FARMERS IN COUNCIL.

An Agricultural Professor Wanted.

MORNING SESSION.

Agricultural Education.

The Association met at nine o'clock on Friday morning, James Carruthers, Esq, in the chair.

Mr. Turner's resolution calling upon the Provincial Government to appoint a Professor of Agriculture to Prince of Wales College and also to deliver agricultural lectures and addresses throughout the country, was first taken up.

Mr. John Edwards suggested that, in view of the apparent apathy of many farmers in respect to agricultural education, the time to obtain a professor had not yet arrived. The cost, too, he said, is a matter to be considered.

Mr. Stephen Huestis thought it very desirable that the principles of agriculture should be taught in the public schools.

Mr. Turner said that no objection was raised to the other professors in Prince of Wales College on account of their cost,—though they train our young men and women to leave the farm. He thought it high time to stir up the youth of the Province to the first-rate importance of agriculture, and he agreed with Mr. Huestis that the place to begin is in the schools. That is one of the reasons why a Professor of Agriculture is needed in Prince of Wales College.

Mr. Stitson quoted the proverb "Train up a child in the way he should go," etc, and said that in his opinion, this was a golden opportunity for the farmers to express their opinions as to the importance of agricultural education and the duty of the Government in respect to it. For his part he thought that the Government ought, if necessary, to make a cut in other directions and have an agricultural professor at all hazards. What has raised agriculture in this Province? The lectures of Professor Robertson and other professors, more than anything else. Why not continue this good work on behalf of the Province? If the farmers stand shoulder to shoulder and present their claims in a straightforward manner they will be recognized.

Mr. Gill said that if we wait till the people know all about the needs of agriculture there will then be no need of an agricultural professor. The aim and standard of education in this agricultural Province ought to be changed. He would do away with one of the classical professors and put a professor of agriculture in his place. It is a curious fact that while our school population is smaller than it was, the cost of education is larger and has lately been growing considerably.

Mr. Brown referred to Professor Harcourt and the valuable lessons he gave certain farmers concerning a balanced ration of food for cattle. He was in favor of having an agricultural professor, and thought that the people had already waited too long. The longer we put off, the further away will be the time when our young people are prepared for the instruction which an Agricultural professor can give.

Mr. S. Huestis thought that part of the money now expended on other branches of education might be taken and applied to instruction in agriculture.

Mr S. G. McLellan said that the question of "cost" was not entertained when we had Professor of Agriculture. If "cost" was the difficulty, we could dispense with one of the other Professors in Prince of Wales College. Let us have Agriculture instead of Physics or Latin, or Greek. The farmers should unite to demand the appointment of an agricultural professor.

The resolution was then put and carried unanimously; and the following gentlemen were appointed a committee to press the matter upon the Government, viz, Messrs Fred Turner, J. R. Edwards, and James Carruthers.

PROTECTION OF SHEEP.

Mr. Archibald Stitson submitted the following resolution, which was seconded by Mr. Fred Turner;

Whereas, it is highly desirable that something should be done with a view of protecting as far as possible, sheep from the ravages of dogs, and to make provision for raising a fund to indemnify farmers for losses sustained or damages occasioned to their flocks, in certain cases; and whereas it is believed that the levying of a dog tax would greatly tend to lessen the number of dogs and thus to reduce the opportunities for damage doing,—

Therefore resolved, that in the opinion of the members of this Association a law should be enacted by the Legislative Assembly imposing a tax of $1.00 upon every dog, to be paid annually, such tax to be levied and collected in each school district, in the same manner as the ordinary school assessment; the amount so collected up to $50.00 in the aggregate to form an indemnity fund for losses, etc., sustained, and the surplus over that sum, to be available in the school district for current school expenses.

Further resolved that petitions to the Legislative Assembly asking for the enactment of such a law, at the next session of the Legislature be circulated throughout the Province forthwith.

This resolution was discussed by Messrs Gill, Edwards, Huestis, Turner, Crockett, and McInnis, all of whom were agreed that sheep raising is highly important to the Province, and dogs a great nuisance, while the present law is ignored.

Mr. Gill suggested as an amendment to the resolution that a Central Sheep Fund of $500 should be made up out of the proposed dog taxes; and the balance returned to the respective school districts in proportion to the amount of taxes paid by them.

After some discussion this amendment was moved and adopted.

It was also agreed that the following gentlemen be a committee to see the matter through, viz. Messrs Stiteon, Crockett and Edwards.

ACKNOWLEDGMENTS.

After some discussion as to the importance of publishing a programme for the semi-annual meetings, and the adoption of a motion authorizing publication a month previous to each semi-annual meeting,—

Mr Crockett moved that the thanks of the association be tendered to the inhabitants of Wilmot Valley for the hospitality extended to visiting delegates.

The motion was seconded and supported by Messrs Gill, McLellan, Anderson, Brown, Turner, Stitson and others all of whom acknowledged the warm reception and hospitable treatment of their entertainers.

The vote of thanks passed unanimously, and was suitably acknowledged on behalf of those concerned by Messrs Humphrey and Rogers.

The thanks of THE EXAMINER are specially due to the Messrs. Huestis and Mr. Burris.

NEWS NOTES.

John Towsend, of Philadelphia, a few evenings ago, held a card party at his rooms. During the festivities Townsend took a dose of poison and died. He had previously intimated that he was a member of a suicide club, and had drawn a card which meant that he should die that evening.

The Countess Baloch, who died lately, was one of the most miserly women millionaires in the world. Nearly $2,000,000 in bonds and currency were found sewed in her dress. She almost starved herself to save money.

The French parliment is to be asked to vote 894 500 000 francs to the naval budget for 1899, of which amount 121,000,000 francs will be expended upon the construction of sixty-three vessels already begun and twenty eight others to be started in 1899.

It is announced that Colonel Kitchener, brother of the Sirdar, Lord Kitchener, of Khartoum, has started with reinforcements to take command of the expedition organized at Dumlin to operate against the Khalifa, who has been raiding Arab settlements in that vicinity.

Word comes from Paris that both Prince Victor Napoleon and the Duc d'Orleans are burning to be up and doing. Should an opportunity present itself it is not impossible that the two pretenders might attempt to appear at the same moment.

A strange admiralty case was heard at Boston a few days ago. It was brought for salvage for the saving of United States and French money of the value of $1,050, found on what the law terms a derelict at sea. The derelict in this case was the body of a man, believed to have been a victim of the disaster to the steamer La Bourgogne, last July. The body has not been identified however. The libel was that brought by the owners of the fishing schooners William H Cross, in behalf of themselves, her master, and the crew of fourteen men against the property found. The body was buried at sea, and all efforts to find relatives of the derelict have failed. Judge Lowell took the matter under advisement.

Perfectly Cured

Weak and Low Spirited -- Nervous Prostration — Appetite Poor and Could Not Rest.

"I take great pleasure in recommending Hood's Sarsaparilla to others. It has been the means of restoring my wife to good health. She was stricken down with an attack of nervous prostration. She suffered with headaches and her nerves were under severe strain. She became very low spirited and so weak she could only do a little work without resting. Her appetite was poor, and being so weak she could not get the proper rest at night. She decided to try Hood's Sarsaparilla, as we had heard it highly praised, and I am glad to state that Hood's Sarsaparilla has perfectly cured all her ailments." G. BELLAMY, 321 Hannah St., West, Hamilton, Ontario. Remember

SUNNYSIDE

TOBACCO AND THE HEART.

A Doctor Gives What He Calls Cold Facts About Smoking.

"I don't like to upset a cherished tradition," said a doctor who is himself a devotee of the weed, "but the talk one hears of nicotine saturating the systems of smokers is mostly rot. Nicotine is a deadly poison. One drop of it will make a good sized mastiff turn up his toes if injected subcutaneously, and it would take precious little of it to kill a man. The truth is that very little is absorbed, even by the most confirmed smokers. Now and then you read of men who die from excessive tobacco using and are found on autopsy to be literally reeking with nicotine. All rubbish. Nothing of the kind ever happened.

"Again, it's a favorite experiment to blow smoke through a handkerchief, and the stain that is produced is popularly supposed to be made by nicotine. It is really oil of tobacco, which is a horse of quite a different color. No, the chief harm done by smoking is the stimulus which it gives to the heart. This is particularly true of cigarette smoking, where 'inhaling' is nearly always practiced.

"Each time the smoke is inhaled it acts as a slight spur to the heart, and, needless to say, there is sure to be a reaction. If the smoker is in good general health, he will probably never feel it, but if he isn't there will be periods of profound depression, and, not knowing the cause, he is apt to try to brace up on a drink, which makes matters just that much worse. If he has organic heart trouble—valvular weakness, I mean—it's quite possible that he will tumble over some day and put his angel plumage on. Those are the cold facts about smoking—none other are genuine."

FARM TO LET AT ROYALTY.

To let "Milford Farm" on the North River Road, about a mile from the city, at present in the occupation of the Widow of the late George Thorne. It comprises about 29 acres of land in a high state of cultivation, fronts on the North River Shore. There is a good one and a half story farm house with outbuildings and a large stable and barn, and a tool house on the premises. Possession given, if required latter end of November. These premises are well adapted for a butcher and pasture farm. Rent $200.00 a year. For further particulars apply to.

ARE YOUR Artificial Teeth.... : : Giving Satisfaction

Many persons who are compelled to wear Artifical Teeth on Plates, find that the Rubber or Vulcanite plate causes heating of the mouth, bad taste, shrinkage of the gum etc, finally causing the plate to get loose. Sometimes sore lips, sore mouths and sore throats are caused directly from the wearing of a rubber or Vulcanite plate. While it is true that a majority of persons can wear rubber or vulcanite plates with satisfaction, yet it is a fact that to a large percentage the same material is poisonous.

We have seen many cases where people who had rubber or vulcanite plates were continually suffering from the above causes, and came to us for relief. In case of that kind we always recommend a metal plate, either of

Gold, Platinum, Aluminum

Our reason for recommending a metal plate is that it is a conductor of heat and cold, thereby keeping the mouth cool, and it is non irritating, and is thinner, lighter and stronger than any other plate. It is clean in every particular, and is enjoyment to the wearer. You can have your impression taken and have a Gold, Plantinum or Aluminum plate made same day, fully guaranteed because we make them ourselves and know all about the material used. We also make the famous THURLO PLATE, noted for its thinness, coolness and durability.

We would like you to call and see specimens of all our different lines of work including our Continous Gum Plates—the very finest plate work known to Dental Science. Every piece of work done by us must give entire satisfaction to the patient else we will not allow it to leave our office.
