Canada Slashes Import Controls

OTTAWA Sept. 1 - (CP) - Canada has slashed emergency import controls against United States goods and a Government official indicated that the move may help fight inflationary tendencies in this country.

With the barriers lifted on many categories of United States merchandise, the official believed the greater availability of goods may lead to a bigger scramble for the consumer's dollar and a tendency to make prices even more competitive than they are today.

Today's relaxations, effective Oct. 1, herald the beginning of the end of Canada's comprehensive system of import controls erected against the United States as a dollar-saving measure early in 1948.

There no longer will be any complete prohibitions against U.S. goods with the exception of pork. The ban on this item will be lifted Dec. 31. At the same time the U.S. will lift the embargo against the import of Canadian pork products.

Other consumer items, still controlled on quota or allotment basis, will be allowed into Canada on more generous terms than in 1951.

Previously banned and now allowed into Canada without restrictions are such items as pulp and paper products, office machinery and appliances, passenger automobile tires.

Included are many small items, such as domestic water heaters, cigaret lighters, ash trays, vases, pencil sharpeners, dry cell batteries and watch straps and bracelets.

Also allowed into Canada on an unrestricted basis are such items as previously limited, as textile fabrics, soaps, polishing glassware, kitchen and household hollow-ware and cooking and heating equipment.

Transferred from the banned to the quota list - which means they can come into Canada on a limited basis - are such goods as cut flowers, perfumery and toilet preparations, electric light fixtures, flashlights, electric irons and dry shaving machines, jewelry, fountain pens and pencils, and electric mixers, heating pads and fans.

EASY DOES IT The micro-balance can weigh objects as light as 1-1,000,000th of an ounce.
