Friends are sorry to hear that Mrs. Bruce MacPhee, Montague, is a patient in the King's County Hospital. She is wished a speedy return to health.

Announces Change

(Continued from Page 1)

of the City Schools was between \$3,200 and \$3,300 and those of the vice principals about \$2,600. A first class teacher after five years in a City school was receiving from \$1,500-\$1,800.

The salary of the Supervisor of Summerside High School is about \$3,400 while those with more than 13 years' experience on the staff receive about \$1,900.

Teachers' salaries during the year amounted to about \$540,000 and supplements to around \$40,000. The average salary for a first class teacher is \$1,478 and that of a second class teacher \$1,075. The permit teachers average \$718.

There is a great need for dormitory facilities at Prince of Wales College, he stated. The big problem, he indicated, was in finding a building for the project.

A new course for students at school is alcohol education. The only objection to this course is the possibility that teachers may interpret the text books to suit their own opinions.

"We are proceeding cautiously with the amalgamation of schools," he continued, "although School Unit No. 1 is proving successful."

With regard to the school courses offered, that the Department was being criticized for falling behind the other provinces in their choice of courses. The big complaint was that not enough opportunity was being offered the student.

In New Brunswick, a student can decide in Grade VII which course he wants to take. If he wishes to prepare for the professions he can take the straight academic courses or he can take a course in practical work to suit his own desires.

There were limited facilities for practical courses in Charlottetown and Summerside, but none in the rest of the Province. In order to institute such service it would be necessary to provide high schools which would be an expensive proposition.

He commended the Government for continuing its policy of highway modernization. He was particularly pleased to see the progress made in paving the road to Cardigan and Georgetown. This road has been surfaced with stone and the paving plant erected. He hoped to see the work completed by early spring.

As further compensation to King's County for not obtaining any Trans-Canada Highway projects, Mr. Clark urged that the paved road system be extended from the Wood Islands ferry to Souris, through Cardigan, Dundas and Brigidetown.

In his own district he was well pleased with the progress made in roadwork in the last three years. The village of Cardigan now has three gravelled highways leading out of it, in four directions.

Montague Bridge
Maintaining that the Montague Bridge was the most important of all the bridges in the Province, Mr. Clark said there was more traffic over this bridge than any other, including even the Hills-

•CONGOLEUM SQUARES, all sizes. A large assortment of sizes and colours at Stewart & Beck's.

•WALLPAPER, paints and house cleaning supplies, Hickey and VanDerstine, Montague.

•CAR BATTERIES \$11.50 to \$25.00 with an old battery. Bud's Accessories, Montague.

Commends Mail Service During Rail Strike

"The only real mail service we had in King's County was last summer, during the railway strike," declared Mr. Keir Clark, Third District of Kings, in speaking on the Draft Address in the Legislature Monday evening.

Mr. William Hughes, Fifth King's, disagreed with Mr. Clark on this point. Speaking later in the debate, he said the service during the strike proved satisfactorily for incoming mail, but caused a day's delay in outgoing mail.

Dealing with farm conditions, Mr. Clark said the House had heard "an extraordinary tale of woe" from the Opposition leader. He did not think the farmers were so poverty-stricken as they were represented to be. Such conditions might prevail in Second Queen's, but not in King's County or in the Province generally.

The Opposition leader's statements, he said, had more fitting reference to the conditions prevailing in 1934, under Conservative governments.

Today, potatoes were the only product affected by depressed prices. This was due to over-production. Mr. Clark believed there should be an acreage limit placed on this crop. The smaller growers should not be limited, but large crops of from 50 to 100 acres or more should be curtailed.

Sugar Beet Production
An industry which might profitably be looked into, he suggested, was sugar beet production. He did not know if this could be produced profitably on a commercial basis here, but in all Canada only 23 percent of the supply of sugar is produced.

He cited an amusing item from the annual report of the Royal Canadian Mounted Police. A pitcher of milk was examined by the authorities, which was claimed by the woman of the house to be "just as it came from the cow."

It contained 5.8 percent of alcohol. "It was just wondering if that was the kind of cows the leader of the Opposition had in mind the other day, when he proposed those livestock loans," he said.

Mr. Clark maintained that the Opposition leader was ten years behind the times in urging a policy of this kind, because livestock loans have already been taken care of by the Federal Government under the Farm Loans Act of 1944. Under this Act the banks can also loan money for farm implements, etc., and in some cases the loans can be extended for ten years.

He commended the Government for continuing its policy of highway modernization. He was particularly pleased to see the progress made in paving the road to Cardigan and Georgetown. This road has been surfaced with stone and the paving plant erected. He hoped to see the work completed by early spring.

As further compensation to King's County for not obtaining any Trans-Canada Highway projects, Mr. Clark urged that the paved road system be extended from the Wood Islands ferry to Souris, through Cardigan, Dundas and Brigidetown.

In his own district he was well pleased with the progress made in roadwork in the last three years. The village of Cardigan now has three gravelled highways leading out of it, in four directions.

Montague Bridge
Maintaining that the Montague Bridge was the most important of all the bridges in the Province, Mr. Clark said there was more traffic over this bridge than any other, including even the Hills-

Mr. Clark went on to commend the progress made in extension of electric light and power lines throughout the Province, as referred to in the Speech from the Throne.

Mr. Phillip Matheson: "Might I ask the hon. member, if he was looking for an extension of electrical lines, would he go to the Maritime Electric Company or to the Government?"

Mr. Clark: "That is a question I wouldn't be prepared to answer. The Maritime Electric, I suppose, the Board of Public Utilities might have something to do with it."

He went on to point out that the old cable to Georgetown is no longer able to carry the power needed today, and that a line should be run along the paved road in order to secure a good supply of electricity for this area.

At Montague there have been several interruptions, and days when the power was not on. As an improvement he suggested a tieup line to link up the Souris and Murray Harbor lines. "If I knew whom to apply to I would go after him right away," Mr. Clark said amid laughter.

He commended the Federal Department of Natural Resources for sending two forestry officials here, and said the instruction these afforded should prove of material benefit.

Funeral of Mrs. John W. Campbell

The funeral of the late Mrs. John W. Campbell, Montague, who passed away in the King's County Hospital on March 11th, was held from St. Andrew's Presbyterian Church yesterday afternoon. There was a large attendance of relatives and friends.

The service was conducted by Rev. Paul Richardson, assisted by Dr. A. D. MacKenzie and Rev. F. N. Young. Rev. Mr. Richardson took for his text Psalm 132, verse 14 "This is my rest forever; here will I dwell; for I have desired it." He spoke words of comfort to the bereaved and paid tribute to the influence and effective service of the deceased.

Mrs. A. F. Campbell presided at the organ and the hymns were sung by a joint choir from the Christian Church and the Presbyterian Church. The hymns were "In The Sweet Bye and Bye", "Asleep In Jesus" and "Safe in the Arms of Jesus."

The pallbearers were: A. C. MacKay, Guy Nelson, Cecil Beck, Harvey Fraser, Wm. Johnston and A. D. MacLeod.

Interment was in the Montague Community Cemetery.

Fire Drill At Montague High School Yesterday

Fire drill was held in the Montague High School yesterday afternoon at 2.15 P.M.

On the ringing of the alarm the students of each room filed in order to the exit door designated beforehand for that room. The teacher followed taking the register. The students remained in file outside while the teacher called the roll to check that all students were out of the building.

The building was vacated in 45 seconds and with more drills it is expected to vacate the school in 30 seconds from the time the alarm is sounded. Fire drill has on several occasions proved its worth in other schools, and should the need arise the students of the school will all be ready to vacate the school with all possible speed. —M

boro Bridge. Certainly the traffic was more congested. The bridge had been erected in 1912 and was not designed for the heavy traffic going over it today. He hoped to see it replaced with a modern concrete bridge, so constructed as to have a low dam under the bridge.

Mr. Clark went on to commend the progress made in extension of electric light and power lines throughout the Province, as referred to in the Speech from the Throne.

Mr. Phillip Matheson: "Might I ask the hon. member, if he was looking for an extension of electrical lines, would he go to the Maritime Electric Company or to the Government?"

Mr. Clark: "That is a question I wouldn't be prepared to answer. The Maritime Electric, I suppose, the Board of Public Utilities might have something to do with it."

He went on to point out that the old cable to Georgetown is no longer able to carry the power needed today, and that a line should be run along the paved road in order to secure a good supply of electricity for this area.

At Montague there have been several interruptions, and days when the power was not on. As an improvement he suggested a tieup line to link up the Souris and Murray Harbor lines. "If I knew whom to apply to I would go after him right away," Mr. Clark said amid laughter.

He commended the Federal Department of Natural Resources for sending two forestry officials here, and said the instruction these afforded should prove of material benefit.
