NOTES.  
Duke of Edinburgh's birthday on the 6th.  
Dog days end on the 11th.  
Landing of Julius Caesar (B.C. 55) on 27th.  
In this month the morning decrease 47  
minutes; the afternoon 59 minutes.

## THE RAILWAY TIME TABLE.

For the convenience of the travelling  
public, we have carefully arranged the fol-  
lowing table of arrival and departure of  
trains on the P. E. Island Railway, accord-  
ing to local time:—

Going West.	A. M.	P. M.	P. M.
Charlottetown	6 47	9 12	4 02
Royal Junction	7 02	9 47	4 27
North Wiltshire	7 37	10 39	5 09
Hunter River	7 47	10 55	5 22
Bradabane	8 12	11 32	5 57
County Line	8 19	11 43	6 07
Freetown	8 29	11 59	6 22
		P. M.	
Kensington	8 42	12 22	6 42
Summerside	9 07	12 57	7 12
		A. M.	
Micoche	9 27	2 37	
Wellington	9 42	3 00	
Port Hill	10 01	3 29	
O'Leary	10 29	4 20	
Alberton	11 22	5 42	
Tignish	12 05	6 57	
	12 42	7 47	
From West.	P. M.	A. M.	
Tignish	2 07	6 47	
Alberton	2 45	7 57	
O'Leary	3 29	9 02	
Port Hill	4 20	10 23

L. Goods, at prices that must sell them.

A job lot of LACE CURTAINS, regular price \$4.20, now \$3.25; \$5.50 for \$4.25; \$6  
for \$4.75, newest patterns and extra good quality. A large lot of  
Dress Goods, Fringes, Laces, Sunshades,  
Ribbons, Flowers, Feathers, &c.,  
at a Big Discount.

BLACK CASHMERE and MERINOES very cheap. Also, Men's FELT HATS,  
Ready-Made CLOTHING, &c.—Cheapest in Town.

L. E. PROWSE,

Sign of the Great Big Hat, 74 Queen Street.

Ch'town, July 15, 1885.

## USE DIAMOND POTASH.

New and Original Departure in Coal Cooking Stoves  
COMBINING  
DURABILITY, HEAT AND ECONOMY.

This Cut represents my Patent Fire  
King Cooking Stove, with the oven,  
and lining partially drawn out,  
as it appears while being cleaned, or  
when a new lining is being replaced.

THE above Stove I invented and patented in 1876, and at the present time HUN-  
DREDS ARE IN USE, giving perfect satisfaction. A large number have been in  
constant use for eight years, and the repairs have been very trifling, in many instances  
none have been required. This valuable experience should be sufficient evidence of the  
durability, which is accounted for in the following:—It has, instead of a Lined Fire Box,  
two heavy Curved Cylinders, which obviate the expense connected with all Square  
Cooking Stoves of being compelled to renew Linings and Grates, at least  
once or twice every year. The heat being radiated from the Cylin-  
ders to the floor, where most needed, overcomes a serious objection  
to all kinds of ordinary Coal Cooking Stoves. The Cylinders are situated  
directly under the cover holes, and a fire may be made in one or both, thus adapting it for  
use either in winter or summer, with equal satisfaction, besides effecting a great saving to  
fuel. I have also attached the PATENT TELESCOPIC OVEN to all my Elevated Oven  
Wood Stoves, such as the Waterloo, Niagara, Star, &c., causing the thousands using them  
to exclaim—My Stoves are worth TEN DOLLARS MORE than the same kind made by  
other founders. The trade and retail purchasers will please bear in mind the fact that  
although a great advantage is claimed for my own Oven above all others, they cost no  
more, and being the sole manufacturer and patentee, no other foundry can supply. En-  
quire for Fawcett's Patent Telescope Oven, and if your dealer has none on hand send  
direct to the Sackville Stove Foundry.

I am adding several new and handsome Patterns this season, which, with my former  
large variety of One Hundred Different Patterns and Sizes of Cooking, Parlor, Office and  
Hall Stoves, also Farmers Boilers, Hollowware, Ploughs, Stove Pipes and Tinware, com-  
prise the most complete assortment offered by any manufacturer in the Lower Provinces.  
Terms and prices will be found as favorable as can be obtained elsewhere.

CHARLES FAWCETT.

SACKVILLE FOUNDRY,

SACKVILLE, N. B.

June 19th, 1885—cod wly

## LETTERS TO THE EDITOR.

Electric Light.

SIR,—A few weeks before the Gas Com-  
pany's contract expired last November, the  
City Council asked for tenders for street  
lighting. When the tenders were opened  
there were some four oil lamp men, gasoline  
men and the Gas Company. One of the  
Councillors moved at the meeting that the  
tender of the Gas Company be accepted for  
one year, and gave as his reason that the  
Council had under consideration the light-  
ing of the city by electricity. Has anything  
been done to that end, or is it contemplated  
to go through the farce of calling for ten-  
ders again next November, when too late  
for an electric lighting company to tender.  
It has been said that the city can be  
lighted by electricity for less than the  
amount now paid the Gas Company. The  
plant, it is said, is not costly. There  
ought to be money in it for a local company.

TAXPAYER.

A Free Trader on Protection.

There are innumerable Free Traders in  
theory in this country, but when the oppor-  
tunity of practically testing the advantages  
of Protection arises, it is remarkable how  
completely their opinions change. An in-  
stance of this truth presents itself in an  
interview had with Mr. Frank Killam, a  
staunch Liberal ex-M. P. for Yarmouth  
county, by a representative of the Yarm-  
outh Times. Mr. Killam's views are so  
instructive and so valuable, because of his  
well-known political proclivities, that we  
reproduce them in full:—

Hearing that there was a large increase  
in the business of the Yarmouth Cotton  
Duck and Yarn Company, a representative  
of the Times waited upon Mr. Frank Kil-  
lam, one of the directors of the company,  
who kindly consented to give any infor-  
mation desired.

"Yes," said Mr. Killam, "the business  
of the duck factory is increasing very  
rapidly, and our duck and twine are mak-  
ing a fine reputation."

"Is the company satisfied with the pro-  
tection given by the duty imposed on for-  
eign duck?"

"I can only speak for myself and I am a  
free trader. The duck company was formed  
and the factory built in view, largely, of  
the promise given by Sir S. L. Tilley that  
when a duck factory was started in the  
Dominion that business would be accorded  
the protection that had been given to other  
industries. There is no reason why free  
traders should not avail themselves of this  
promise as well as protectionists. As a  
matter of fact the Cotton Duck Company  
embraces among its shareholders people of  
all shades of politics."

"Has the duty imposed on foreign duck  
had the effect of securing the home market  
to the Yarmouth factory?"

"It has. Dealers in Halifax and St.  
John who held agencies of American fac-  
tories are now preparing to deal almost  
entirely in Yarmouth duck. We now have  
agencies at Halifax, St. John, Toronto and  
Montreal. We are selling to all ports on  
the lake as far as Sarnia, and have applica-  
tions from British Columbia for our goods.  
We have made one shipment to Liverpool,  
England, and have arranged to have a  
stock kept there in future."

"Has the duty had the effect of raising  
the price to the consumer?"

"No; the price remains as before."

"How does the price of Yarmouth duck  
compare with that charged for goods in the  
United States?"

"The net price to the consumer is about  
the same here as that charged in Baltimore,  
New York and New England ports."

"How does the quality of Yarmouth  
duck compare with foreign goods?"

"Our duck has been examined by ex-  
perts in comparison with standard Ameri-  
can goods, and has been pronounced quite  
equal to the best of them, the difference, if  
any, being in favor of the Yarmouth duck.  
In twines we have made such a good rep-  
utation that dealers are using our twines in  
preference to the American to make up  
stocks of American duck remaining in  
hand."

"What have your sales been during the  
past half year?"

"In round numbers, we have sold 150,  
000 yards of duck during the past six  
months."

"How does this compare with the corres-  
ponding six months of last year?"

"It is fully three times as great this  
year."

"You are now supplying the trade for-  
merly divided among all the foreign agen-  
cies?"

"Yes."

"Has there been a corresponding in-  
crease in the sale of twine?"

"Yes; we are selling about three times  
what we were last year. The company is  
now making assorted wrapping twines,  
which are winning a fine reputation as  
economical twines for shop purposes."

"Then your business generally is largely  
increasing and the American goods are  
being kept out of the market?"

"Yes; the mill is now working with a  
large force, turning out a great quantity of  
goods, and we are keeping a large stock on  
hand to fill the expected demand."

That testimony is infinitely more valu-  
able than all the theories in the world. It  
is practical, the result of actual experience,  
and it indicates the necessity in the first  
instance of fiscal protection for the estab-  
lishment of home industries, and the ad-  
vantage to consumers and producers alike  
therefrom.

Dio Lewis' Nuggets.

Walking is the best of exercises, and if  
spirited, and the arms be allowed to swing  
freely, it brings into play the muscles of the  
upper part of the body as well as the lower  
half. Walking, if well managed, is better  
in one respect than exercise in a gymna-  
sium, where you get little sunlight, and  
where you are likely to breathe dust and  
impure air.

The design of the Creator is that we  
should prepare our food for the stomach by  
grinding it to a paste, and saturating it with  
the juices of the mouth; and, as digestion is  
the pivotal function of the animal economy,  
and the only direct contribution we can  
make to it is the mouth, it follows that the  
importance of thorough mastication can  
hardly be exaggerated.

You ask if you should marry. You say  
that both of your parents died of consump-  
tion, and that you have had indications of  
the disease. What think you of bringing  
half a dozen of children into life to go  
through the same terrible experiences as  
those through which your parents passed.  
There are few crimes so grave as marriage  
by persons who inherit consumption, in-  
sanity or epilepsy.

It is undoubtedly true that many plants  
in a bedroom, especially of the sorts that  
emit strong odors, may, if ventilation be  
imperfect, prove mischievous, but I should  
desire no more healthful dormitory than a  
large greenhouse with good ventilation.  
One cannot enter such a place without feel-  
ing strengthened, exhilarated. A few of  
the ordinary house-plants in your bedroom  
will prove not only agreeable but healthful.

Let me lay down a few rules of elocution.  
These rules are not the result of experience  
as a teacher or pupil of elocution, but of  
observation and long familiarity with the  
anatomy and physiology of the vocal appar-  
atus. Rule 1. Stand erect. Rule 2. Use a  
low key. Rule 3. Speak deliberately.  
Rule 4. Articulate distinctly. These four  
rules would hardly fill a volume, but they  
are the essential elements of elocution.

A clean tooth will not decay. It is the  
food left between the teeth which causes  
the trouble. That part of the tooth which  
you can reach with the tooth-brush, and  
this means the flat side, does not decay if  
the brush be used. The decay takes place  
between the teeth, especially the double-  
teeth, where the tooth-brush cannot go,  
but the new tooth-syringe, with the slip-  
point, corrects all this, and keeps the  
spaces between the teeth clean, so that de-  
cay is impossible.

To cure "pimples and flesh worms" you  
must purify your blood, not by swallowing  
patent medicine, but by living on plain,  
nutritious food, breathing a pure air day  
and night, sleeping enough, exercising free-  
ly, and keeping your skin open by frequent  
baths in soap and water. There is no other  
way to purify your system. Swallowing  
poisons won't do it. Mineral water will  
not. God has furnished the true physicians  
for this and other maladies.—Dr. Sun-  
shine, Dr. Cleanliness, Dr. Pure Air,  
Dr. Temperance and Dr. Exercise.

It is rare that a young woman should  
marry before she is twenty. It is better she  
should be twenty-five. But to marry at  
sixteen is an outrage upon nature. Suppose  
you marry at this present age, and at seven-  
teen you become a mother, the laws of na-  
ture must be charged if your child is not  
inferior. Indeed, the best and strongest  
men are born of mothers over thirty years  
of age. But sixteen, that is too bad; and  
then it is almost certain that you will lose  
your bloom and form prematurely if you  
marry when you are a child. If he won't  
wait, he is not worthy of you. It is your  
body more than your soul that he is after,  
if, when a proper explanation is made, he  
will not wait. He should rest in the fact  
that he has your love—that your heart is  
his, and wait for your body to grow.

The Beautiful Site.

SELECTED FOR THE TOMB OF GEN. GRANT AT  
RIVERSIDE PARK.

The site chosen for Gen. Grant's tomb is  
on a sort of promontory on the Hudson  
River and is the highest point in Man-  
hattanville. The outward swell of the  
promontory begins at 122nd street and the  
river bank returns to its regular line at  
129th street. The summit of this elevation  
is almost a level plateau of something more  
than 20 acres on the river side. The de-  
scent is abrupt. At its foot, 200
