### Police Negligence.

To the Editor of the Examiner.  
Although our Police Force cannot be at the best of times, complimented for faithfully discharging their duty, it is depreciated that too often their inattention and cowardice reigns supreme.  
On Saturday last about 4.30 p. m., there could be seen at Heartz pump on the corner of Great George and Fitzroy streets, a very intoxicated individual seated in a wagon but who had not the least control over the horse immediately ahead.  
In attempting to dismount he fell helplessly at the horses feet, unable to lift himself up. A Knight of the baton Policeman B— ran from Mrs. Tierney's corner in the immediate vicinity and assisted the "poor unfortunate" in regaining his seat, after which he in the coolest possible manner started off the horse at full speed. A citizen near by seeing the wrong manner in which the Policeman was acting remonstrated with him, remarking that it was his duty as a public servant to look after persons who may accidentally become incapable. Mr. Policeman B coolly remarked that he did not care, or his reply was couched in language equally careless.  
Mr. Editor, the question naturally arises, Are our citizens at the mercy of a number of men who knowing their duty, do it not? I have been informed that our Stipendiary Magistrate will always soothe the members of the police force when dereliction in duty is reported to him. It is to be hoped that a new state of things will be soon inaugurated, and the safety of our people be a matter of consideration.  
Yours, &c.,  
Aug. 23, 1880. SAFETY.

### Finances of Canada.

The Halifax Herald publishes the following statement of revenue and expenditure for the year 1879 80

Estimated Expenditure,	\$24,978,000
Supplementary Estimate,	95,000
Total,	25,073,000
Estimated Revenue,	24,450,000
Estimated Deficit,	623,000

The actual results are as follows:—  
Total Expenditure, \$25,161,712  
" Revenue, 24,768,585  
Actual Deficit, \$ 393,127  
" This deficit," the Herald remarks, "is 40 per cent less than Sir Leonard Tilley's estimate, but even this small deficit would not have appeared were it not for extraordinary causes. We are informed that owing to the large deposits in the Savings Banks, nearly \$100,000 more was paid for interest on these investments than was anticipated. The disbursements upon the Indians were also owing to a number of extraordinary causes, some \$200,000 in excess of the estimates; these sums, together with the \$100,000 voted for Irish relief, would considerably more than square the year's accounts."  
The St John Sun presents the figures in this way:—  
The gross estimate for revenue was..... \$24,450,000  
The actual revenue on the basis named above, is..... 24,778,585  
Or a sum better than the estimate by..... \$318,585  
The actual expenditure was... \$25,161,712  
Against an estimate of..... 24,978,000  
Or a difference of only..... \$183,712  
Sir Leonard estimated a deficiency of..... \$528,000  
Whereas the actual deficiency is only..... 393,127  
Being better than the estimate by..... \$134,973  
This is in remarkable contrast with some of Sir Richard Cartwright's years.

### Tunnel Under the English Channel.

The preliminary excavations for this enterprise are being actively pushed forward at Sangatte, near Calais, at a spot where the cliffs have an altitude of seventy feet above the level of the sea at high water. A point has been chosen where the rocks of gray chalk which have to be traversed by the tunnel come to show their heads at surface of the soil. On the opposite shore similar borings have been begun, so that the works are proceeding simultaneously. The soundings that have been made during the last few years demonstrate that the base of the Channel consists of a compact mass of chalk, resting on banks of slate. This mass, which is easy enough to pierce, is said at the same time to resist filtration sufficiently. It would, therefore, present a substance excellently adapted for perforation. But what yet remains to be proved is whether the succession of these chalk layers will not disclose some irregularities or ruptures which would render the enterprise impossible.  
The shaft at Sangatte has now reached a depth of nearly 200 feet, or about 130 feet below the level of high water. It has a width of ten feet, and is lined with oak, so that the water cannot penetrate it very

freely, not more than seventeen gallons a minute. This water is not salt, which is thought to prove that the lawyers hitherto traversed have their points of contact sufficiently far from the shore to prevent the sea from ascending the shaft. It is intended to sink to a depth of 300 feet, and then a gallery will be excavated in the direction of England. Up to the present the Engineers are highly satisfied with the results obtained, as no irregularities have been discovered, which is considered a good augury for the success of the enterprise. It is impossible, however, to proceed at a quicker rate than twenty inches a day. Nevertheless, in eighteen months or two years enough progress will have been made to arrive at a perfect understanding about the possibility of the undertaking. It is stated that the work will not fail through lack of funds.

### Latest News Notes.

The Porte in its note to the Powers declines to participate in the coercive measures mentioned by the Powers.  
Mr. Forster, Chief Secretary for Ireland, on Thursday held a long interview with the Castle officials and law advisers of the Crown.  
MACHINERY FOR THE SUGAR REFINERY.—Some six carloads of additional machinery for the sugar refinery, including two filters, arrived at this station this week. This is the third shipment, the total reaching about twenty car loads.—Moncton Times.  
At the rent audit of the Hawarden tenantry last week, Mr. Vicars, land agent, announced on behalf of the Right Hon. W. E. Gladstone, that in consequence of the continuance of their exceptional difficulties, he had decided to again return them 15 per cent. The Premier's health, says our correspondent, was drunk by the tenants with great enthusiasm.

When the Prince of Wales came in view, at the head of the brigade of Life Guards, at the recent review before the Queen in Windsor Park, wearing for the first time its uniform, with helmet and cuirass all complete, and bearing on his breast the full blue ribbon of the garter, such a joyous shout of welcome arose as could not have been heard from other throats than those of Britishers. The Queen's eye brightened exceedingly at this display of enthusiasm, in which she herself seemed to join, and she left the ground with a beaming look of satisfaction.

INTERESTING SCENE—Amongst those introduced to His Excellency, on Monday, was an old Peninsula officer, when the following conversation occurred: His Excellency—"How long have you been in this country?" Col. Poyntz—"Forty years ago I commanded a regiment of troops in Halifax, and 70 years ago I was with Wellington in the Peninsula wars." His Excellency—"Ah! an old Peninsula veteran?" Col. P.—"Yes, my Lord." His Excellency—"I am glad to have met you."—Windsor Mail.

At an entertainment given recently by the students of Paris in honor of the returned Communists, at which Rochefort and Blanqui were present, the toasts included that of "The Commune and its valiant defenders." M. Rochefort proposed the health of the students, and M. Blanqui attacked Opportunism, which he declared to be a greater enemy than Clericalism. Hopes were expressed regarding the emancipation of women; and the success of a European Republic and the annihilation of kings were ardently longed for. It was further suggested that it would be desirable to destroy the third estate; to expedite the coming of the fourth estate and to effect a social revolution.

A correspondent of writing from Port Bawt, Inverness, to the North Sydney "Herald," under date of August 10th, says—"Much excitement now prevails on our shores by a recent discovery made by Messrs. Cameron, Murray, Pushie & Co., of a wrecked vessel sunk in twelve fathoms of water, about a quarter of a mile from the shore. The wreck is supposed to be the barque "Benclough," from Glasgow, Scotland, bound to P. E. Island, with a general cargo, which foundered on the 29th of December last, after having apparently been dismasted. Topsail sheets, etc., were picked up a few days after. Last week Mr. Cameron, invented what he calls a deep sea microscope, by which he was enabled to view the ship. Preparations are now being made to raise her and her valuable cargo; a first-class diver being engaged."

### A Good Account.

"To sum it up, six long years of bed-ridden sickness and suffering, costing \$200 per year, total \$1,200—all which was stopped by three bottles of Hop Bitters taken by my wife, who has done her own household work for a year since, without the loss of a day, and I want everybody to know it for their benefit."  
"JOHN WEEKS, Butler, N. Y."

GILES' Liniment Iodide Ammonia cures neuralgia, face ache, rheumatism, gout, frosted feet, chilblains, sore throat, erysipelas, bruises and wounds of every nature in man or animal. The remarkable cures this remedy has effected classes it as one of the most important and valuable remedies ever discovered for the cure and relief of pain. From over-exertion, I contracted a pain across my loins. My suffering was intense. One bottle of Giles' Liniment Iodide Ammonia cured me. T. B. McGee, Conductor N. Y. and New Haven R. R. Giles' Pills cure suppression.
