RESULTS TELL HIGH PRICED PELTS

Read what Mr. Chester S. McLure has to say on this matter:—

Charlottetown, P. E. I., May 3, 1922.

Manager, Imperial Biscuit Co., Ltd., Charlottetown, P. E. I.

Dear Sir: You have asked me on several occasions for my opinion with reference to the Imperial Biscuit that you are manufacturing. Being a small shareholder in your Company, I perhaps have delayed writing you on that account. Ever since you began manufacturing the Imperial Biscuit, as a Fox breeder I have used your Biscuit in my own ranch and have found them an excellent article of fox food. For the past two years, since you have almost perfected this Biscuit, I have watched closely from a far standpoint the ranchers that have been using this Cod Oil Biscuit, and the results are very noticeable indeed—one could almost tell from the skins that were brought to my office for sale where Imperial Biscuits had been fed. For instance, it is noticeable in the pelt of the animal that there was a luxurious growth of fur, clear in color, and with that brilliant sheen or lustre which goes to make a high grade pelt.

My advice would simply be that no fur farmer that anticipates successfully raising a good grade of fur can do without this superior food for his foxes; and I know that it is the intention of the manufacturers to endeavor to improve if possible and make a Biscuit that is a perfectly balanced ration.

For the sake of good furs, I trust that you will continue putting out to the people the information you have with regard to your Biscuit, and when they begin feeding them as the chief article of food we will then all know what a boon it will be to the good furs of this province.

Yours faithfully,
W. CHESTER S. McLURE,

THE OLD LAW OF SUPPLY AND DEMAND IN REGARD TO TEA.

The supply of tea in the world today is very much less than the constantly increasing demand. The recent reduction of four pence per pound of the duty on tea entering England, which is by far the largest tea consuming country in the world, has had a decidedly stimulating effect on consumption. It is expected that this further demand will force the price of tea still higher.
