Period Of Financial Crisis Seen Likely For Canadians

TORONTO (CP)—A period of financial tautness has settled on the country says the Canadian Imperial Bank of Commerce in its July commercial letter, released here.

Under the title Disciplines Descending, the letter deals with the current credit situation, Canada's financial crisis and the steps taken to deal with it. It says:

"The fiscal steps recognize a critical situation but, in present circumstances, the only unchallengeable stand is a balanced national budget and a balance on current transactions in our international payments, with indeed a surplus on both accounts.

"If the present moves turn out to be inadequate, further measures obviously will have to be adopted. It may be that import quotas will yet be necessary to balance our international accounts and that increased taxes will be required to balance the budget.

"Neither prospect presents any adequate long-range solution. But an emergency as serious as the one now being faced demands whatever drastic action may be necessary to remedy it. No economic misfortune that might befall the nation could have as disastrous consequences as an unchecked fall in the value of the currency."

Of the current credit situation the bank says:

"Some time ago the Bank of Canada appropriately brought to an end the steady increase in money supply which continued through last year.

SET SIX PER CENT RATE

"When the new fiscal measures were adopted by the government the Bank of Canada announced establishment of a bank rate of six per cent as the minimum rate for advances to chartered banks. A different rate, which so far has been less than the bank rate, was made available to money market dealers, but the Bank of Canada has adopted practices which in effect deny this rate to money market dealers if it is to be used to enable chartered banks to increase their cash reserves.

"The Bank of Canada rate is available to the chartered banks for one week only in a single month; the rate for any further period is subject to negotiations. Since the Canadian Bank Act provides for a maximum rate of interest of six per cent on borrowings from the chartered banks, the deterrents to borrowing from the Bank of Canada are formidable.

"The rapid rise in bank loans during the last year has almost exhausted the ability of the chartered banks to enlarge loans and, while funds are available in the capital markets at a price, a period of financial tautness has settled on the country."

Opening lead—queen of clubs

Your batting average as declarer would rise appreciably if you could actually see how the defenders' cards are divided instead of having to guess the distribution of their high cards and their suits.

However, there are some hands that are troublesome even when you see all 52 cards. Such hands are comparatively few and far between, but they do have some fascination when they rise.

You might want to try making four hearts with this hand, having the benefit of looking at the East-West cards. It may puzzle you for a while.

Probably the instinctive play, after winning the ace of clubs, is to lead a low diamond and finesse the nine when West plays low. This will not work in the present hand because East would win with the ten and return a trump. Eventually you would lose three diamonds and a heart to go down one.

The same result would probably be obtained if you played the jack instead of the nine.

The best way of playing the hand is to enter dummy at trick two with a spade and lead the nine of diamonds. If East follows low, so do you, and your troubles are over. But if, as is likely, East covers with the ten, you play the queen. (It does not do East any good to go up with the king because all you would lose is two diamonds and a heart.)

West takes these are but is stymied. He cannot afford to lead a trump, so let's say he returns a club. You ruff it and lead another diamond. East wins the king and returns a trump.

Naturally, you refuse to finesse because that would jeopardize the contract. You take the heart with the ace, ruff your last diamond, and thus make four.

Actually, this line of play is best even if the East-West cards are not known, but it is very hard in actual practise to resist leading diamonds originally from the South hand.

Noranda Mines' Profits Boosted

TORONTO (CP) — Noranda Mines Ltd. had net profit in the six months ended June 30 of $7,064,000, or 76 cents a share, compared with $6,822,000 and 74 cents in the same period of 1961.

Commenting that between 1953 and 1961 imports of consumer goods increased from $1,203,000,000 to $1,871,000,000, the bank says:

"It is one thing to employ foreign capital to provide capital goods which should earn their keep by future production; it is quite another to obtain foreign capital to enable the country to use up consumer goods when this capital has to be paid for from some other source at some future time.

"Clearly, greater selectivity and moderation in the purchase of consumer goods from abroad is urgently needed."

Operating income was $11,172,000 compared with $10,320,000 and investment income was $2,909,000 compared with $3,167,000. Copper production totalled 14,367 tons and gold production 103,065 ounces compared with 12,594 tons and 97,350 ounces in the corresponding period last year.

John R. Bradfield, president, said the most significant influence on 1962 results has been the discount on the Canadian dollar.

"This improved all metal prices and increased gross profits by some $450,000 over 1961."

He said the lack of a Waite Amulet dividend in the first half of 1962 explained the drop in investment income but that more than $550,000 was realized in new dividends and Waite Amulet has declared a third quarter dividend of 30 cents a share.

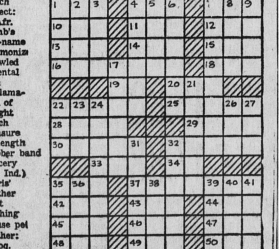
Yesterday's Answer



7-21

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.
