SUPREME COURT AT SUMMERSIDE.

The Supreme Court opened at Summerside at noon today, Judge Fitzgerald presiding. The following were composed of the jury: William Holcomb (foreman), A. Stewart, Thos. Lynch, Owen Sharkey, Robt. Carruthers, David Burrows, Geo. A. Gardner, Abraham Schurman, William Gardner, Thos. Wilson, Peter Kinch, Barabas Kehoe, Richard Johnson, Wm. E. Deagan, Alfred McWilliams, R. T. Fanning, James McArthur, Thos. Adams, Henry Dawson.

PARNELL'S PARTY.

The Independent or Parnell party, has issued a manifesto in view of the death of Parnell, who died Oct. 6, 1891, bitterly attacking the other factions of the Irish parliamentary party, saying:

The mass of the people who went wrong last election have been disillusioned. They are not likely to remain long in the service of a government that confesses its inability to do anything for Ireland, nor remain attached to a parliamentary party conspicuous for having failed in the first instance to unite, discipline and independence, and which has succeeded only in hiring to strangers the services which were solemnly pledged to Ireland.

A general election is a certainty in the near future, and even were it the avowed policy of the Irish allies of the Government to continue the present moribund ministry in office they are too demoralized and divided by deadly internal strife to be useful even to their British paymaster.

"We may expect therefore, before the date of dissolution, individual appeals to the constituencies from the ranks of the Irish allies themselves.

It is understood that this hotel is to contain about two hundred and fifty rooms, and have all the modern improvements and conveniences. Mr. Gallagher has not yet decided what he will do.

WOMEN TRAVEL.—The St. Louis Globe Democrat says: "The killed and wounded of both armies at Gettysburg were 22,570. The killed and wounded on the railways of the United States for the year ending June 30, 1893, were 27,739. It is an amazing fact that the carriage on our railways is 50 per cent. greater every year than the carriage at Gettysburg. The railway figures given are from the latest report of the Interstate Commerce Commission."

THIRTY THOUSAND FOR A CATHEDRAL.—A late despatch from Fredericton, N. B., says: Christ Church Cathedral, this city, will receive \$30,000 by the will of Mr. Rebecca Gordon, which has been proved here. Bishop Kingston and Wesley Van der Veer are executors. Rebecca was the only surviving sister of the late Judge Michin, and the last of his family. Her death releases the Michin estate, in which she had a life interest, and which all goes to the Bishop of Dublin, Ireland, amounting to \$75,000 or \$100,000.

SPLITTING CABBAGE STEMS.—A description is given of a method for arresting the growth of cabbage heads nearly mature, and thereby preventing their cracking. This is performed by cutting the cabbage stem half or two-thirds across with a sharp pruning knife, and then extending the cut either up or down for a short distance. If the cabbage does not bend over by its own weight and thus widen the split, the growth of wood soon inserts to keep the cut surfaces apart. By this means the further growth of the heads is arrested, and yet sufficient sap reaches them to keep them fresh until wanted for use.

LADIES.—You will please understand that if you want overcoats or refusers for your boys this fall, that we carry the nicest assortment of little coats in the city at our prices as far away down below competition.—Prowse Bros., the wonderful cheap men.

Our stock for fall and winter is now complete. Great bargains in suits and overcoats, gents furnishings, etc.

MARRIED IN THE FAR WEST.

The Catholic Church of Boulder, Montana, was the scene of a pretty wedding on Monday, September 10th, 1894, when Miss Hannah McGuire, daughter of Mr. John McGuire, of Morell, P. E. Island, was married to Mr. Jeff O'Connell, of Helena. After the ceremony, the happy couple went to the home of Mr. McGuire, where a dainty breakfast was served by a sister of the bride, the Rev. Father Vandenberg and a few of the personal friends and relatives of the contracting parties being present. After spending a pleasant day in Boulder, the bridal party took the evening train for Helena, their future home, accompanied by M. McGuire, brother of the bride, who had acted as groomsman, and Miss Maggie Connell, bridesmaid. After a supper at the groom's brother's, D. D. O'Connell, they went to their new home on Lyndale Avenue. Their many friends join in wishing the newly-married couple all the good luck they can find in the beautiful City of the Rockies. After the happy couple had reached their home at Helena, the Knights of Pythias friends visited them in a body, and an informal reception was kept up for some time. Later in the evening the O'Connell home was visited by the Higgins Cade Band, which gave a serenade in honor of the happy event.

"THE PEOPLE AND LANGUAGES OF THE WORLD."

By the REV. DR. MACRAE, ST. JOHN'S.

Under the above title, a little work has been placed in our hands, which is, we venture to think, beyond all comparison the most learned production that has appeared to date from the pen of a Canadian. At the same time it is hardly less popular in style than it is in solid substance. The author is Rev. A. MacLennan, Presbyterian minister at Belfast, P. E. I., a man whose name, among students, collectors and publishers of Gaelic literature, ranks second to none in the lists of European scholars, and it may be little known to many among his own people. Already he has sent forth several volumes, five or six, we think, containing a vast number of the most precious ancient poems current among the Highlanders of Scotland, all of which are eagerly sought after by such men as Professor Blackie, of Edinburgh, and like enthusiasts in Gaelic lore. And there are more to follow.

In the little work before us, of 254 pages 18mo., beautifully printed by Hazard & Moore, of Charlottetown, P. E. I., Mr. MacLennan has taken a new departure. A brief introductory chapter explains the principal things, "Physical characteristics, customs, manners, religion and arts;" and "Structure of languages," to be taken into consideration in classifying peoples. The various peoples, white, yellow, black, and inter-mixed, are ranked under four great divisions: The Aryo-Hamitic, the Basko-African, the Indo-Australian, and the Negro-Papuan.

Under these four main divisions are classified—under the Aryo-Hamitic (A), the Indo-Keltic, with 13 branches; (B), the Shemitic, with eight; and (C), the Hamitic stock, with eight branches. The other divisions are similarly dealt with—some 80 to 90 separate "peoples" in all passing under review—the leading physical characteristics, such as shape of skull, form of face, average stature, color of hair, eyes, etc., and peculiarities of customs, religion and the like, of each being briefly but most interestingly, sometimes even amusingly, presented.

Then follow short chapters treating of the origin, structure and classification of languages, and on the practical value of the science of languages to the ethnologist, the historian, the student.

The amount of research revealed by the pages of this little work (little it is in bulk, vast in range of scholarship) is almost bewildering. It comprises the substance of many hundreds of volumes, and offers information in a form the most easily available, imaginable, to obtain which considerable libraries might be ransacked in vain. At the same time, there is not a dull sentence in the whole, and so far as we may presume to judge, the accuracy of the carefully marshalled contents is unimpeachable.

To editors, ministers, teachers—in short, to all desirous to have before their "mind's eye" a faithful portrayal of humanity in its amazing variety, to have at hand a volume of all but indispensable information, the most convenient and least costly ever compiled (a dollar, we believe, represents the price of the volume), this work can be honestly recommended with the conviction that no intelligent reader can possibly rise from its perusal unimpressed and benefited.

What best of problems, queries, reflections every paragraph suggests? But we must refrain. Containing, as has been said, the substance of hundreds of volumes, there are, in Mr. MacLennan's book, the "texts" of many more. The author merits the warm congratulations of scholars on the success of his arduous labors. We trust that they may be correspondingly appreciated and remunerated.

NOVA SCOTIA'S APPLE CROP.—Nova Scotia's fruit export is of growing importance. The province will produce this year 112,000 barrels of apples and 110,000 baskets of plums, besides a large supply of small fruits. Altogether it is estimated that the surplus for export will be worth to the province \$600,000. The greater part of this fruit is grown in three counties. Some farmers take two and three thousand dollars from their orchards. Fruit culture is undoubtedly a profitable investment.

PUBLIC GARDENS AND PARK.—The St. John Horticultural Association, which is trying to secure a park and public gardens for St. John, is meeting with much encouragement. At a recent meeting of the society it was announced that Rockwood, the former home of J. W. Daniel, had been purchased. T. D. Hazen long ago gave one hundred acres of land adjoining this, and other ground about Lily Lake will be acquired. Joseph Allison's gift of two acres and Seeley's of one acre fronting on Seeley Street, almost complete the requirement. Several citizens have subscribed \$1,000 each for the purposes of the association.

THE FOLLY OF OVER INSURANCE.—Mr. Alex. Watling's house, which he brought from Mrs. Gray, and had been living in only a few days, was destroyed by fire on Wednesday last week, the fire having originated in the barn. There was \$3000 insurance on the house and none on the barn. Mr. Watling had bought the whole property, land and all, for \$600. Damages have been assessed at \$325, and this is all the company will pay, or can be expected to pay. It is not policy to over-insure, because the companies never pay more than the burned property is actually worth. They pocket the premium year after year, on the overvaluation, but they pay only the actual loss incurred by the insured.—Chatham World.
