MARKETS and FINANCE

N. Y. Stocks

NEW YORK (AP)—The stock market pushed ahead last week to successive new 1954-55 highs, and it came within a shade of breaking through to a new all-time peak.

The final drive capped a three-week rally that more than wiped out the losses suffered in two severe breaks at the beginning of the year.

The Associated Press average of 60 stocks last week gained \$1.70 and stood at \$157.20. That is 80 cents higher than the Jan. 3 top, and within only 50 cents of the all-time peak of \$157.70 Sept. 3, 1929.

Paramount market factor all week was the tense situation surrounding the Nationalist Chinese island of Formosa.

NO WAR SCARF

There was no hint of war jitters in the stock market. It is true that industries—such as aircrafts—that would tend to benefit from a shooting war were firm, but there was no wild buying and selling of a type often seen during war scares.

The five most active issues on the New York stock exchange were American Bosch up 1/4 at 17 1/2, Fairchild Engine up 3/4 at 20 1/2, Bell Aircraft up 6/8 at 33 1/2, Hupp Corp. up 2/4 at 6, and Chance Vought Aircraft up 7/8 at 46 1/2.

Most Canadian issues on the New York stock exchange rose at the week's close, with McIntyre up 1/4 at 74 on Friday. International Nickel was ahead 1/2 and Dome

U.S. Steel

CLEVELAND (AP)—The national steelmaking rate still is on the upgrade, but the pace varies in different parts of the industry, says Steel magazine, U. S. metal-working weekly.

Over-all, the rate went up 1.5 points last week to 86 per cent of rated capacity production, or 2,075,419 net tons. By districts, it ranged from 79 per cent in Birmingham, Ala., and New England to 95.5 per cent in Wheeling, W. Va. Mills producing cold-rolled carbon sheets, galvanized sheets and tin plates are loaded with business, many others, such as plate and bar producers, were loafing along.

Steel said seasonal factors mean more to buyers now than they have in a long time. Although last year was a peacetime period, the seasonal factors didn't come into play because consumers decided to draw on their inventories for steel.

Now, with inventories depleted, buying is on a need basis.

The magazine said the outlook for the automobile, construction and for the months ahead hinges on container industries—in that order the biggest steel consumers.

Capital Investment May Equal Last Year's Level

By The Canadian Press

Canada's capital investment program for 1955 may level out at the 1953 peak of about \$5,700,000,000.

A detailed report on investment prospects for 1955 and actual achievements for 1954 will be issued by the federal trade department in about two weeks.

It likely will show that things didn't pan out as well as was expected in 1954 and that prospects for economic expansion in 1955 will about match 1954 actual achievements.

In 1954, the department, after polling some 17,000 firms across the country, estimated the amount of money to be plowed into the country's economic expansion for the year would reach a new high of \$5,826,000,000.

That would have been an increase of almost \$150,000,000 from the estimated 1953 high of \$5,679,000,000.

ESTIMATE SLIGHTLY LOW

The report to be issued shortly probably will show that the 1953 estimate was a little short and that actual investment was closer to \$5,700,000,000. It also will show there wasn't much, if any, increase in 1954.

As for 1955, the initial polling indicates investment will continue

at about the 1953-54 figure, which means a levelling out at a high rate after some spectacular post-war climbs.

The capital investment program is one of the barometers to the country's economic health, strength and prosperity. It shows how much money governments, builders, manufacturers, schools, hospitals, home buyers and other groups are prepared to spend to replace some existing buildings, equipment and machinery and to add new facilities.

Capital investment in 1953 was more than double the \$2,489,000,000 in 1947. Investment increased by \$600,000,000 each year in 1948 and 1949 and the increase was cut to \$300,000,000 in 1950. Then along came the Korean War and capital investment in 1951 jumped by \$750,000,000 to \$4,577,000,000.

There was another big rise of \$700,000,000 in 1952, but then the pace of economic expansion seemed to slow. In 1953, the increase was about \$400,000,000.

Near-Normal Temperatures Are Predicted

Temperatures in much of Eastern Canada are expected to be below normal for the next 30 days while a big part of Western Canada is expected to have above-normal temperatures. This map, based on the long-range forecast of the United States Weather Bureau, shows that near-normal temperatures are predicted for the Maritime Provinces and part of eastern Quebec. The belt of below-normal temperatures will extend from Montreal to the head of the Great Lakes. Eastern Manitoba will be near normal while from the Manitoba border west temperatures are expected to be above normal. (CP Photo) 1955 (Note: Above map is supplied by courtesy of Toronto Telegram).

WEIGHT LIFTING EQUIPMENT. If you have bar-bells you aren't using, members of the Charlottetown Y. M. C. A., would appreciate their loan, or consider purchase. Please write or phone 3425.

Why Settle For Less Than \$10,000 In A Year

The days are gone when a "few thousand" a year salary was enough for a man to take care of his family, buy a new car, and "sit some away for the future."

If you are a middle-aged man who has reached the "ceiling" on your earnings and now want to make good in a new field, we can make you a fine offer to join our organization, where top men are paid up to \$12,000 a year.

Middle-aged men, 45 - 50 - 55 - and up are particularly qualified for our type of business, where earnings start at once. Bert Licht began on part-time basis—when he started full-time with us, averaged \$787.31 per month his first three months, John Christensen averaged \$752.55 earnings per month his first seven months. G. A. Holland, new man starting third month, earned \$2,194.36 in three-month period. Average of over \$700.00 per month. Paul Fraser, new man, earned \$152.27 his very first working day. These are unusual earnings of top men. Like earnings are available to you because we do not put a ceiling on your income.

In spite of shortages in other business, our volume is expanding at a terrific rate. We have an opening in Charlottetown area, for a man over 45. The man we want must be high grade (not high pressure), ambitious and sincere. Earnings are paid in advance, no investment is needed, no collections, no deliveries. Excellent home office co-operation.

Write a personal letter to our Vice-President, Dept. C. 3, P. O. Box 88, Station J, Danforth, Toronto 6, Ontario.

EASTERN PACKING CO. LTD.
Souris - Phone 30.

Another Building Boom Is Scheduled For Edmonton

EDMONTON, (CP)—Major industrial expansion is again projected this year for Edmonton and district.

Officials estimate the value of projects scheduled to be started this year will top \$70,000,000.

New plants and extension of present establishments in 1954 represented an outlay of about \$7,000,000. City building permits issued last year totalled about \$68,000,000.

MAY BE SOLD OUT

One city official indicated Wednesday that if Edmonton keeps expanding at its present rate, it will have to post the "sold out" sign for residential building lots by the end of 1957.

He said that at the current rate of sales all lots now designated for residential use will likely be used up in three years. He added that before that time arrives additional residential land likely will be made available.

Three new industries are expected to be launched in the Edmonton area this year. These are a cement manufacturing plant, steel rolling mill and a pulp mill.

To meet the demand for cement products created by the heavy building construction activity in the area, Canada Cement Ltd. announced it will build a \$2,000,000 cement clinker plant near Edson, a \$5,000,000 Portland Cement plant, financed by Canadian and Belgian capital, is planned. Construction will start this spring and completion is scheduled for 1956.

Preliminary work has started on a steel mill with a capacity of 30,000 tons a year. The Alberta Rolling Mills Company has purchased a 30-acre site for the mill.

PULP MILL UNDERWAY

Last October work started on a \$2,500,000 steel pipe mill for Edmonton Steel Fabricators Ltd. The mill will have a capacity of 6,000 tons a month.

Work has also started on construction of a \$30,000,000 pulp mill near Edson, 130 miles west of Edmonton. The bleached sulphate mill, with a daily capacity of 300 tons, will employ 1,400 persons. It is being built for St. Regis Paper Company of New York and North Western Pulp and Paper Company.

Store Operator In Theft Case

TORONTO, (CP)—A hardware store operator was charged Saturday with receiving stolen goods after police reported a stolen typewriter was discovered in Regina.

The typewriter was part of the loot from a break-in at suburban Islington township last Nov. 28, police said. Nineteen typewriters, a cheque writing machine and a dictating machine were stolen. The typewriter was found to be a repair shop in Regina.

Four of the stolen typewriters, the cheque-writing machine and the dictating machine were recovered at a hardware store, police said.

Declares Succession Duty Act Is Too Complicated

TORONTO, (CP)—C. C. Calvin, president of Toronto General Trusts Corporation, said Wednesday the Dominion Succession Duty Act is "unnecessarily complicated and expensive to administer."

Also, he told the corporation's annual meeting, estates in Ontario and Quebec suffer confusion, delay and additional expense by being subjected to two succession duty acts—federal and provincial.

Until a return is made to one act, said Mr. Calvin, time and expense could be saved if federal and provincial acts were made more uniform and if all variations, returns and collections were made through one government agency.

Under the Dominion Act, Mr. Calvin continued, valuation of a life interest for succession-duty purposes does not allow for annual income-tax payments.

COULD CAUSE HARDSHIP

The result was that the government's succession duty department got succession duty on moneys which the government's income-tax department would collect, and which the beneficiary would never receive.

Other provisions of the act dealing with payment of duty on a life interest, might inflict untold hardship on the beneficiary.

U. S. Restricts Copper Exports

WASHINGTON, (AP)—The government clamped down Saturday on exports of U. S. refined and scrap copper with an explanation that world demand has been rising due to increased industrial production.

A spokesman for the commerce department, which announced the restrictions, said they have nothing to do with the world political situation. The explanation was that there has been a rising industrial demand, coupled with labor difficulties, that made it necessary to protect supplies.

The department's announcement said that export of refined copper produced in the United States "will not generally be approved."

A limit of 6,000 tons was set for February and March on wire copper scrap and of 6,000 tons of copper in copper-base alloy scrap.

Kitimat Power Break Repaired

VANCOUVER (CP)—A power break in the Aluminum Company of Canada's main transmission line to its Kitimat, B. C., smelter has been repaired, a company spokesman said here Saturday.

The official said the 10-day power stoppage would reduce Alcan's 1955 production by less than one-half of one per cent.

The break occurred high up in the mountains between the power house at Kemano and the smelter 80 miles away when a huge snow slide thundered down from a peak, knocking out two transmission towers.

NEW DESTROYER LAUNCHED

BATH, Maine (AP)—The first of a new series of all-purpose destroyers—the Forrest F. Sherman—slid into the icy waters of the Kennebec river from the Bath Iron Works yard Saturday. Admiral Sherman's widow broke the traditional bottle of champagne across the prow of the 380-foot craft, which the navy calls "fast, flexible and potent."

COPS OUT-THINK CROOKS

HUNTSVILLE, Ont. (CP)—A thief stole a cash register from a service station here and hid it in a garbage dump, presumably intending to come back later and open it. Police found the cash register and had it back, unopened, within half an hour.

Royal Navy Sub Squadron Is Being Sent To Canada

OTTAWA (CP)—Britain is spending its top submarine officer and a sub squadron to Canada to help the Canadian Navy's anti-submarine training program.

The navy announced Saturday that Rear-Admiral G. B. H. Fawkes, flag officer of British submarines, will arrive shortly to confer with senior Canadian officers on the placement of the Royal Navy's sixth sub squadron at Halifax.

On Feb. 12 he will fly to Ottawa for further talks with Vice-Admiral E. R. Manguay, chief of the naval staff, and members of the naval board, leaving for Washington Feb. 15.

The Royal Navy's sixth squadron will be based at Halifax.
