

East Baltic and Vicinity

Mr. Ernest Underhay, Fortune, was a business visitor to Red Point, East Baltic, on Feb. 8.

Mr. and Mrs. Ronnie MacDonal, East Point, were visitors to the city on Feb. 11.

...Mrs. J. V. Duyer of Charlottetown, and her sister, Miss Betty MacPhee, East Baltic, were recent visitors to Red Point.

Mrs. Major Young, accompanied by Debra and Carol Dixon, Gary Young, Red Point, were Feb. 12 visitors to Montague.

Mrs. Charles Oikie and young son returned to their home at South Lake, from the Souris Hospital.

Mr. Joseph Ford is out and about again at his home in South Lake, following his recent illness with the gripple.

The sympathy of many communities goes out to Mrs. George Dixon, Clyde River, in the recent death of her father, Mr. W. A. MacQuarrie of Hampton.

Mr. Ernest MacPhee, Bayfield, accompanied by his daughter, Catherine MacPhee, student St. Mary's Convent, Souris, were business visitors to Charlottetown recently.

Mrs. Merrill Stewart, returned to her home at Kingston from the Souris Hospital, where she was seriously ill for several weeks, and her many friends are pleased to see her making a good recovery

at the advanced age of 88 years, and she is planning on being able to hook some rugs in Spring at which she is a good hand.

Mrs. Willard Ohing, R. N., Basin Head, resumed her duties as nurse in the Souris Hospital.

Mrs. William Ohing, Red Point, is confined to her home with the gripple. All her many friends wish her a speedy recovery.

Mrs. Alton Robertson, Munns Road, attended the funeral of Mrs. Elmer Dunning at the Zion Presbyterian Church, Charlottetown, on Feb. 8.

Mr. Gus B. Campbell, returned to his home from a trip to Boston, Mass., and other centers of U. S. A.

Miss Catherine MacPhee of Bayfield, is to be congratulated on the high marks she is making in St. Mary's Convent, Souris.

Mr. Walter Douglas, Souris, attended the game between Red Point and Souris West on Feb. 11, at the Red Point Community rink.

Mr. Wallace Rose, East Baltic, has had the misfortune of cutting his foot while working in the woods on Feb. 11. All wish Mr. Rose a quick get-well.

Mrs. Arthur Dixon, East Baltic, is making splendid progress following her recent operation in the Souris Hospital. Her many friends wish her a speedy recovery.

Mrs. Freeman Massey, returned to her home in Bothwell, following her recent illness in the Souris Hospital. Her many friends wish her a speedy get-well.

Mr. and Mrs. Russel Ohing, Black Pond, accompanied by Mr. Ray Bruce, Mr. and Mrs. Roddie J. Kidson, Red Point, motored to Charlottetown, Feb. 8.

Miss Arlene Robertson, clerk of the general store of Mr. John Dixon, East Baltic, was a weekend visitor with her parents, Mr. and Mrs. Robert Robertson, Kingsboro.

Congratulations are extended to Mr. Paul Gallant and his brother Mr. Alban Gallant on the recent purchase of the Lennox Hotel, Souris. This Hotel was noted for many years back for its hospitality and convenience to the travelling public.

Mrs. James Grant is progressing good in the Souris Hospital. Mrs. Grant has had the misfortune of falling and hurting her hip but she expects to be able to return to her home in Souris shortly. All wish her a quick get-well soon.

Mr. William Brown, formerly of Munns Road, has been a patient in the Souris Hospital, for some time and recently he has been transferred to Charlottetown for treatment. All wish him better health in the near future.

A new type of "insurance" which may reduce by 70 per cent. the number of persons injured in car accidents is currently being tested here by two Toronto policemen. The "insurance"—a safety belt—tested here by two Toronto policemen, is an adaptation of the kind used on passenger planes. It is anchored to a U-bar, fastened to the body frame beneath the seat and beneath the floor board. The other is attached to the edge of the car door to lessen the likelihood of the door flying open. Insurance companies believe that the new belts greatly improve chances of survival in a car crash, and are considering premium reductions for drivers whose cars are equipped with the belts.

SAVES ON FUEL

THE BEST Home Improvement YOU CAN MAKE

WARMER IN WINTER

Johns-Manville SPINTEX INSULATION

Spintex mineral wool insulation is an investment that really repays you in cash as well as in comfort. It keeps your home as much as 15 degrees cooler in sultry summer weather. In the winter, Spintex shuts out cold, keeps heat in. Your home is snug and cosy and you cut fuel costs by as much as 30¢ on the dollar. This annual reduction of your fuel bill soon repays the full cost of insulation. And with Spintex, the savings go on and on, winter after winter, as long as the house stands.

In comfort and economy, no other home improvement pays greater dividends than J-M Spintex—the fireproof, rotproof insulation.

FREE Spintex folders are available from your J-M Dealer or Approved Insulation Contractor or write Canadian Johns-Manville, Dept. N-41, 199 Bay St., Toronto.

cent itself, but as a basis for all the best perfumes produced in Great Britain, the United States of America, France and many other countries.

It takes 30 Damask Roses to make one drop of rose oil, and 32,200 roses weighing 180 lb. to make one ounce. One day's output is usually about 10 lb. of rose oil made from five million roses weighing nine tons. The distillery must distill these roses within 18 hours of picking.

The Bulgarian government has given every assistance to the industry and new roses, fragrant with many more petals have been grown and it is interesting to read about the skill and labour necessary to make attar of roses.

I have been reading about the Fairchild Tropical Garden at Coconut Grove, twelve miles south of Miami, Florida. Thousands visit this garden at this time of the year and it is notable as one of the great gardens made for public enjoyment.

Dr. Fairchild was for more than 20 years in charge of Foreign Plant Exploration in the U. S. Department of Agriculture and his aim as a botanist was to find new fruits and foods that could be grown in America. In his travels into some of the remote regions of the world, he collected more than 200,000 species and varieties of plants.

Fortunately, Colonel Montgomery, a neighbor and friend, shared the dream of Dr. Fairchild in making this beautiful tropical garden of rare palms, vines, ornamental trees and shrubs of tropical areas of the world.

Phillips designed the garden, covering more than eighty acres, and he also designed the famous Bok Tower Gardens. There are thousands of Orchids and beautiful vines and palms in this garden. From the great gathering of palms in the Garden, it is easy to see that these plants are among man's best friends. Besides being spectacularly beautiful with graceful fronds large, showy flowers and fruits or nuts, they are a source for materials that make starch, sago, oil, rafters and other structural timbers, thatched roofs, ropes, baskets and matting— not to mention the hats and dresses derived from their by-products.

Barbadoes cherries are among the curious plants found there. These flower within a matter of weeks after a crop of fruits is harvested, and another crop is available two months after the first crop has been picked. Besides their handsome appearance as evergreen ornamental shrubs, two of these fruits are sufficient to supply an adult with his daily need of vitamin C.

Another eye-catcher is the pachli tree which most people call "the shaving brush tree." It looks like a hanging collection of shaving brushes, the pink "bristles" flaring from what appears to be a brush "handle."

The cycads, which resemble man-made hybrids between ferns

and palms are primitive plants of the world. They flourished in the Carboniferous Age, 50 to 200 million years ago. Indeed, it was layers and layers of these cycads and other plants rotting and burning away under the sun—all under pressure—that made the coal we use in our homes and factories today. Cycads are vanishing plants; only about 75 species in nine genera remain, but seven of these specimens are planted here.

The Garden is said to have the most outstanding collection of vines in the United States. Clim-

ing on a super pergola 500 feet long, they constitute, perhaps, next to the palms, the most striking feature of this tropical garden, furnishing a riot of color from the brilliant reds of the bougainvilleas to the gaudy orange of the Mexican flame vine.

There are thousands of orchids in this garden, one of which was named for Mrs. Winston Churchill when she and her husband made their last trip to Miami. From all over the world have come many other visitors, too—Dutch scientists, South American horticulturists, people from the lands of the In-

Each succeeding generation continues to develop its own concept of gardens, according to the desires and aims of the makers. Dr. Fairchild has added much to the knowledge and pleasure of the thousands who visit this garden he has made in Florida.

Month after month, Canadians buy more Nescafé than all other brands of instant coffee combined

Why does Pure Coffee cost 40¢ a Pound less when you buy it this way..... instead of this way.....

A pound of coffee makes more cups of coffee when we brew it our special way than when you brew it at home.

Scientific brewing methods, used in making Nescafé, get every precious drop of coffee richness from choice coffee beans.

No method of brewing coffee at home could possibly be as efficient. When you brew coffee yourself from ground coffee so much is wasted. You end up with fewer cups.

After we have brewed delicious Nescafé, we remove the water. All you do when you make Nescafé is put the water back.

Nescafé is so delicious, we guarantee you'll get better flavour, cup after cup, than with ground coffee.

With today's high prices, Nescafé saves you up to 40¢ a pound over ground coffee—and you enjoy better coffee flavour. Start today. Make Nescafé your family coffee.

ELLEN'S DIARY

Continued from page 2

hurry by, scenting rest and comfort and the care of the stable of home.

We too dined—now what was the humble fare of our midday meal, so quiet with the children in school? It was a favorite dinner of James—and he seated on our right.

Pork chops we had ("I don't believe there's going to be nearly enough pork this year to go 'round," he offered to Rob) with an accompaniment of fried eggs, product of the little flock that despite wintry frosts and snows and confinement to quarters continues to surprise us with their daily offerings. Carrot cubes, yesterday's left-over heated in dot of melted butter; potatoes tasteful whether theirs be a favorable or less remunerative market and sauerkraut from "this tin of it, Mother sent you" the chap who brought it one evening said, adding on an intriguing thought: "How long before 5 o'clock, Ellen? I can stay to play just that long. You'll call me, won't you then?"

Through a pleasant afternoon, past the enchantment of the sunset we journeyed, by the gray waves of the twilight and into the night hours. How lovely these are! Our one regret is that they mark the close of another one of our fleeting days.

Until tomorrow - - - - - Diary

A Country Garden

Continued from page 2

The Lady Washington geranium was the most beautiful of all! There are so many varieties of all geraniums that a most interesting hobby would be, collecting as many as possible. For all year round beauty and usefulness there is nothing that can compare with geraniums.

In the Valley of the Roses in Bulgaria is grown the Damask Rose, a semi-double light red, having 36 to 38 petals and a strong fragrance. The Musk Rose is more prolific in flowers, but its oil does not approach the quantity or quality of the Damask.

The women start picking the blooms very early in the morning before the hot sunshine has the chance to extract any of the scent. The women work together and the food is provided by the woman who has asked the other to help in her field.

It must be pleasant work although not much money is made by the workers. Approximately 15-400 acres of land are under roses in Bulgaria, and the yield of six to seven million kilos provides most of the world's supply of attar of roses. Today rose oil comes fourth on the list of Bulgaria's exports; it is used not so much

Studebaker's far-advanced new design cuts your gasoline bills!

White sidewall tires and chrome wheel discs optional in all models at extra cost.

Get a '54 Studebaker

Own the thrifty Canadian car that is setting the style for the world!
