Souris Breakwater.

To the Editor of the Examiner.

SIR:—I am pleased to be able to announce to you that the Souris Breakwater is now being rapidly pushed forward to completion by the energetic and persevering contractor, Pierce Doyle, Esq., whose knowledge of public works of this character is pretty extensive, and who has always had the reputation of being punctual in carrying out the many contracts he has had. Mr. Doyle has had a Mr. Ramsay from from his own part of the country as foreman. This man, although a good enough workman, didn't appear to push the work with any great impetus, and Mr. Doyle has therefore lately discharged him and has now Mr. Coffin of St. Peter's, as foreman, who appears to be rapidly doing most excellent work. We are of opinion that if Mr. Doyle had had Mr. Coffin in charge from the beginning he would now be much more forward with his contract. Mr. Doyle has three cribs of this important work nearly completed and will be ready in ten days for putting out the outside crib and spur. The work looks well and is as strong as wood and iron can make it, and the part completed is well filled with stone. The timber of which this work is constructed is large and sound, and well and closely fitted; well fastened, and quite up to the specification in every particular. M. Doyle intends having enough of stone on hand in schooners and scows to secure the outside crib from ordinary storms so soon as placed in position. He has nearly all his timber on hand and has also a large quantity of stone quarried. We wish Mr. Doyle every success in carrying out this desirable public work, thus making Souris a harbor of refuge—giving good facilities for trade, and enhancing the value of real estate in the eastern section of the country. It affords us much satisfaction too, to be able to state that Mr. Doyle will clear a handsome profit on this contract, although some malicious person has circulated that he would lose money on it.

The Souris Breakwater reflects very great credit on Mr. Doyle and also on James McDonald, Esq., the Government Inspector. I am, etc. Justice. Souris, Sept. 15, 1879.

Wood Islands Breakwater.

The Kings County Advertiser reports that the construction of this important public work was commenced by Mr. John M. Stewart of this town on the 12th of May last and satisfactorily completed on the 10th of August, for the sum of \$3,000. We have been credibly informed that the workmanship is very substantial, and strictly in accordance with the plan and specification laid down by the Department of Public Works. It has been erected at Victoria Harbor, Wood Islands. The dimensions of this work are, length 350 feet, and width 22 feet, which gives 8 feet of water at the outer end at high tide, and at present affords shipping facilities for vessels of small tonnage. Farmer residing in Wood Islands, Belle Creek, Little Sands, and Rona, who formerly were compelled to haul their produce to Montague Bridge, a distance of upwards of sixteen miles, are now enabled to ship their grain with far less labor and expense in their own neighborhood. The proposed extension of seven hundred feet, if erected, would give vessels of average tonnage ample accommodation, which we believe will be accomplished at an early day. The Government Dredge, allowing for disadvantage of low water, rendered good service in that locality this summer.

Hardships at Sea.

The Advertiser reports that in a letter received by Mr. John LeBrocq, of Georgetown, from Capt. Hector Murchison, of the brig, G. W. Wakeford, dated at Baltimore on the 6th inst., a brief outline is given of another perilous adventure, incident to seafaring life. While his vessel was lying at Morant Keyes, W. I., the captain and two men started ashore in a small boat, and before reaching the shore they were suddenly caught in a squall, and tick weather, which drove them out to sea a long distance. Unable to see land, or the vessel, they were three days and nights in this perilous situation, without food or water, which terribly exhausted all hands. At length, by cutting up their clothes and making a sail for the boat, they reached Jamaica, where they engaged a schooner to bring them back to the vessel. The captain states that he was badly burnt by the scorching heat of the sun, owing to the want of clothing, and could not stand upon his legs for four days afterwards. His friends will be glad to learn that he is fully restored from the effects of the great hardship he endured on this occasion. The G. W. Wakeford is now loading at Baltimore for Ireland.

William Shaw, a leading Home Rule member of Commons for the County of Cork, has written a letter refusing to participate in the proposed Irish National Convention. He proposes the establishment of a Convention to discuss the land question only.

NEWS BY TELEGRAPH.

EUROPEAN.

LONDON, Sept 18.

Sir Garnet Wolsey telegraphs from South Africa that all important Zulu chiefs have now submitted to the British authorities. The movement in Oldham to adopt some place other than Liverpool as the centre for raw cotton, does not seem likely to come to anything. The Manchester Guardian says it is understood that an agent from New Orleans has been in Oldham relative to the purchase of cotton direct from the producer, but the great majority both of private firms and limited companies are averse to substituting American for English cotton agencies.

The correspondent of the Manchester Guardian, at London, says Lord Cranbrook, Secretary of State for India, has gone to Balmoral, and although it is said that his visit is merely routine duty, it is thought he can only be absent at such a critical time to consult the Queen on some course which the Ministry have decided upon. No body would be surprised if his visit is followed by an early summoning of Parliament.

A despatch from Cairo says it is expected that negotiations between Egypt and Abyssinia will be successful. King John of Abyssinia has consented to an interview with Col. Gordon.

Lord Beaconsfield delivered the speech at the agricultural banquet at Aylesbury on Thursday. Referring to American competition with Great Britain, he said: "The greatest apprehension is felt in the United States that they cannot compete with Canada, owing to their high taxation and high wages. Since the surrender of the territory of the Hudson Bay Company, Canada has become possessed of an illimitable and fertile wilderness. Nearly all of the chief landholders in the extreme Western States of America have sold out and gone to that wilderness and begun the work of cultivation there. He had heard on high authority that Canada expected to outstrip the United States in the competition for the European markets. He therefore advised the farmers of England not to be precipitate. Another high authority had informed him that under all circumstances the markets of the United States would be disturbed, and that with the impulsive character of humanity in the United States, the Canadian wilderness would soon be occupied by millions."

A despatch from Candaharsays that Gen. Hughes' brigade has been ordered to Khelat. The Ghezia regiment at Herat mutinized on the 5th inst., and murdered their commander.

The "Standard's" Ali Kheyl despatch says, intelligence has been received of a terrible outbreak at Herat. The troops have revolted and murdered the civil and military authorities.

UNITED STATES.

The Butler Convention at Worcester yesterday, and the Butler Democrats at Worcester on Wednesday, both nominated Benjamin F. Butler for Governor. He is now the nominee of three Conventions.

MARKETS.

NEW YORK, Sept. 18.

Wheat feverish, unsettled, 1 to 3 higher; No. 2 spring 1½c to 12c. Petroleum unchanged. Pork stronger, \$8.90 to \$9.25. Freights steady. Sterling quiet and steady; \$4.81½ to \$4.81½ for long; \$4.85 to \$4.83½ for short sight.

CONDENSED DESPATCHES.

LONDON, Sept. 18.

Thos. C. Scott, an agricultural authority, writes as follows: The Government and trade estimates show that the surplus of wheat in America, Russia and in the East is 505,000 quarters less than the aggregate deficiency in the various countries, and a rise in breadstuffs is therefore anticipated.

It is believed the newspaper war between Germany and Russia was a mere diplomatic comedy to test the intention of France.

Sir Charles Tupper's Steel Rails Purchase.

The following paragraph appeared in the Dundee (Scotland) Advertiser at the time of the purchase, by Sir Charles Tupper, of steel rails in Great Britain for the Canada Pacific Railway, and speaks for itself:—

"We understand Messrs. John Wallace & Co., iron and steel merchants, Dundee, have been the successful contractors to supply 15,000 tons of steel rails and fastenings for the Canada Pacific Railway. The Canadian Government asked tenders for 15,000 tons, but the Minister of Railways and Canals considered the prices quoted by the various firms so very moderate that he has bought in all 60,000 tons. Steel rails were never sold at the prices offered before, and it is considered unlikely they will ever do so again. The demand for pig iron and old rails for America is developing, and freights from Glasgow to New York, which for long have been 2s. 6d., were 12s. 6d. last week."

The Moncton Times remarks: "Sir Charles Tupper purchased his rails last month for less than one-half the figure Mr. McKenzie bought at four years ago. The purchase was most judicious, as there is now an upward tendency in the market."
