

NEW BOAT UNDERGOES TRIALS

Designed for all types of fishing, a beautiful new 47-foot boat was launched at Alberton harbor Thursday for Henry Doucette, Tignish, and is the largest craft constructed to date by Hutt Brothers boat builders at Alberton.

It is shown here undergoing first tests. The boat has a pink stern (pointed) and will be used for lobster fishing this spring but is also adaptable for fishing for ground fish, cod, mackerel or scallop fishing. The bow cabin contains sleeping quarters for a crew of three, propane cooking facilities, cupboards, sink, etc. In the 6x12 wheelhouse are all controls for the 150 h.p. Gray marine engine which is located underneath the floor. The engine room is vented by two turbine vents. Dual steering controls enable one man handling of the boat during ground fishing.

Sees Move As Excellent Financial Arrangement

The following letter from Mr. Alan H. Holman, President of R.T. Holman, Limited, has been received for publication in The Guardian:

"If you would be so kind as to allow me, as the president of R.T. Holman, Limited, to comment on the recent notice of motion of the Summerside Town Council, for the establishment of a new shopping and parking area in the town, I would be very grateful.

of the proposal we find that our fears were groundless, that (1) the Town is planning to finance this complete transaction through a deal with the company supplying the meters, in such a manner that they will assume all the cost of the development of the parking lot, which will be paid for by the company taking over the revenue of 75 percent of the meters.

This is a splendid financial arrangement and those responsible are to be commended. (2) We now believe that the town is getting good value in this exchange of land and that no subsidization is being given any firm. Let me say, we welcome good competition to the town, and are happy to see that this firm will again be able to supply the wants of its customers.

(3) Our last objection is one that the establishment of this area will centralize the shopping store in a smaller area, in which our Certain areas of Water Street will of course suffer by this arrangement, but, at least some of the Water Street firms, including ourselves are happy that the Town has seen fit to improve our shopping facilities.

I therefore wish to state that this firm is very much in favour of the proposal, and sincerely hope that it will be implemented as quickly as possible.

ALAN H. HOLMAN, President, R.T. Holman Limited.
