

Gold Cup, Saucer Events Will Be Filmed By USTA

The United States Trotting Association will film the 1962 Gold Cup and Saucer Parade and the race that will be held on the same day for distribution through North America.

This was disclosed yesterday at a meeting of the Gold Cup and Saucer Parade committee by Frank (Duck) Acorn and Cecil Stewart who returned recently from Moncton where they attended the USTA District No. 11 meeting last week.

Arrangements for the filming were made by Mr. Acorn and Mr. Stewart, president of the Provincial Exhibition Association, through negotiations with Earl Flora, publicity director of the USTA. Mr. Flora is in charge of the filming of such world famous harness races as the Little Brown Jug and the Hambletonian.

Mr. Acorn said the entire Gold Cup and Saucer Parade and free-for-all race being held in conjunction with the parade will be filmed by the USTA and will receive wide distribution through private showings in the U.S. and Canada.

The coverage to be given the parade and race will be comparable to that given the Little Brown Jug and Hambletonian. This will mark the first time the USTA has given such coverage to a harness race in Canada, it is believed.

The association will also be filming the 1963 and 1964 parades and races, Mr. Acorn

pointed out, and in 1964 will release a film combining the highlights of all three years. This, too, will be given distribution through North America.

The news of the film arrangement was greeted with great enthusiasm by the committee and hailed as a "tremendous boost for tourism" in the province.

"This publicity", a committee member said, "is invaluable. It will not only benefit the parade and race themselves, but will add great impetus to the Island's tourist business."

It was reported at the meeting, also, the number of floats now regarded as certain entries will reach the total of 30 eventually.

Weather Satellite Is Placed In Orbit

WASHINGTON (AP)—A new United States weather satellite, Tiros IV, shot into orbit around the earth Thursday and immediately started taking excellent-quality pictures of the clouds 500 miles below it.

Within a few days, cloud photographs from the new satellite may play a significant role in plans for the recovery of astronaut John H. Glenn Jr., from the first U.S. manned orbital flight.

One of the two cameras in the drum-shaped, 385-pound satellite was equipped with an improved lens to reduce distortion and provide greater detail.

Some of the first pictures showed a tremendous cloud coverage over North America, with what space agency officials called "really good" detail in the clouds.

Other films showed the outline of the Great Lakes. Pictures taken on the second orbit provided a clear shot of the clouds over Iowa, Wisconsin, Illinois and Michigan, southern Canada, Nova Scotia and the North Atlantic.

This was the fourth Tiros success in four launchings. Three more Tiros satellites are planned—the next one before the end of September.

Early data indicated Thursday's satellite was moving at 17,000 miles an hour at its low point, 450 miles above the earth, and slowed to 16,700 miles an hour at its apogee of 525 miles. It takes about 100 minutes to complete one orbit.

Fires Take Heavy Toll In Prince County Towns

Dr. Phillips' Home Levelled At Alberton

ALBERTON BUREAU OF THE GUARDIAN
The home of Dr. Orville H. Phillips, Prince County member of parliament was destroyed last night in a spectacular blaze that attracted hundreds of persons to the scene.

The fire broke out in the basement of the large 12-room house about 9.15 when an oil-fired plumber's torch exploded spreading burning oil.

SPREAD RAPIDLY
Alberton firemen were on the scene within minutes but the fire had already made its way to the ground floor and was burning inside the walls leading to the second floor.

A dense oily smoke made it impossible for the men to enter the house but some of the doctor's dentistry equipment was saved after the rooms were ventilated. This included the dental cabinet, chair, drilling machine and sterilizer. Some of the equipment, which was moved into the house only a month ago when the doctor's office on Main Street was vacated, was on the second floor and was included in the losses. A washing machine and one or two chairs were the only other items saved.

REPAIRING FURNACE
An oil furnace for baseboard heating was installed several weeks ago and workmen were repairing part of the system damaged by frost when the torch exploded. Philip Kinch of Alberton and Alton Gaudet, Summerside, escaped uninjured after the blaze broke out in the flash explosion.

At the height of the fire an acetylene cylinder in the basement blew up with a shattering crash that scattered the large crowd in all directions.

Two large oil tanks outside the house also burst from the heat causing a fierce blaze that continued for several hours.

AID CALLED
Tignish and O'Leary firemen were called but by the time of their arrival Alberton firemen had given up the task of trying to save the dwelling with the limited supply of water available on their truck.

The house is located about a half-mile from the business part of the town.

Dr. Phillips, who was enroute to Ottawa by plane, was contacted in Montreal and informed of the fire. Mrs. Phillips and their children are residing in Ottawa. Their home in Alberton was left fully furnished and the loss is a heavy one.

German Mine Death Toll Reaches 284

VOELKLING, West Germany (AP)—The death toll in the Saarland's worst mining disaster reached 284 today with the recovery of five more bodies in the depths of the explosion-wrecked Lulsenthal Mine.

Authorities abandoned hope that any of the 15 men still on the missing list would be found alive.

All but a few sorrowing wives and daughters of men still believed buried underground gave up their day-and-night vigil at the mine gates. Only the dead were being recovered from 1,800 feet underground.

There were 81 men in critical condition in hospital and 100 reported to have escaped unhurt.

PM's Sympathy Sent Adenauer

OTTAWA (CP)—Prime Minister Diefenbaker said Thursday in the Commons that he has sent a message of sympathy to Chancellor Adenauer of West Germany in connection with the coal mine disaster in the Saar region.

Jayne Mansfield Is Safe After Harrowing Sea Trip

NASSAU, Bahamas (AP)—A dishevelled and weeping Jayne Mansfield returned safely Thursday and her husband denounced as a lie any suggestion the movie actress' disappearance was a publicity stunt.

"I am very hurt," said Mickey Hargitay with tears in his eyes. "Jayne doesn't need publicity. Only a stupid person would think up such a lie."

The actress, her weight-lifting husband, Mickey Hargitay, and a Florida friend were found safe on a beach at Nassau after a search touched off when they didn't return from the water-ski trip.

"Don't be upset, honey, sweetheart. It's all right," Hargitay said to Jayne as he led her to a car for the trip to the hospital.

"It was the sharks; that was the worst," said Jayne, reported to have an almost uncontrollable fear of sharks.

The Nassau Yacht Club said sharks have not been reported in those waters for many years.

Hargitay was taken to hospital for treatment of a cut leg. He was released after treatment.

Hotel publicist Jack Drury of Fort Lauderdale, Fla., the third member of the party, was uninjured.

LAY IN CHAIR
Miss Mansfield lay in a deck chair swathed in blankets as the group returned to Nassau aboard the 65-foot charter yacht Blades, which picked them off the beach of isolated Rose Island after a plane spotted them.

Hargitay told the story of their experiences after they set off about noon on the water-ski trip. Jayne and Mickey were on skis and Drury piloted the 17-foot, white-hulled outboard

boat they had rented. Nothing seemed amiss, they reported.

Hargitay said the party continued until they got about 1 1/2 miles from Rose Island, six miles from Nassau.

Jayne fell off her skis, he said. He tried to help and fell off himself. She complained of a hurt leg. They were not wearing life jackets.

Drury, in the boat, said he thought he saw sharks and called a warning.

Jayne panicked, Hargitay said. The men said they brought the boat about and tried to get her into it. Hargitay lost his grip on Jayne and she went under the boat. They got hold of her again, but in trying to get her into it, the boat overturned. Then Jayne fainted, her husband said.

DRIFT AN HOUR
Drury and Hargitay got Jayne atop the overturned boat and her husband held her while they drifted perhaps an hour.

About dark, they drifted near

EARLY PAYMENT ASSISTS CARRIER

Weekly collections by your Guardian carrier are timed to provide convenient service and to meet his school and study schedule.

He may begin collections on Thursday and continue through Friday and Saturday. Your thoughtfulness in paying him the first time he calls will encourage him to prompt service.

Your carrier is an independent merchant, and like all merchants, he must be sure of his collections before he can enjoy the full profit of his labors.

Rioting Erupts

PARIS (AP)—A massive Communist-sponsored demonstration against the right-wing extremist Secret Army Organization erupted into wild rioting in the historic Place de la Bastille last night, plunging France a step closer to anarchy.

Five persons were killed and more than 200 injured in three hours of spreading battles between club-swinging police and stone-hurling demonstrators.

As the fighting raged, the Secret Army's plastic bombs, which have plagued the capital for months, exploded in scattered sections of Paris.

The deeply-troubled French government issued an urgent appeal for order and warned against anarchy.

The rally was staged in defiance of government orders banning public demonstrations.

Police said 83 demonstrators were arrested and jailed. An official investigation was ordered.

Fighting slackened off shortly before midnight and riot forces had the situation under control. Through the night patrol squads continued to mop up in side-street skirmishes with dards.

A loud hassle erupted when J. W. Pickersgill (L—Bonavista—Twillingate) declared that Mr. Diefenbaker is away from his office half the time.

Frank Howard (CCF—Skeena) said the government has been "caught with its pants down" on the question of extending Canada's territorial waters.

The government tabled further supplementary spending estimates of \$115,647,429 for the current fiscal year, raising this year's spending to a record.

Senator J. W. de B. Farris (L—British Columbia) called Canadian trade with Cuba "scab" interference with the U.S. trade embargo.

FRIDAY, Feb. 9
The Commons meets at 11 a.m. to continue the debate on government welfare measures. The Senate stands adjourned until Monday at 8 p.m.

Mac, JFK Agree On Nuclear Tests

WASHINGTON (AP)—President Kennedy and Prime Minister Macmillan announced Thursday they have proposed to Soviet Premier Khrushchev that a foreign ministers meeting be held on disarmament.

They hinted at a summit meeting to follow.

Their announcement also said Britain has agreed to allow the U.S. to use Christmas Island in the Pacific for atmospheric nuclear tests should the U.S. decide to test nuclear weapons in the air. In return the U.S. granted Britain permission to

undertake an underground test in Nevada.

The announcement, made simultaneously in Washington and London, shaped up as a joint U.S.—British strategy aimed at:

New Lumber Mill Destroyed In N.B.

NEWCASTLE, N.B. (CP)—The new lumber mill of British-Canadian Plywood Limited was destroyed Thursday by a fire that caused damage estimated by fire officials at \$225,000 to \$250,000. The loss was only partially covered by insurance. No one was injured.

Newcastle firefighters and the New Brunswick forest service fought the blaze but were unable to save the building. The cause was not immediately determined. The two-story building was built in 1960, and started operations in January, 1961. The mill employed about 50 people.

THIS SHOWS the charred remnants of the dwelling at O'Leary where one woman died yesterday and another was fatally injured. The blaze was fought by both O'Leary and Alberton fire departments but had gained too much headway to be halted. A small building was a few feet from the house was saved. (See also picture on page 3.)

2 Women Lose Lives In O'Leary Dwelling

O'LEARY—Two women are dead as the result of a fire which destroyed a dwelling on the outskirts of this town Thursday shortly before noon. Dead are Mrs. Clarence (Lida Charlotte) Johnson, 92, and her daughter, Miss Lottie Eliza Johnson, 63.

The younger woman died in the fire which destroyed their home. Her mother succumbed to severe burns several hours later in hospital here.

A third occupant of the house, Lee MacWilliams, an electrician here, was severely burned while rescuing the older Mrs. Johnson. He is in hospital here but is expected to recover.

FOUND HOUSE IN FLAMES
Mr. MacWilliams, and Miss Johnson, an O'Leary sales clerk, were reported to have arrived home shortly after 11 a.m. to find the dwelling in flames. MacWilliams entered the house and was able to rescue Mrs. Johnson, although receiving burns about the face and hands while carrying her to safety. Miss Johnson, who may have also helped in the rescue, was thought to have re-entered the house to attempt to save some

personal belongings. Cause of the outbreak is not known.

The O'Leary fire department, later joined by Alberton firemen, fought the blaze for almost two hours but flames had spread throughout the interior of the building before they arrived and their efforts were in vain.

More than 3,000 gallons of water were used but only remnants of the outside walls are left standing. Extreme cold hampered the work of firemen. The temperature was only slightly above zero.

A small building containing plumbing and electrical supplies was saved although it was only a few feet from the burning house. No other buildings were in danger.

BODY IN KITCHEN
Mrs. Johnson's body was found in the kitchen, not far from the stairway.

Coroner Dr. C.M. Dewar of O'Leary said an inquest was not necessary.

There are no surviving members of the Johnson family, it was said.

Funeral services will be held Saturday afternoon at the United Church here.

Yanks Planning New Assistance To S. Viet Nam

WASHINGTON (AP)—The United States Thursday created a new command headed by a general to conduct an expanded U.S. effort to help South Viet Nam beat off the Communist threat.

A U.S. Defence Department spokesman said the move stresses that "we intend to win" the struggle.

The new command called the United States Military Assistance Command, will direct the activities of U.S. aircraft and other units which have been flowing into South Viet Nam over the last few months.

The Pentagon spokesman stressed that "we are not in combat." He said U.S. efforts are limited to supporting and strengthening the pro-Western South Vietnamese with additional equipment, training and advice.

PREMIER, PROVINCIAL SECRETARY VISIT COURSE

Premier Walter R. Shaw and Provincial Secretary J. David Stewart paid a visit to the Charlottetown Armouries yesterday to witness the special

coedings of the second of a series of civil defence survival courses. The Premier and Mr. Stewart were very interested as they watched the special

militiamen go through the various phases of their training. From left to right standing are, Lieut. J. Hobbs, Premier

Shaw, Mr. Stewart, Major Lorne Ramsay and Col. Keith Johnston, with course members in the foreground.

New Aid Offered To Spud Exports

CAPITAL BUREAU OF THE GUARDIAN

OTTAWA—The federal government moved Thursday to assist in the reduction of large stocks of Maritime potatoes.

Fisheries Minister Angus MacLean of Prince Edward Island and Forestry Minister Hugh John Flemming of New Brunswick jointly announced on behalf of Agriculture Minister Alvin Hamilton that the government had authorized aid to move potatoes to non-North American markets.

The aid is to be provided by the agricultural stabilization board and will take the form of direct payments to producers sufficient to guarantee a return of \$1.45 for each graded 165-pound barrel of No. 1 potatoes, loaded on cars. No. 1 potatoes may be from one and one-half to four inches in size. It is the first time that the government has provided this sort of direct producer aid in an effort to reduce large stocks of potatoes and establish a more normal potato market in Canada.

STOCKS HIGHER
Stocks of Maritime potatoes are some 300,000 barrels higher than they were at this time last year. The authority given the stabilization board Thursday provides for assistance on moving 267,000 of the 300,000 barrels extra supply. Latest figures on potato storage holdings show that at February 1 this year, there were 8,693,000 hundredweight of Maritime potatoes on hand as compared to 8,416,000 at the same date a year ago.

Earlier, Agriculture Minister Hamilton had announced a starch diversion program in New Brunswick. The price of No. 1 grade
