (AP) — Two U.S. flyers were released in the Russians Friday and arrived in West Germany in apparent good health 17 days after a Soviet fighter shot down their reconnaissance plane over Communist East Germany.

The Soviet Union and East Germany repeated charges that their RB-66 flew over East Germany deliberately "for purposes of military reconnaissance" but were "expelled" because Washington expressed protest.

Capt. David I. Holland, 34, of Holland, Minnesota, and Melvin J. Keseler, 26, Philadelphia, arrived at the Western allied checkpoint at Heimsdorf on the East German frontier in an army sedan.

Two U.S. Flyers Freed By Russia

WIESBADEN (AP) — Two U.S. flyers were released in the Russians Friday and arrived in West Germany in apparent good health 17 days after a Soviet fighter shot down their reconnaissance plane over Communist East Germany.

The Soviet Union and East Germany repeated charges that their RB-66 flew over East Germany deliberately "for purposes of military reconnaissance" but were "expelled" because Washington expressed protest.

U.S. officials announced Thursday that the two would be released under arrangements made through Anatoly Dobrynin, Soviet ambassador to Washington.

For a time the Russians talked of trying the airmen in espionage. Washington argued Moscow last week that relations between the two countries would be jeopardized unless the two were freed.

In announcing release of the two airmen, a Soviet spokesman in Berlin asserted their plane penetrated 70 kilometers (43 miles) into East Germany. Since it did not comply with orders to land, Soviet armed forces with East German agreement "took the necessary measures" for the protection of the air space, he said.

A third airman aboard the plane, Lieut. Harold W. Welch, 24, of Detroit, was released by the Russians March 21. Welch was the only one injured when the plane 30 miles inside East Germany March 10.

JOHNSON PLEASED At his Johnson City, Texas, sweet Turkish coffee—the traditional Cyprus offering of welcome.

As the UN force took over, UN Secretary-General U Thant made a special appeal to the government, leaders and people of the island "to exercise the greatest restraint and collaborate with the United Nations in the restoration of peace and normal conditions."

He said the future happiness and well-being of the country are at stake and added that there could be no nobler endeavor than "for all to strive to put an end to bloodshed and violence and co-operate again with each other so that a peaceful solution and agreed settlement for the problems confronting Cyprus may be reached."

At another point down the green line at Trakhanas a group of Greek-Cypriot policemen played just to Sgt. Maurice Sabourie of Quebec City. The Canadian sergeant was taken to an advanced Greek post by outgoing British paratrooper Sgt. Bill Collins to be introduced.
