"Scouting Basic Training For Manhood," Says Chief

"Scouting is a basic training for manhood", Lord Rowallan, Chief Scout of the British Commonwealth, said in addressing the Rotary Club at their weekly

luncheon meeting yesterday in the Charlottetown Hotel. "Scout training blossoms out and teaches one to gain self confidence and realize power. The

real idea behind scouts is through training to reach a goal in life which would never otherwise be experienced", Lord Rowallan said. In the 15 years Lord Rowallan has been Chief Scout, the movement has spread through the countries of the free world as the greatest youth movement. "Millions of boys of every color, race and creed have been added to the membership until today there are 20 million Scouts in the free world. We have been able to subscribe to the challenge of the scout laws, with the full approval of their religious and civic leaders.

(Continued from page 1) ing to look at if they were smaller and all were kept in uniformed settings.

Mayor E. C. Johnstone suggested that the matter should be left standing until the first of the year when Council could survey its budget for 1959.

In regards to a recent report from a reliable source, Councillor Boyles noted that the water pressure in the area surrounding the corner of McGill Avenue and North River Road had dropped nearly 50 percent in the last five years; from 410 pounds to 207 pounds.

He added that this condition was fairly general all over the city but particularly in this specific area. Councillor E. C. Baker told the meeting that he was of the opinion that the Commissioners of Sewer and Water Supply were looking into the situation but as yet was not too sure just when their report would be completed.

FINAL STAGES

The present construction program of sewer and water systems was discussed by Councillor J. E. Arseneault who reported that phase one of the project was nearing its final stages.

Phase two of the program has not progressed too rapidly, he said. This delay was due to the fact that the work can only be done at low tide.

The further delay in the plans for phase three, the laying of a 60-inch sewer main along Kent Street, has been due to the contractor's attempt to try and cut down the cost of the sewer for the City. Mr. Arseneault further stated that he expected to have these plans within the next few days.
