The bidding:

East	South	West	North
1 ♠	Pass	Pass	Dble
Pass	1 NT	Pass	3 NT

Opening lead—two of spades.

Just as the declarer has an advantage when he has a long suit to run, so the defenders frequently have a corresponding disadvantage when it comes to selecting their discards as the suit is run. Observe East's quandary in this hand when declarer cashes dummy's six club tricks.

A spade is opened, East winning the ace and returning the jack. South ducks, but is forced to win the third round of spades with the king as dummy discards a diamond.

Declarer might give thought to taking a heart finesse immediately in an effort to gain his ninth trick, but this course of play would be incorrect, since the heart finesse seems destined to lose in view of the bidding.

It appears quite likely that East has both the ace of diamonds and king of hearts as part of his opening bid. If he is permitted to take the lead early, rapid defeat can easily follow. Far more attractive is the opportunity to cash the club suit and compel discards from East which will weaken his position.

Declarer thinks in terms of what four cards East will have left after the clubs are taken. Since East has the burden of guarding hearts, his last four cards will presumably consist of K-X of hearts, ace of diamonds, and a spade. If this position can be attained the contract can be made.

Accordingly, the clubs are cashed. East follows to the first three clubs, then discards a diamond and a heart, but on the last club he has to part with a spade. (If he releases another heart, declarer can spear the unguarded king).

South, at this point, has won seven tricks. He needs two more. Dummy has two hearts and two diamonds.

The jack of diamonds is led. East is forced to win with the ace. He cashes his spade trick, but is then compelled to concede the last two tricks to dummy's ace of hearts and king of diamonds.

The procession of clubs, the sixth one particularly, effectively squeezes East out of a vital trick.

Fire Breaks Out In Coal Mine At Springhill

SPRINGHILL, N.S. (CP) — Miners worked through the night deep in the Cumberland Railway and Coal Company's No. 2 mine, trying to build up walls that would smother a smouldering fire.

No one was injured when the fire broke out at the 12,000-foot level of the pit. The flames were brought under control several hours after the working force of about 300 went to the surface. But the outbreak continued to smolder sending gas and smoke through the underground workings. Miners, assisted by men from the Stellarton, N.S. pits, sealed off affected areas.

The outbreak came just before the 3 p.m. shift was due to begin work. The morning workers were ordered from the pit immediately.

Weather Pushes Crops Ahead

HAMILTON (CP) — "summer" in April has pushed vegetable crops in the Hamilton district a week ahead of normal growth and some fruitgrowers expect blossoms by April 27.

Local market gardeners report that only asparagus could be in danger from a sudden frost this month.

In the eastern section of the Niagara Peninsula some growers say that if the present heat-wave continues there will be a "blossom Sunday" on April 27.

More cautious growers fix the date for May 4.

Thursday's exceptional weather smashed two records, with the temperature soaring to 80 degrees during the day and sliding to a high of 55 degrees at night.

Expect Increase In Delinquency

WINNIPEG (CP) — Canada's larger cities will face a tremendous increase in juvenile delinquency in the next few years, a Toronto social worker said here.

Art Pigott, vice - president of the Social Planning Council of Metropolitan Toronto, referred to the recent Gordon report which estimated that Canada's population would be 27,000,000 by 1980.

Most of this increase will be absbsorbed in metropolitan areas, he told the annual meeting of the Children's Aid Society of Winnipeg Thursday. When this happens we will have a "sociological explosion."

What children want most is "action, action, action," and at the moment the social system does not offer them that, he said.

"The people in the community and not the government are the ones to solve these problems. We are growing so fast that no government can be sensitive to the needs of the people.

"Our social and political machinery belongs to the 19th century and you can't move things rapidly through government in a country like this."

Specialist Deals With Deafness

WINNIPEG (CP) — Conductive deafness, which can often be treated successfully, generally results from infection of the middle ear, and middle ear disease always originates from nose and throat infections, Dr. Thomas C. Wilson, an Edmonton ear, nose and throat specialist, said Wednesday.

He told the convention of the College of General Practice of Canada that in children these infections commonly result from bad adenoids and tonsils.

Usually, he said, removal of adenoids and tonsils was all that was required to stop recurrent ear infections in children.

In the conductive type of early deafness, Dr. Wilson said, hearing is impaired because the ear drum membrame has become scarred and thickened.

ONLY HIGH TONES

This type of deafness is in contrast to nerve or perceptive type of deafness where only the high tones are involved, he said. While conductive deafness often responds to treatment, nerve deafness is usually permanent.

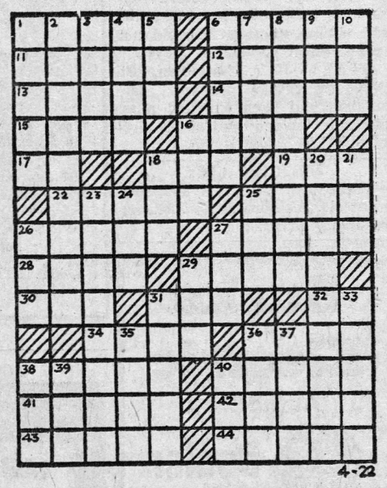
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

W J F R V P , F B B R W G Q W M , F C J F H J M P W B H P M Q Z Q W P X B V J F V B R O S P M H Q W M ! — O P J R H B W F .
