ELLEN'S DIARY

The Best Week Of All

But the shore called us—the delight if Island shores. And it was Rustico. Dow to the Harbour which as some one has pointed out, "is a typical fishing village that probably has delighted the hearts of many painters." It is a place which savors of the harvests of deep waters, of tides and fishing boats, and the scent of salt sea breeze. And we set our vantage on the map and westerly toward the Anne Country, with its blue sea reaching out and away, its beach and its dunes—

the organ, it was but to inspire the tuneful voices of our company to sing a verse from a familiar Psalm, the words going up to mingle with the shades of many a holy song sung there before, and to remain with us in mind long after we had gently closed the door and turned again to our way.

Our visit there seemed to come in benediction to our outing even though we had not yet completed it. Cape Tryon was still our objective. But the telling of that must wait. For now the week passes, going down, fading away out of sight along the aisles of Time.

The best week of all? One of them indeed, for the seasons bring many, each in its loveliness, each in its time. But this was the summer's (we believe) choicest offering—the full of the haylands, the charm of the roses Summer-bless her! at her zenith roses?

"He came and took me by the hand

Up to a red rose tree. He kept his meaning to Himself But gave a ruse to me I did not pray Him to lay bare The mystery to me. Enough the rose was Heaven to smell And His own face to see."

KEEP IN TRIM

The Dangers Of A Low Protein Diet

The British have an expression, "Lose fat, not flesh." In short, aim to lose excess fat only.

Many of you are writing to ask about the "revolutionary" new low protein diet widely publicized in a national magazine. Research proves that when the protein in the diet is inadequate to maintain the protein integrity of the body, weight loss will be greater.

Protein is the number one need of body cells, for every cell has protein as its structural material. The chief function of protein is upkeep and repair of body tissues.

Think of your body as your personal house which you wish to keep in a fine state of repair for the better part of a century, and make sure you eat the foods which furnish the materials necessary to repair and servicing.

Never let anyone sell you on the notion of reducing on low protein fare. Protein heads the list of "keeping young" nutrients. When the diet fails to include adequate protein, the elasticity of the skin is diminished—you will look and feel older.
