NEW PROTECTION FOR YOUR FALL AND WINTER DRIVING

For motorists who normally use regular grade gasoline Esso now gives protection against stalls due to carburetor icing* at no increase in price!

For several years Esso Extra has provided complete protection against the two cold weather stalling hazards—carburetor icing and gas-line freezing. Many Canadian motorists need protection only against carburetor icing. This has now been provided for most cars in Esso!

*Annoying stalls can result in weather as high as 55°F. from ice crystals in the carburetor. These stalls can be embarrassing because they usually occur, before your engine warms up properly, at times when your car has to stand idling at stop-lights and stop streets.
