Magistrate Haslam Deals With Impaired Drivers

There was a large docket in city police court Tuesday. Magistrate A.J. Haslam presided. James E. MacPhee, Clyde River, charged with drunken driving, was remanded following evidence presented by two city policemen, Sergeant Lloyd Wakelin and Constable Leo MacDougall, who arrested the accused. The witnesses stated they attempted to stop the accused while he was driving in town but he refused and kept speeding through town and out North River Road. Cross-examination was conducted by John P. Nicholson, counsel for the defence. DRIVER FINED On a similar charge, W. David Loggie, Summerside, pleaded not guilty but guilty to an lesser charge of driving while impaired. He was fined \$125 and costs or 30 days. Police Impaired also acted in this case for the accused. Ambrose R. Coody, Charlottetown, charged with having care and control of a motor vehicle while intoxicated, pleaded not guilty but guilty to the charge of care and control while impaired and was fined \$125 and costs or 30 days. Defence counsel was Lester O'Donnell. Curtis Strickland, Marshfield, on a similar charge, was remanded with bail set at \$120. Three men appeared on the charge of being drunk and disorderly. James Kays, Charlottetown, was fined \$55 and costs or 15 days; John Francis Bell, Charlottetown, was fined \$25 and costs or 10 days; and Donald Ross, Charlottetown, was given a one-year suspended sentence. He was also ordered to enter into a \$500 bond with two sureties of \$250 each. Two men charged with unlawful possession of liquor not lawfully having in their possession liquor in a place other than their residence were each fined \$30 and costs or 30 days. Another charged with the un-

Bounce Signals Off Sky To Solve Arctic Problem

EDMONTON (CP) — Canadian National Telecommunications has come up with a space solution to one of its northern communications problems. The vast northern wilderness will be bridged by a \$5,000,000 tropospheric scatterwave communications system, stretching from Hay River, N.W.T., to Lady Franklin Point on Victoria Island in the Arctic. Work on the 54-mile system, which begins at Hay River, CNT's communication centre, has already started. The job is expected to be completed by the end of the year. Some of the channels will be lawful possession of liquor not lawfully having in their possession liquor in a place other than their residence were each fined \$30 and costs or 30 days. Another charged with the un-

Adium to Lady Franklin point will be spanned in one jump. ROADS BUILT Steady five-mile access roads have been built from airstrips at the intermediate relay points to tractor-transmitter sites. The first tractor-train carrying construction material reached Port Radium last week. Additional supplies will be delayed until after the spring break-up. About 100 men will be employed in the construction of the relay stations. One of the problems is trying to get men and equipment to the various sites. Meanwhile, CNT technicians have been selected and are undergoing a four-month course at Toronto to enable them to cope with intricacies in scatterwave maintenance. These men will be stationed at the sites on a rotation basis with Hay River as their headquarters. Supplies will be flown in once a week once the system begins operations. IS BIG TRAVELLER The Antarctic skua is a great traveller and sometimes flies hundreds of miles inland toward the south pole.

Higher Steel Price Swing Gaining Momentum In U.S.

By ROGER LANE — The eight companies posting markups, including five of the big 10 U.S. makers, produced more than one-half of all American steel in 1962. As yet, there was no sign of the storm of protest from Washington that quickly met across-the-board steel increases a year ago and played a big part in their withdrawal. U.S. Steel, which led the abortive price drive of April, 1962, announced increases on certain flat rolled products averaging \$4.85 a ton, the lowest so far. Leslie Worthington, "Big Steel" president, said higher prices were "obligatory" considering what he called his company's squeezed profits and "in the light of all competitive conditions."

Like their predecessors, U.S. Steel and Armco explained decisions in terms of falling profit, its rising costs, absence of a general price increase since 1959 and huge investments in modernization and improvement of plant. Armco coupled price increases of \$4.50 to \$7 a ton on plates, sheets and galvanized products with some price reductions. Armco cut \$5 a ton from its prices on assorted wire items, products subject to stiff competition from imports.

SEKS INQUIRY In Congress, the nearest thing to a discouraging influence to date was an order for an inquiry into steel prices, profits and production problems. The inquiry was set in motion

Joey Predicts Pearson Great Prime Minister

ST. JOHN'S, Nfld. (CP) — Premier Joseph Smallwood of Newfoundland says he is convinced Lester B. Pearson will be "one of the great prime ministers of Canada."

Mr. Smallwood made the comment soon after his arrival home from a weekend at Nassau.

The premier would not disclose what business took him to the Bahamas but said he had met with "a number of lawyers."

In further reference to the national Liberal leader, Mr. Smallwood said "nature did not give Mr. Pearson the gift and talents to be a great opposition leader."

The premier said he also is certain Newfoundland will derive great benefits from a new Eastern Provincial Airways service between St. John's and the Labrador centre, site of a \$250,000,000 iron ore development.

STARTED INDUSTRY A handful of cocoa beans introduced in 1879 to what is Ghana started the world's greatest cocoa industry.
